The Quest for the Best: Developing a Data Quality Protocol and Tools for Incoming Data

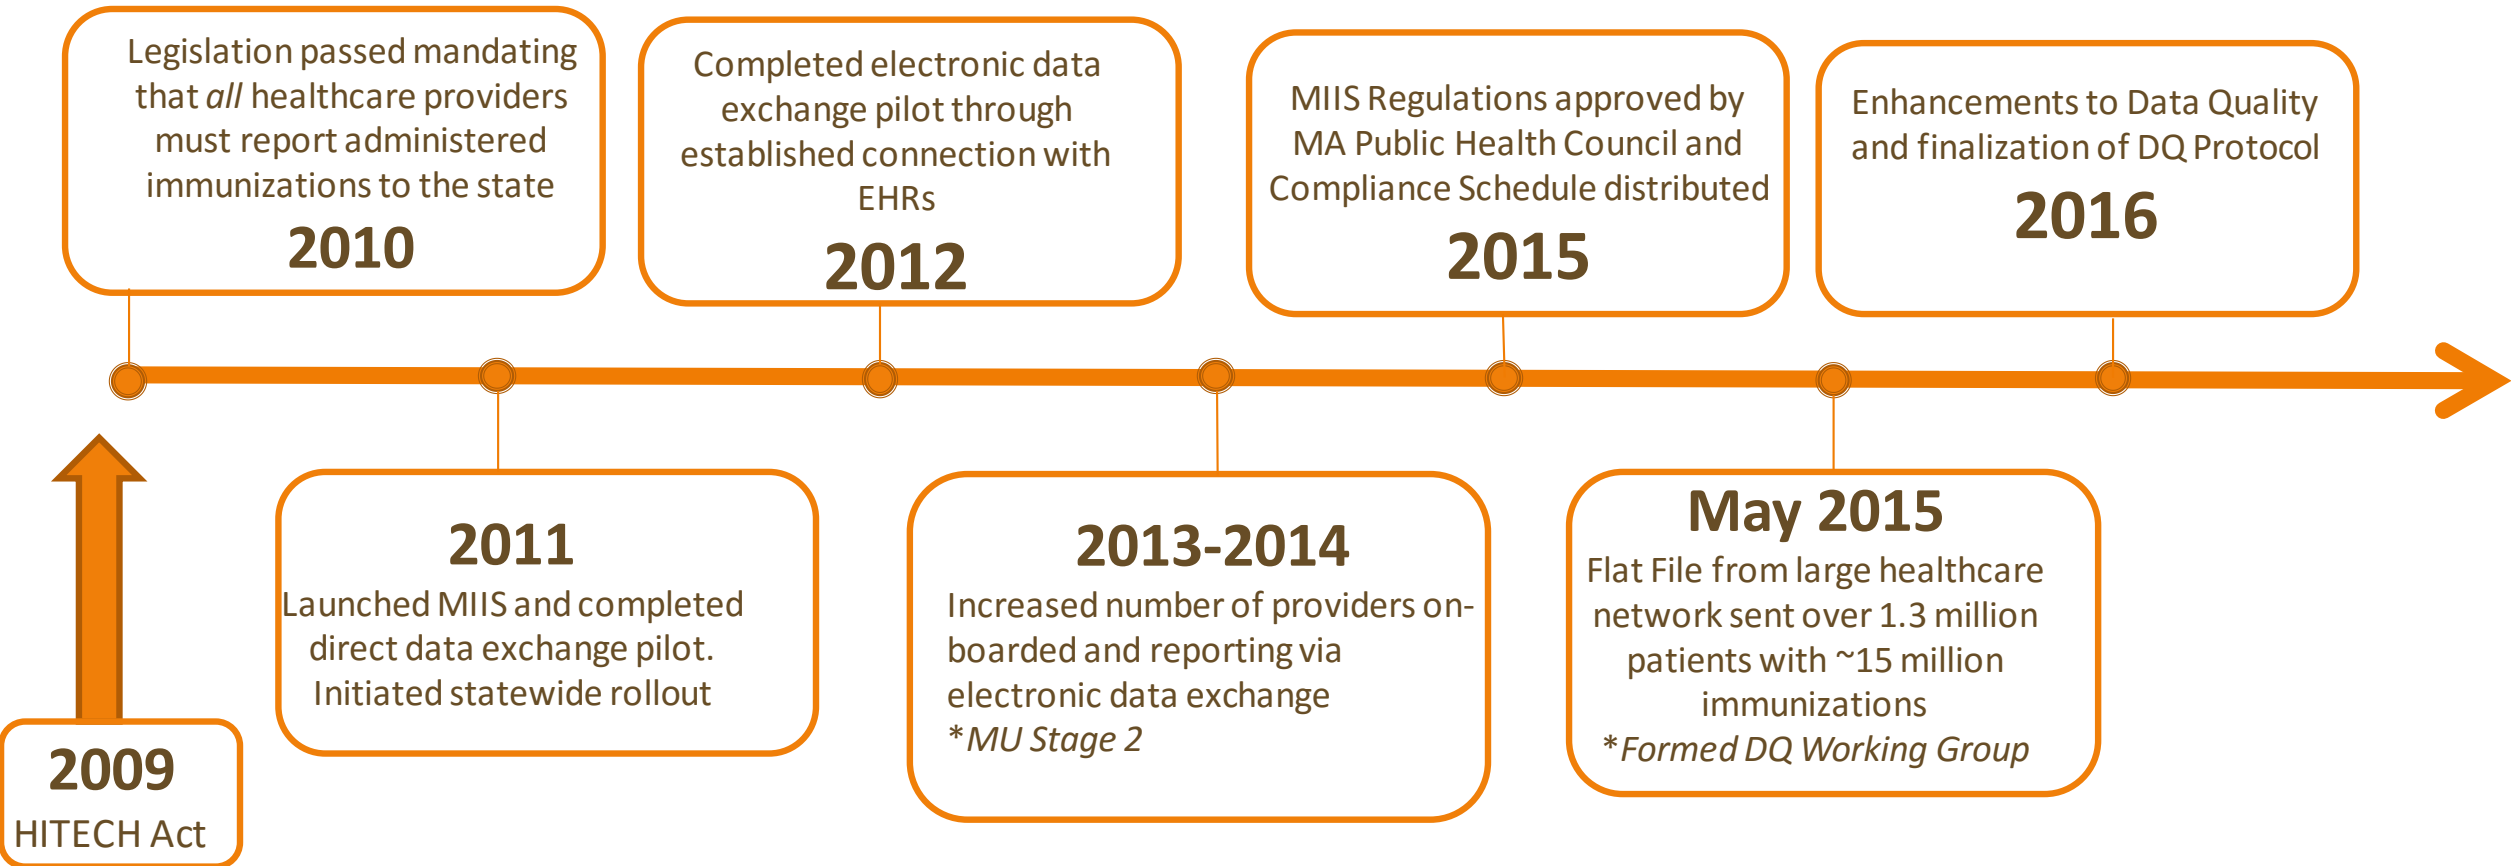

Kimberly Lay
Data Quality Analyst and Trainer
Massachusetts Immunization Information System
Immunization Program, Massachusetts
Department of Public Health
AIRA 2016

Presentation Agenda

- History of the MIIS
- System Usage and Growth
- Identification of Data Quality Issues
- Development of Data Quality Tools and Protocol
- Questions

MIIS Timeline

Data Over Time

March 2016

- Total Sites: **1600**
- Total Patients: **4,754,856**
- Total Shots: **33,711,170**

2014

- Total Sites: **532**
- Total Patients: **2,370,194**
- Total Shots: **13,597,285**

2015*

- Total Sites: **1168**
- Total Patients: **4,427,623**
- Total Shots: **33,334,571**

2013

- Total Sites: **341**
- Total Patients: **1,539,629**
- Total Shots: **7,303,293**

