and Improvement

Philadelphia KIDS Plus IIS

KIDS Plus IIS helps health care professionals obtain accurate immunization records for **all people who have received a vaccine in the City of Philadelphia.**

KIDS Plus IIS is a lifespan database.

Adult Data for KIDS Plus

- Adult immunization reporting requirement
- IIS has struggled to collect adult immunization data
- 1502 PPHF Adult Immunization Grant recipient

Thinking Outside the Box

Developed a plan to increase the volume of adult data in the IIS:

- Strengthened partnerships with a variety of organizations
 - FQHC historical data
 - Large Pharmacy systems/smaller independent pharmacies
 - Pharmacy software vendors and national switching systems

FQHC Goals and Data

1. Obtain **50,000 - 75,000** historical vaccinations from FQHCs
 - Currently we've added **91,230** adult historical immunizations from FQHCs across the City
2. On-board/upgrade at least **10 FQHCs** with electronic vaccine reporting (bi-directional preferred)
 - Currently 15 FQHC's live

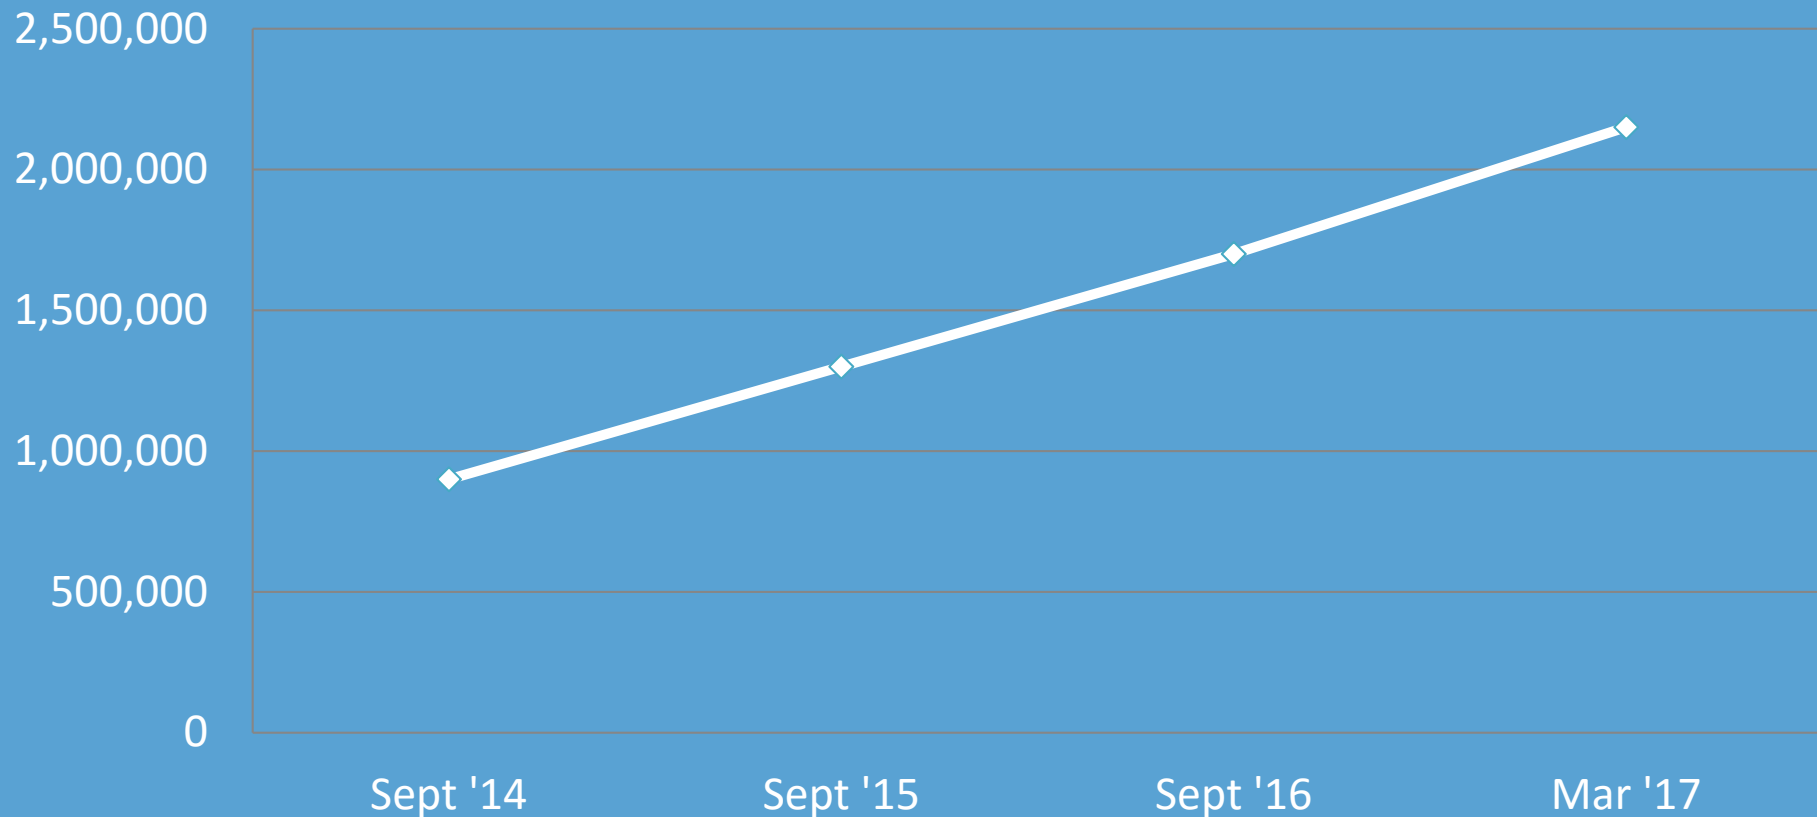

Pharmacy Partners

193 pharmacies are now interfacing with KIDS Plus IIS

Adult Vaccine Doses in KIDS Plus IIS

1,387,151

Adults in KIDS Plus IIS

As of March 2017

2,046,611

Individuals in KIDS Plus IIS

As of March 2017

17,811,277

Immunizations in KIDS Plus IIS

As of March 2017

Challenges

- Branding
- FQHCs responsiveness and low quality historical data
- Independent pharmacies limited capability to report data

Challenges

- Pharmacy chain reporting issues
 - Patient association
 - Duplication glitch
 - User entry errors

Successes

- Strengthened relationships with reporting providers
- FQHCs provided historical adult data
- Cooperation of large pharmacy chains

Next Steps

- Increase awareness and compliance
- Educate about adult immunizations
- Increase pharmacy immunizations to KIDS Plus

Conclusions

- It is possible to improve adult data in your IIS
- Pharmacies are a two sided coin
- If providers are not ready to report now, there is still hope they will report in the future!

Thank You!
