

# DEVELOPMENT AND EVALUATION OF THE NEW JERSEY IMMUNIZATION INFORMATION SYSTEM (NJIIS) INTEROPERABILITY WEBINAR TRAINING

---

Presented by:  
Joann Jablonski  
Trainer/Recruiter

# Outline

- Introduction to NJIIS
- Webinar Overview
- Development Cycles
- Lessons Learned
- Evaluation Results

# NJIIS

- Home Grown Registry
- Operated and maintained by NJDOH/OITS
- Managed by Vaccine Preventable Disease program
- Online inventory module for VFC providers

# Current Stats

- Demographic records (children & adults) >4 million
- Recorded Doses >54 million
- Active providers >10,000
- Active Users >19,000
- All children born in NJ (>80,000 per year) are automatically enrolled in NJIIS through an EBC interface

Total Providers in Production	>575
Web Service	391 (~220 are bi-directional)
Batch (File Upload/SFTP)	186

*\*As of February 2017*

# Stakeholders

- Private healthcare providers
- Vaccines for Children(VFC) healthcare providers
- EHR technicians and vendor staff

"It was time to modernize our operation so I installed a new **Electronic Holiday Registry**, and we'll qualify for government incentives if we can show meaningful use of our EHR."

# NJIIS Webinar Training

- Raise awareness of the critical and important role providers play in maintaining accurate Registry data
- Most efficient method to train large number of users
- Training webinar focuses on the importance of data quality
  - Entering data correctly in the EHR
  - Reviewing data submitted into NJIIS
  - Troubleshooting and correcting errors

# Webinar Topics

- Basics
  - Intro to NJIIS
- Data Submission and Reporting
  - HL7 data transmission
  - Excel spreadsheet reports
  - Interface reports
- Common Problems and Troubleshooting Scenarios
  - Patient data errors
  - Vaccine data errors
  - Review of available interface resources