2011

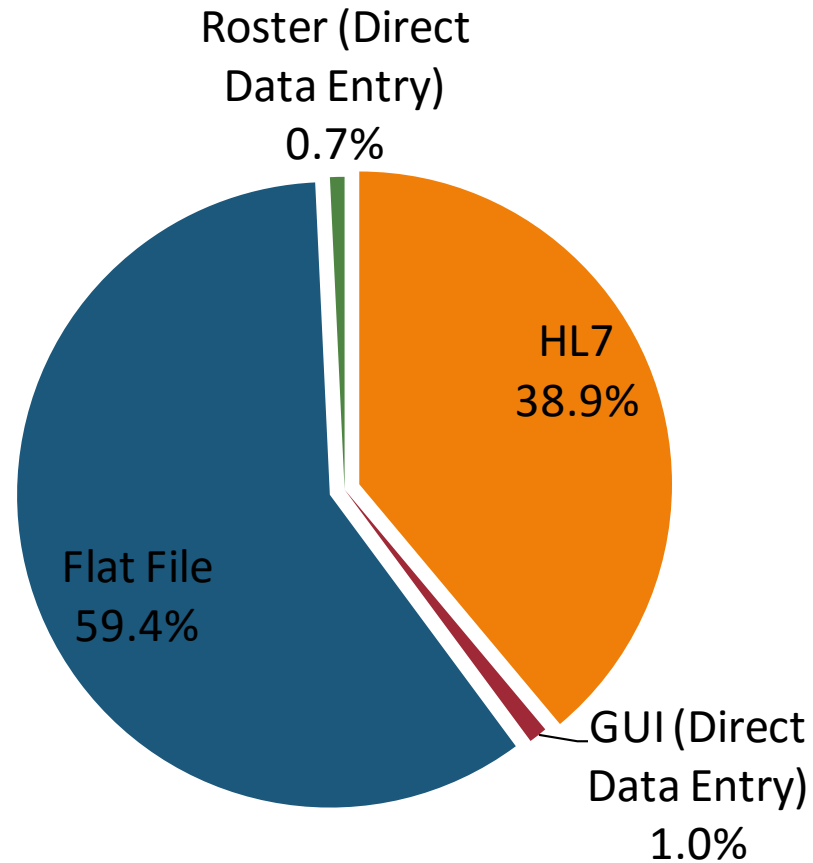

- Total Sites: **9**
- Total Patients: **3,902**
- Total Shots: **69,505**

2012

- Total Sites: **55**
- Total Patients: **815,928**
- Total Shots: **3,371,434**

**Large one time legacy load*

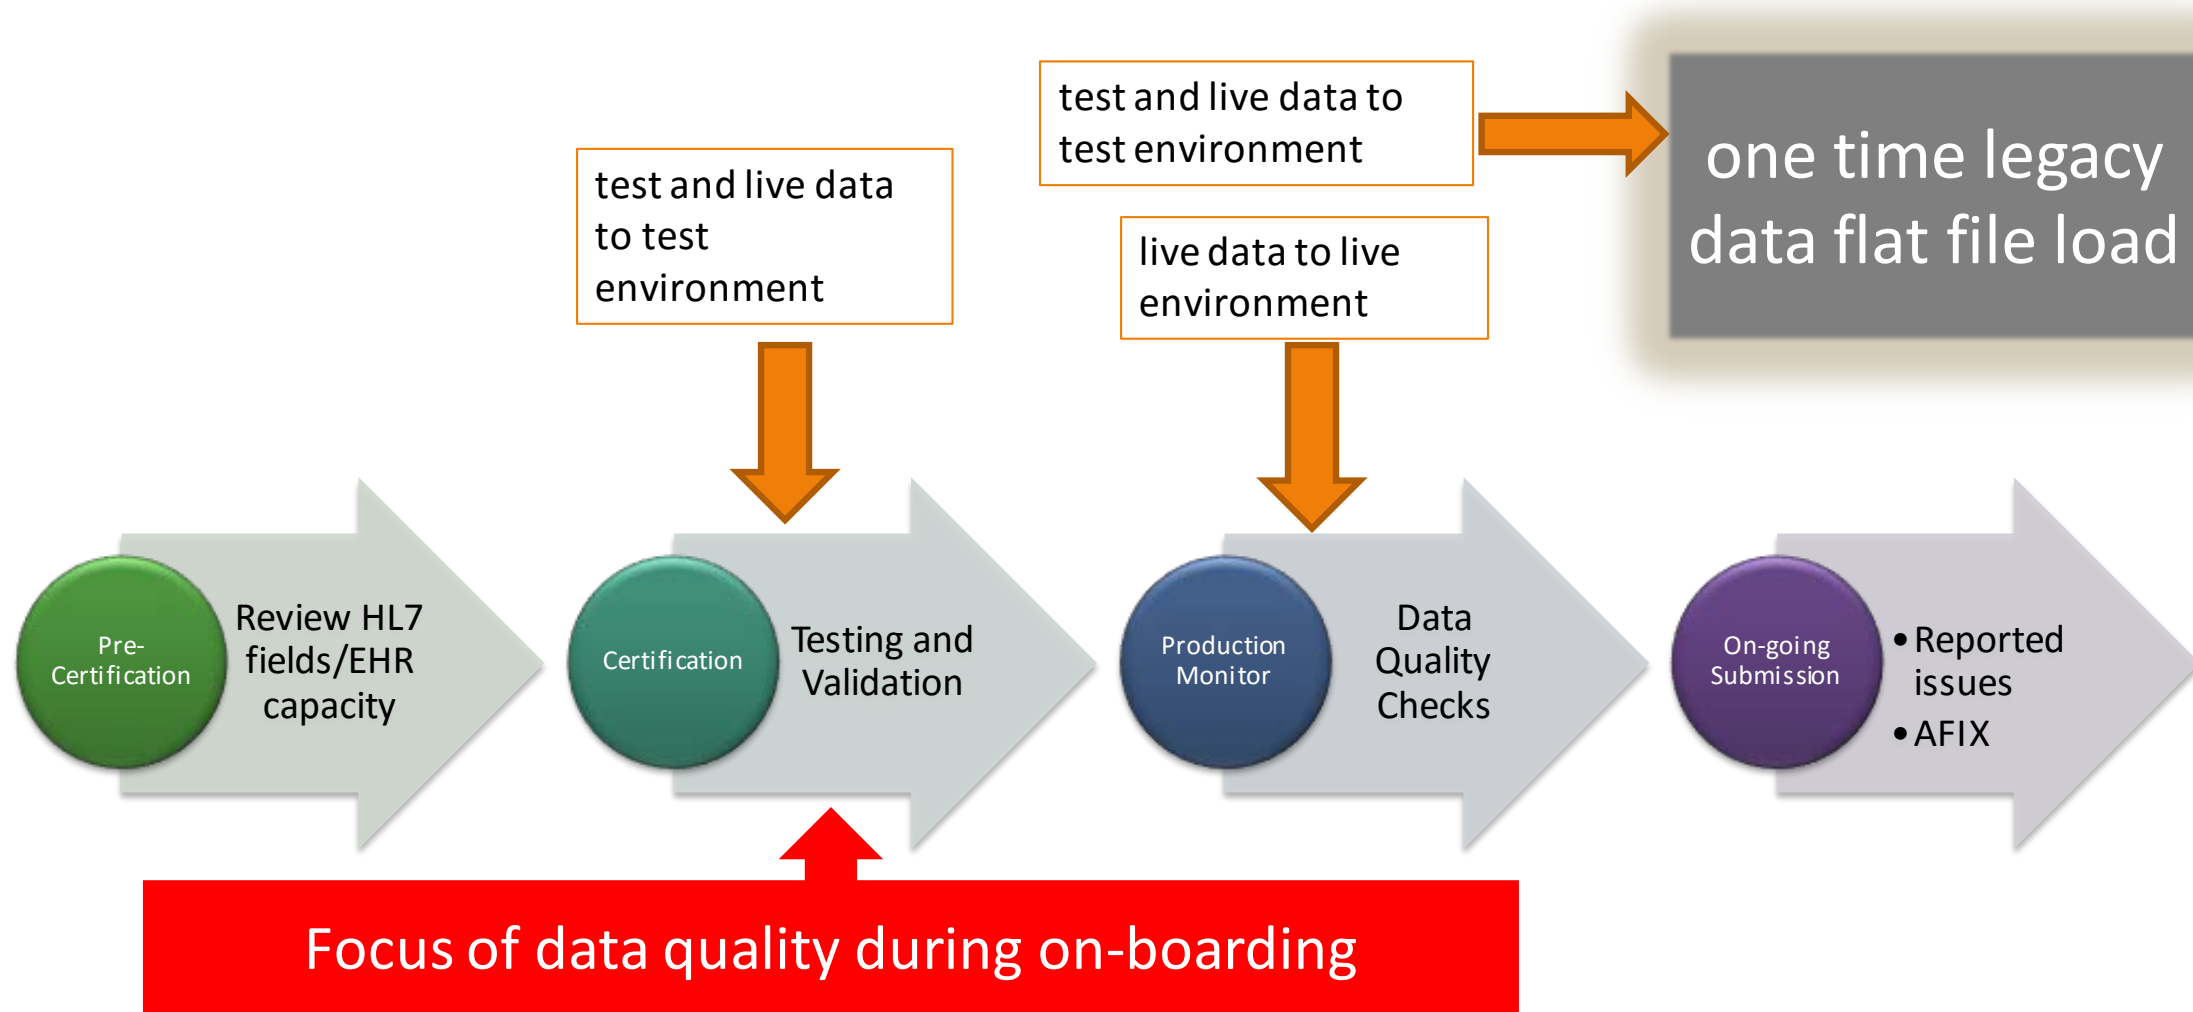

Total Reported Immunizations by Data Type

Majority of the information reported via electronic data exchange (with flat file)

N = 33,711,170
As of 3/1/16

Pre-DQ Protocol On-Boarding Process

Pre-DQ Protocol On-Boarding Tools

- HL7 Transfer Specifications and HL7 Checklist
 - ensure format and document required fields
- HL7 Administration Console
 - review messages
- Data Quality Tool for Providers during Production Monitor
 - compare 5-10 patients in EMR and MHS
- Flat File Specifications
 - ensure format and document required fields

Massachusetts Immunization Information System

MIIS

Data Quality Checks

