

CRITERIA FOR INCLUDING A RESOURCE IN THE AIRA REPOSITORY

Please consider the following questions to determine whether a resource is appropriate for the AIRA repository:

- Does this resource bring **VALUE** to the IIS community?
- Do the organizations and/or authors of this source support AIRA's **VISION** and **MISSION**?
- Is this resource specific to **IIS**?
- Was this resource created in **2007** or later?
- Is this resource **FREE**? Can it be accessed without logging in to an external site?
- Is this resource free from endorsements that **PROMOTE** specific products, services and/or organizations?

If you answered no to any of these questions, the resource should not be added to AIRA's repository. If it does meet these criteria, please submit the resource along with recommendations for resource topics and sub-topics under which the resource should be listed.
