

# Connecting Health and Care for the Nation: A Shared Nationwide Interoperability Roadmap – DRAFT Version 1.0

Erica Galvez  
Interoperability Portfolio Manager, ONC

*March 3, 2015*

The ability of a system to **exchange** electronic health information with and **use** electronic health information from other systems without special effort on the part of the user

# Why does interoperability matter?

- Individuals and providers need access to the right information at the right time in a manner they can use to make decisions that impact their health regardless of geographic or organizational boundaries
- Typical Medicare beneficiary receives care from 2 primary care providers and 5 specialists each year
- Only 10-20% of health outcomes are attributable to health care
- Information needs to flow inside and outside the care delivery system to support health

### **2015 - 2017**

Nationwide ability to  
send, receive, find,  
use a common  
clinical data set

### **2018 - 2020**

Expand interoperable  
data, users,  
sophistication, scale

### **2021 - 2024**

Broad-scale  
learning health  
system

Core technical standards and functions

Certification to support adoption and optimization of health IT products & services

Privacy and security protections for health information

Supportive business, clinical, cultural, and regulatory environments

Rules of engagement and governance

BUILD UPON EXISTING  
HEALTH IT INFRASTRUCTURE

MAINTAIN  
MODULARITY

ONE SIZE DOES  
NOT FIT ALL

CONSIDER THE CURRENT  
ENVIRONMENT AND SUPPORT  
MULTIPLE LEVELS OF ADVANCEMENT

EMPOWER  
INDIVIDUALS

SIMPLIFY

PROTECT PRIVACY AND SECURITY IN  
ALL ASPECTS OF INTEROPERABILITY

LEVERAGE  
THE MARKET

FOCUS  
ON VALUE

SCALABILITY AND  
UNIVERSAL ACCESS

# Critical Near Term Actions by Building Block

## Core technical standards and functions

- Direct the field on best available standards and implementation guidance
- Refine standards for common clinical data set, implementation of CCDA, data provenance, APIs

## Certification to support adoption and optimization of health IT products and services

- Improve rigor of ONC's certification program
- Work with industry on suite of ongoing testing tools