Data Quality checks are performed to ensure that patient immunization data stored in your electronic health record (EHR) is accurately reflected in the MIIS. To perform data quality checks, follow the steps below:

- Select 5 patients who received immunization(s) on or after XX/XX/XX and search for them in both your EHR and the MIIS.
- Check that the name, date of birth, address, and basic demographic information was transmitted to the MIIS correctly. Please ensure you match with the MRN, as patients may already exist in the MIIS.
- Ensure that the patient's immunization history matches in both systems (i.e. all shots that are in the EHR are reflected in the Vaccine Administration Record accessed from the Immunizations Tab of the patient's record in the MIIS). Pay particular attention to the date of administration, vaccine name, manufacturer and dose to ensure they match in both systems.
- Ensure that your practice's medical record number (MRN) was transmitted and is accurate in the MIIS.
- Check each patient's data sharing status to confirm it is set to "Unknown."

Complete Data Quality Checks by XX/XX/XX

Send completed worksheet to the MIIS Help Desk by Fax: (617) 983-4301 ****Please call the MIIS Help Desk prior to sending the fax.**

	Provider Site Name: Associates in Women's Health Care, PC	Phone:
Date Conducted:	Vaccine PIN #: 40039	Email:

	EHR MRN#	MIIS ID#	Patient Last Name	Found record in MIIS (Y/N)	Records Match (Y/N)	If <u>immunizations</u> do not match, please list the shot(s) that are incorrect or missing, including vaccine, date of administration and/or description of fields that do not match for each shot.	If other, non-immunization related fields are incorrect or missing (ie. demographics), please indicate the field(s) below
	Example: XXXXX	XXXXX		Y	N	Hep B 7/1/13: Site of Admin in MIIS is Left Arm, it should be Right	Address missing apartment #: Should be 2

AIRA 2016

4/12/2016

What we discovered....

- Incorrect mapping of CVX codes to vaccine names
- Missing data
- Training issues
- Partial historical information
- Delays in sending information

