

Expanding Roles of Pharmacies- IIS Impacts and Opportunities

Lisa Tonrey, MHA, RPh, PhC, FAPhA
CAPT, USPHS (retired)

300 Million

- Retail pharmacies are playing an increasingly important role in immunization practices in the United States
(Uscher-Pines, Harris et al. 2012).
- Pharmacists provide easy access to immunizations and their services can increase coverage rates, particularly for at-risk and under-served populations whom traditional health providers are unable to reach
(Grabenstein, et al. 2012).

- Broad Consumer connectivity
- Profession is positioned to enhance immunization rates- especially in targeted populations or age groups
- Align the incentives

3 Levels

- Primary: Prevent Disease
- Secondary: Screen & Intervene
- Tertiary: Offset Morbidity & Mortality