# Troubleshooting Scenarios

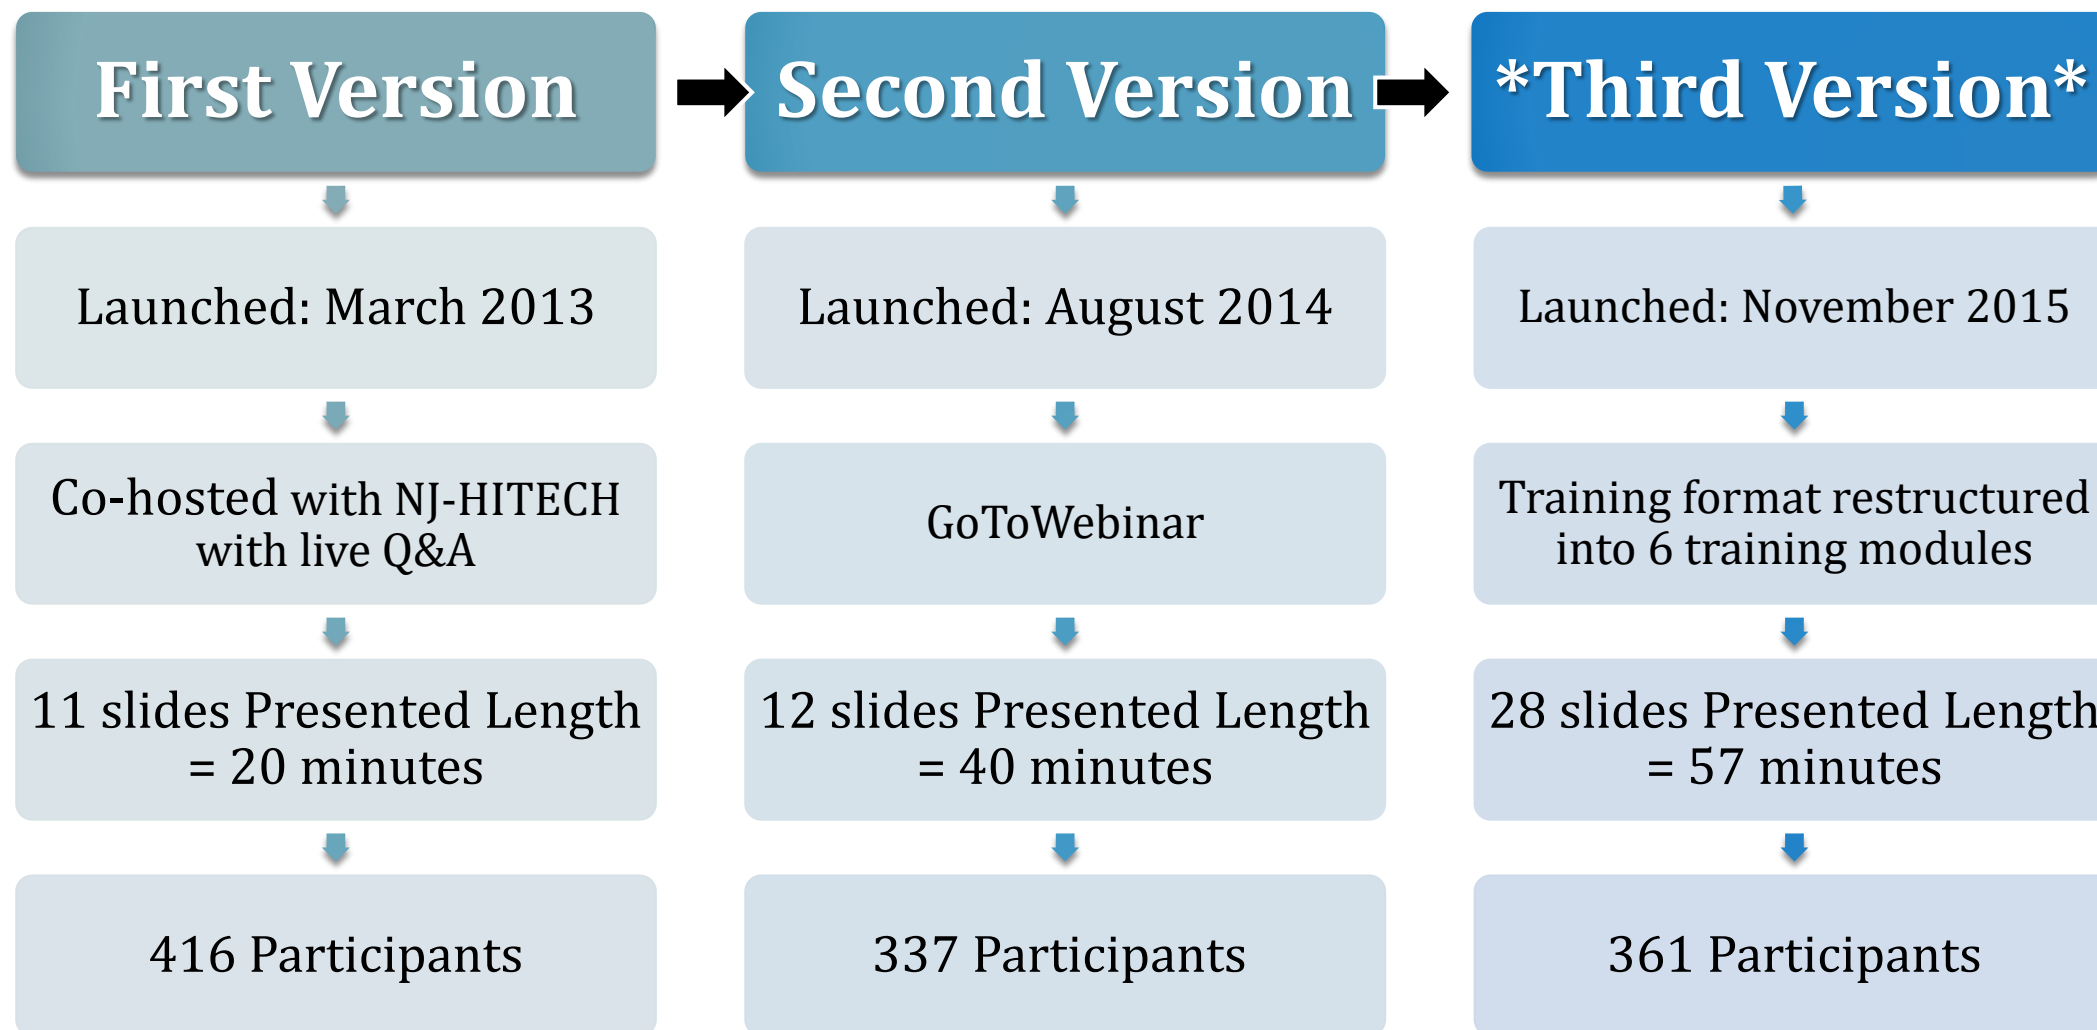

ISSUE	RESULT
Patient consent was not documented in the HL7 message (for those born prior to 1998)	Patient and their vaccination data are not added into NJIIS
Patient name was not an exact match – name triggered multiple possible matches	Patient and their vaccination data are not added into NJIIS
Dose does not match the lot number in NJIIS	Dose is added to NJIIS but not deducted from inventory
Dose-level VFC eligibility is not reported or incorrectly reported as private	Dose is added into NJIIS but not deducted from inventory
EHR sends a message to delete one VFC dose in NJIIS	NJIIS VFC on-hand inventory will increase by one

# WEBINAR DEVELOPMENT CYCLES

---

# Webinar Development Cycle

# Current Webinar

- **Content added:**
  - HL7 Data Transmission
  - Excel Basics
  - 2 additional Troubleshooting Scenarios
  - Additional Poll Questions
- **Restructured the Format**
  - 6 Modules
  - Pre- and Post-Survey

# Topics Covered

## **Module 1**

NJIIS Reporting Requirements  
HL7 Data Transmission

## **Module 2**

NJIIS Forms  
'Contact Us' – NJIIS Online Intake Form

## **Module 3**

NJIIS File Upload Page  
Interface File Statistics Report  
VFC Dose Statistics Report