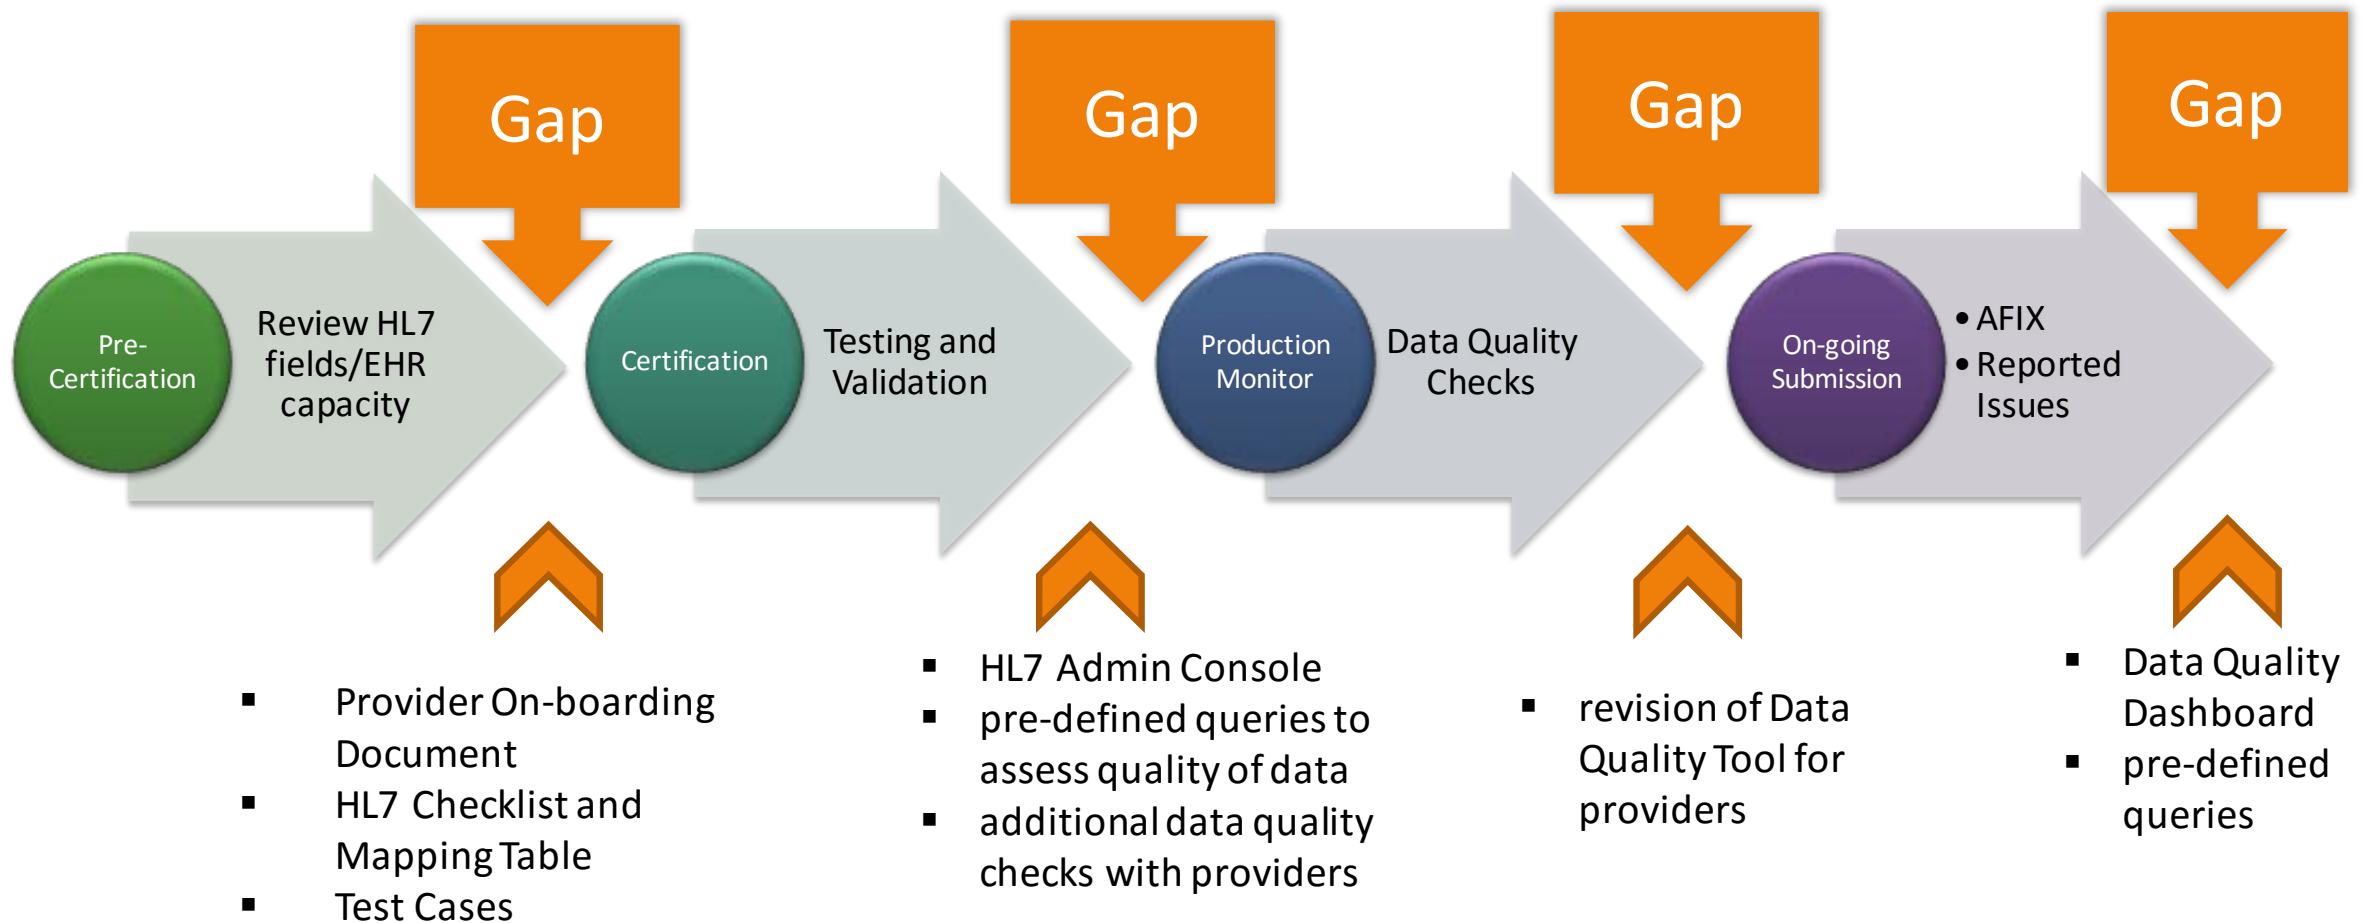

How do we
ensure
the quality of
data through
every step of
the process?

Data Quality Protocol Development: The Process

Working Group

Assessment: Gaps and New/Enhanced Tools

Legacy Data Flat File Load

- During on-boarding process or after
- Historical versus Administered immunizations
- Unspecified formulations

one time legacy data flat file load

- pre-defined queries

Pre-Certification

On-Boarding Checklist

This document outlines the high level steps provider sites must complete to be ready to use the MIIS both technically and in their daily clinical practice. The on-boarding checklist is categorized into 4 distinct phases. Provider sites are able to move onto the next phase of the on boarding when the steps within current phase are completed.

Registration

PHASE 1: Registration

MIIS CLINICAL REGISTRATION	MIIS TECHNICAL REGISTRATION	HIWAY REGISTRATION
<input type="checkbox"/> Review MIIS Legislation & Regulations	<input type="checkbox"/> Complete and submit HL7 Checklist and Mapping Table to MIIS Help Desk	
<input type="checkbox"/> Obtain buy-in from site leadership	<input type="checkbox"/> Establish HL7 2.5.1 compliant message	