## Privacy and security protections for health information

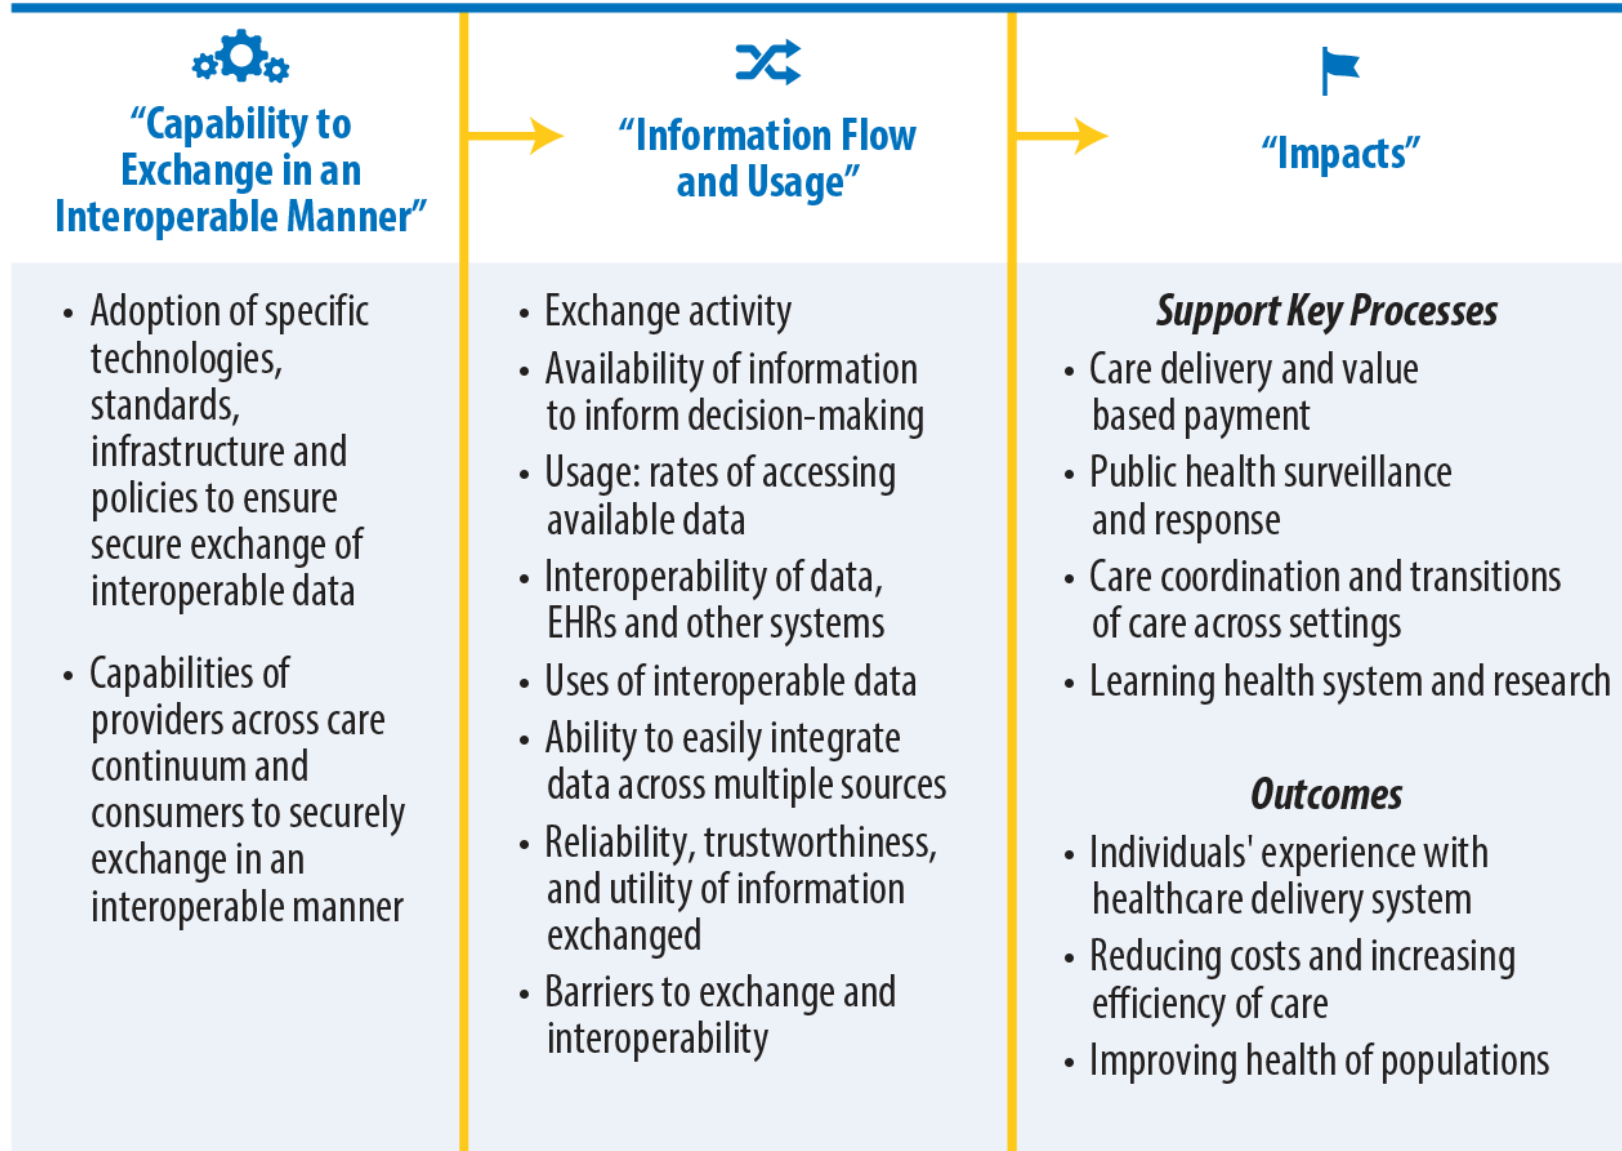

- Educate stakeholders on current federal laws
- Work with states and organizations to align laws that provide additional protections, without undermining privacy

## Supportive business, clinical, cultural, and regulatory environments

- Evolve and align policy and funding levers to focus on outcomes and incentivize adoption of certified health IT and electronic information sharing according to national standards

## Rules of engagement and governance

- Establish governance framework with principles, rules of the roadmap, and process for recognizing orgs that align
- Call to action for industry to create single coordinated process

- Please review and comment on the Roadmap