## **Module 4**

Interface File Details Report  
How-To-Guides

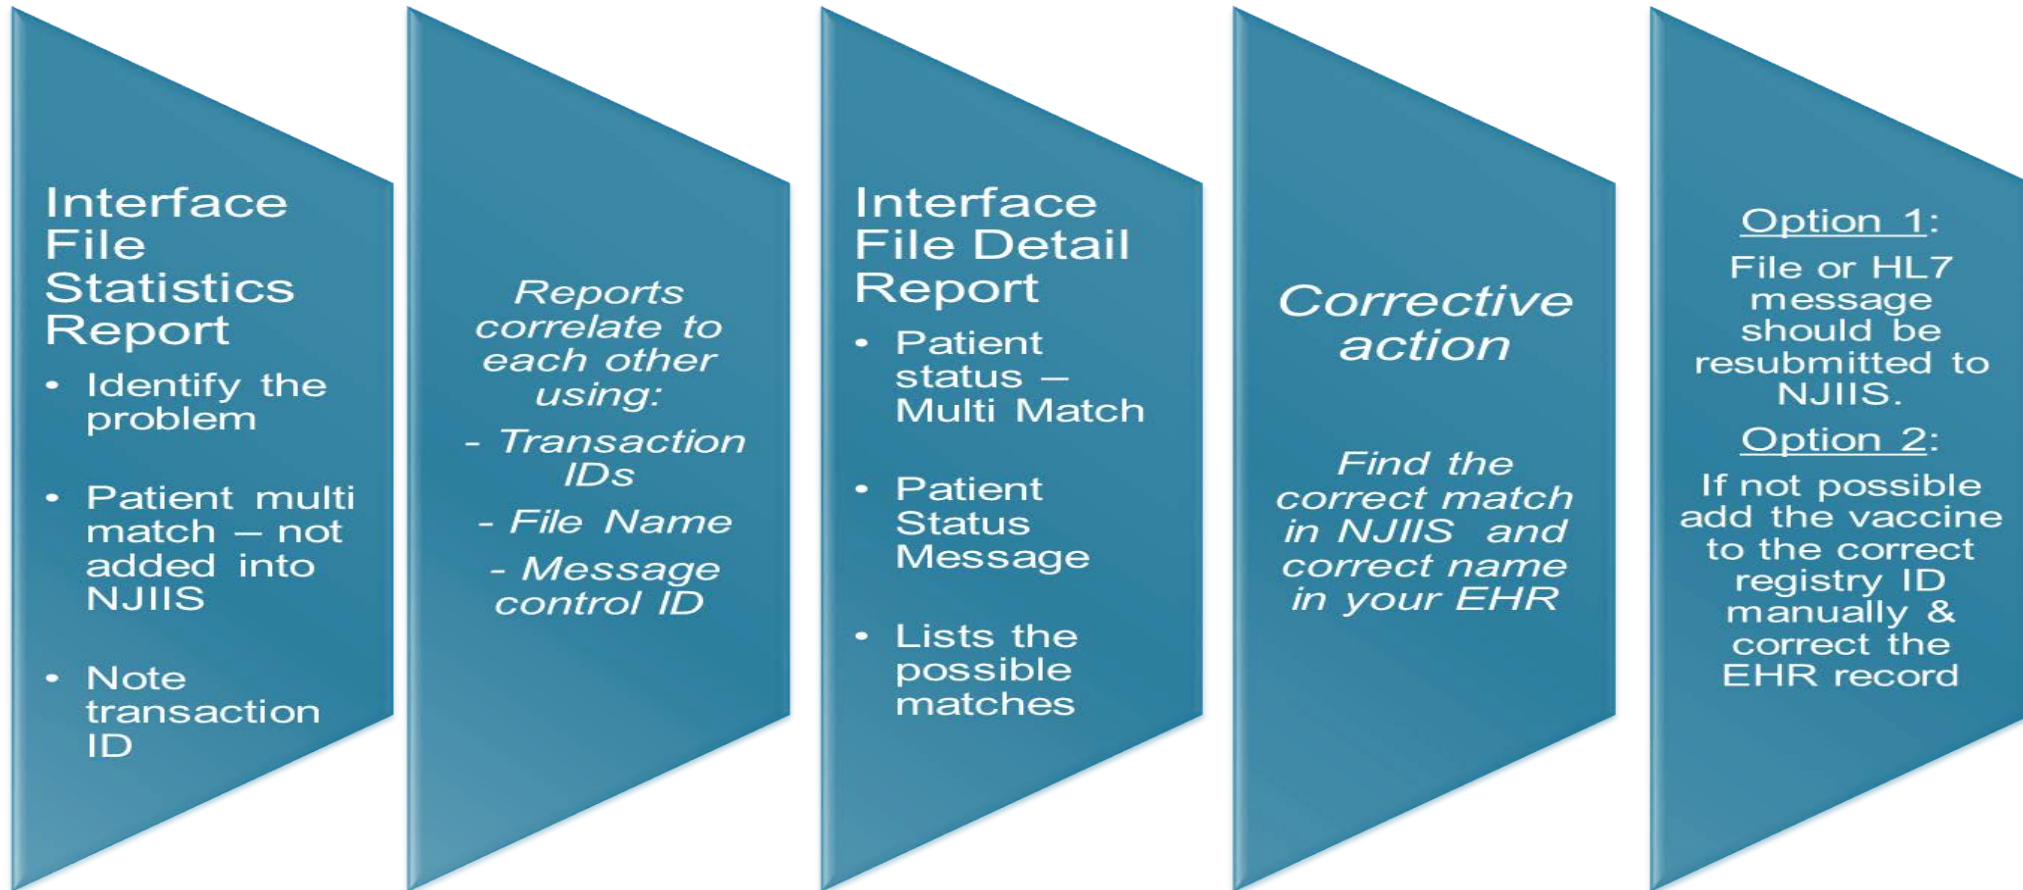

## **Module 5**

Excel Spreadsheet Basics  
Troubleshooting Patient Data

## **Module 6**

Troubleshooting Vaccination Data  
Resource summary

# Troubleshooting Scenario Example

**Troubleshooting Scenario 2: Patient Not Added into NJIIS**

# EVALUATION RESULTS

# Assessing Knowledge of Subject Matter

## Poll Questions

- Presented after each module
- Given up to 1 minute to select the correct answer
- Reinforces the module material
- Keeps participants engaged
- Effective Assessment Tool
  - First Version: **n=102**
  - Updated Poll Questions: **n= 168**

# Poll Questions

## QUICKPOLL

**The Interface File Statistics Report gives an overview of data submitted to the registry and identifies:**

Please select one:

- ☐ **Data added, updated or deleted**
- ☐ **Number of patients not correctly processed into NJIIS**
- ☐ **Number of vaccines that were not correctly processed into NJ**
- ☐ **All of the above**

# Poll Questions

## Topic: NJIIS Basics

1. For patients born before 1/1/1998, to be added to the registry, the Provider's office must:
2. Who is responsible for making any corrections to data that is submitted to NJIIS?
3. The best way to reach NJIIS support staff is by:
4. What do you do if your NJIIS password is not working?