<input type="checkbox"/> Identify clinical "champion(s)"	<input type="checkbox"/> Identify technical leads for testing	
<input type="checkbox"/> Complete MIIS registration & Meaningful Use registration of intent (if applicable)	<input type="checkbox"/> MIIS IT connects site's IT/Vendor with Hiway leads	<input type="checkbox"/> Initial Hiway registration

PHASE 2: Integration

MIIS CLINICAL INTEGRATION	MIIS TECHNICAL INTEGRATION	HIWAY INTEGRATION
<input type="checkbox"/> Submit site's informing process workflow (with instructions for handling objection / withdrawal of objection forms) to MIIS	<input type="checkbox"/> Decide if and how site will complete legacy immunization load	<input type="checkbox"/> Setup transport protocols with authorization to MIIS CERT
<input type="checkbox"/> Train on MIIS functionality	<input type="checkbox"/> MIIS IT sets up site in CERT and begins receiving test data	<input type="checkbox"/> Complete testing
<input type="checkbox"/> Set tentative timelines and Go Live date	<input type="checkbox"/> Complete CERT testing and notify MIIS Clinical Lead	<input type="checkbox"/> Hiway indicates is ready for connectivity
<input type="checkbox"/> Conduct data quality checks in CERT	<input type="checkbox"/> Assist with any DQ issues identified	

PHASE 3: Production Monitor

MIIS CLINICAL TEAM	MIIS TECHNICAL TEAM	HIWAY TEAM
<input type="checkbox"/> Conduct Data Quality Checks in Production	<input type="checkbox"/> MIIS IT notifies Hiway site ready to be moved to Production	<input type="checkbox"/> Hiway provides production credentials & confirms connectivity

PHASE 4: Go-Live

MIIS CLINICAL TEAM	MIIS TECHNICAL TEAM	HIWAY
<input type="checkbox"/> Confirm ready to GO Live	<input type="checkbox"/> Confirm ready to GO Live	<input type="checkbox"/> Confirm ready to GO Live
<input type="checkbox"/> MIIS Lead enters Go Live Date		
<input type="checkbox"/> GO LIVE and implement workflows		

Technical Integration

The Massachusetts Immunization Information System (MIIS) is a secure, web-based system, that supports the tracking of vaccine administration within the Commonwealth. While the MIIS has a graphical user interface (GUI) that allows health care providers to enter, query, and update patient immunization records, the MDPH recognizes that some provider sites already store immunization data in their own electronic health record system (EHR). To best support these provider sites, MDPH has also implemented the MIIS HL7 Gateway. The Gateway has the capability to accept data from existing EHR systems in real time, thus eliminating the potential burden of duplicate data entry (e.g. entering information into existing EHR systems and then also into the MIIS). The Gateway accepts HL7 version 2.5.1 vaccine messages and fulfills one component of the "meaningful use" criteria defined for provider sites by [The Health Information Technology for Economic and Clinical Health Act \(HITECH\)](#).

Transport (Connection) Options

EHR systems can connect to the MIIS using SOAP or LAND via the Mass Hlway.

SOAP instructions are found within Appendix V of the MIIS HL7 Transfer Specifications. To learn more about transport via LAND, please visit the Mass Hlway website at www.masshiway.net.

Connecting and Testing Requirements

If you are interested in establishing a connection to the MIIS with your EHR, please first review and complete the following:

- [HL7 Checklist and Mapping Tables \(xlsx\)](#)
- [CDC Certification WSDL](#) (Save locally and then open the compressed file. The file is a .WSDL)
- [Transport Instructions for Soap Web Services](#)

- HL7 Tr
- HL7 C
 - capa
 - spec
 - map
 - site
 - test

Certification: HL7 Administration Console

Certification: Predefined Database Queries

- Predefined metrics to review assess data accuracy
 - count of vaccines administered by age
 - count of vaccines administered by year
 - count of invalid/valid doses with certain thresholds
- Also used during flat file testing
- Data quality checks with providers

No. of Patients by Age with Meningococcal, unspecified

Production Monitor: Data Quality Tool for Providers

Data Quality Checks in MIIIS Production

Name:

Date Conducted:

Instructions

- 1.) Log into the MIIS through the Virtual Gateway.
- 2.) Click the Immunization Registry Module.
- 3.) Search for the patient in the MIIS. Click on the patient name to open up the record in the MIIS.
- 4.) Compare the patient record in the MIIS to the record in your electronic system.
- 5.) Record the requested information for each patient checked. Indicate "yes" if information matches. Please remember to give vaccine details on any discrepancies or missing information.
- 6.) Send completed worksheet to the MIIS Help Desk by Fax to: (617) 983-4301 *****Please call the MIIS Help Desk (617-983-4335) prior to sending the fax.***

[illegible]

On-going Submissions: Monitoring Tools

- Internal database report: Provider Compliance Report and HL7 Report
 - identification of patterns and gaps in data submission
- Documentation of EHR limitations and workarounds
 - ex: daily batch submission of data, manual triggers
- HL7 Admin Console
 - Data Quality Overview Report
- Existing Reports
 - Patients Vaccinated Report
 - Practice Population Report
 - Coverage Report
- Data Quality Dashboard (coming Fall/Winter 2016)