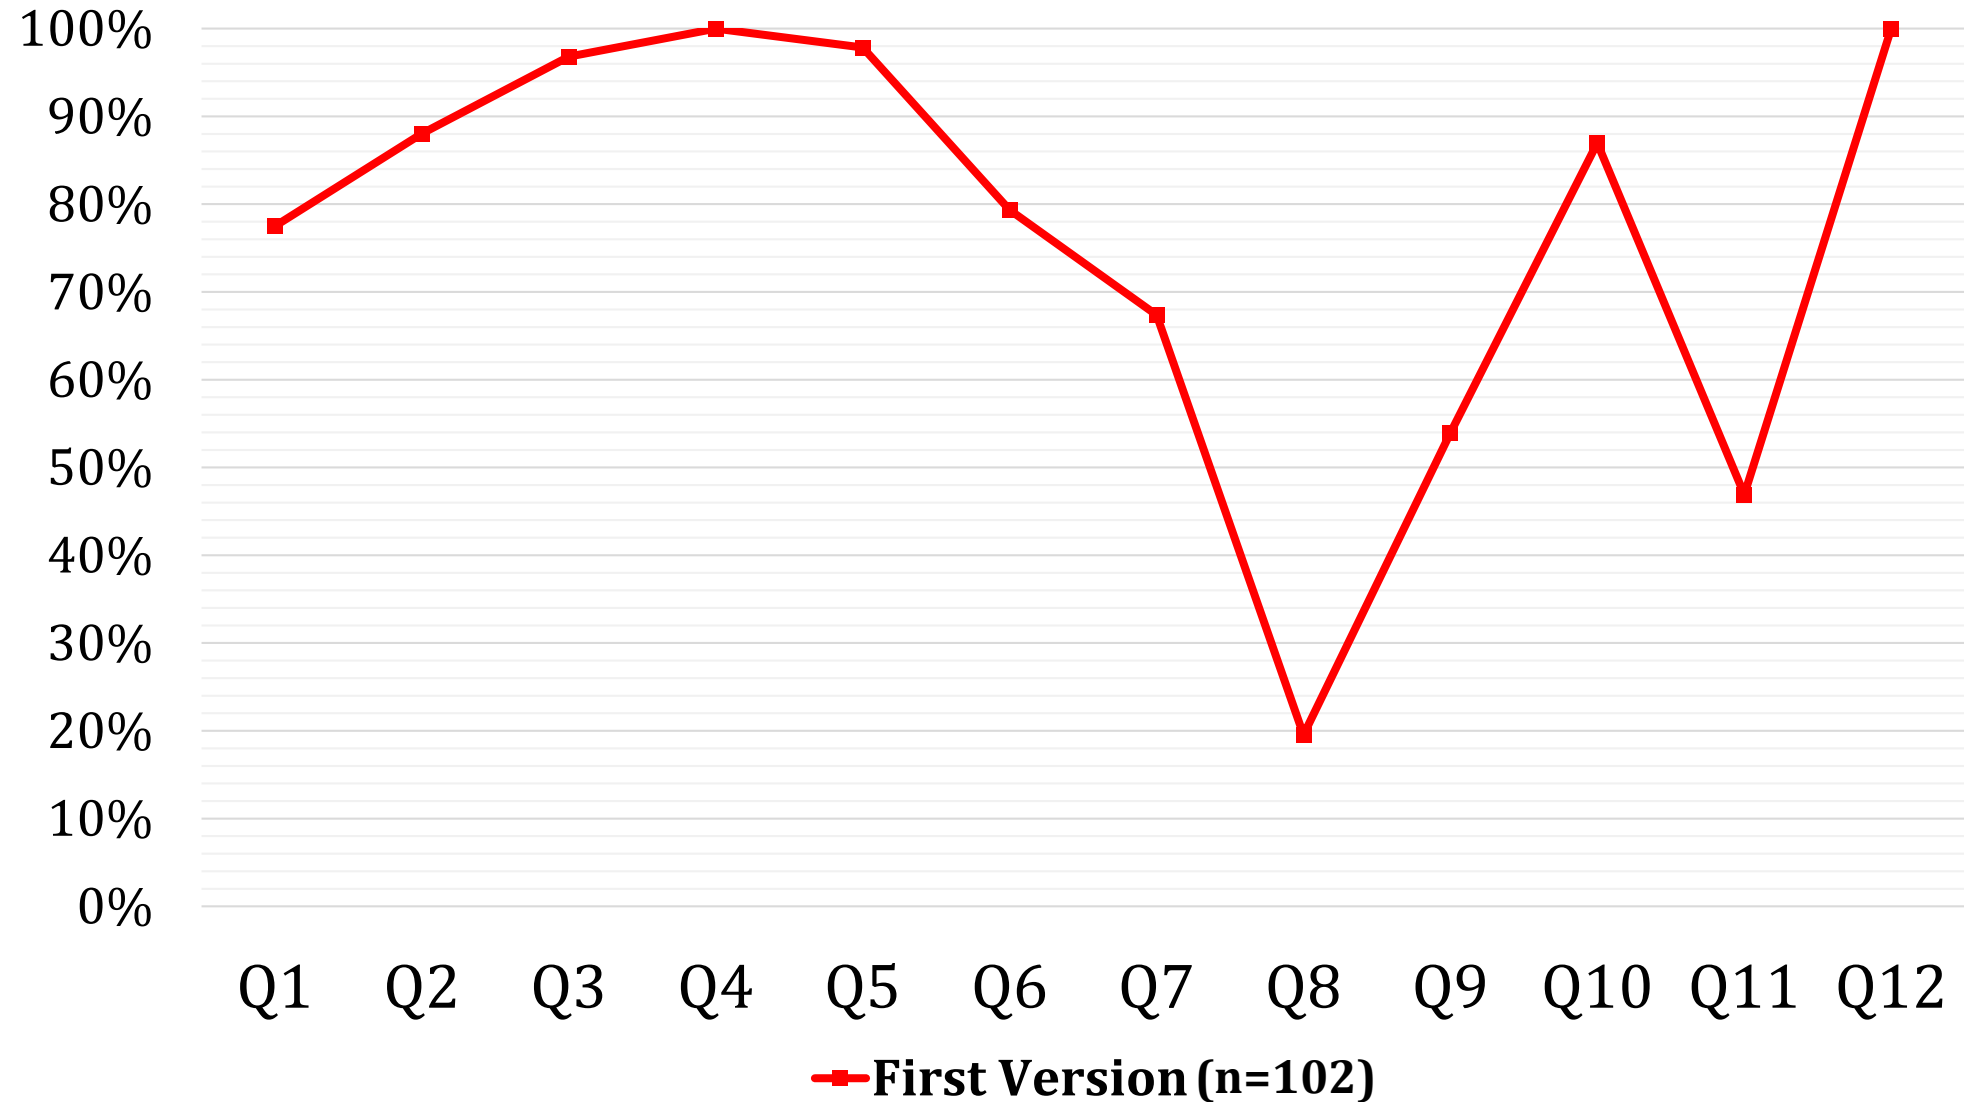

## Topic: Reports

5. The Interface File Statistics Report gives an overview of data submitted to the registry and identifies:
6. What is the longest time frame the File Statistics Report can be run?
7. When troubleshooting, which fields are used to compare the Statistics Reports to the Detail Report?
8. Which report will tell you why a dose was not added?
9. On the Interface File Details Report, the dose status/dose comment provides information about:
10. If the Interface File Details Report indicates a patient was found with multiple possible matches, then the provider must:
11. On the Interface File Details Report, the dose comment "No matching inventory record found" means

## Topic: Resources

12. The resources available to assist NJIIS users in troubleshooting data include:

# Percentage of Correct Responses

# Percentage of Correct Responses

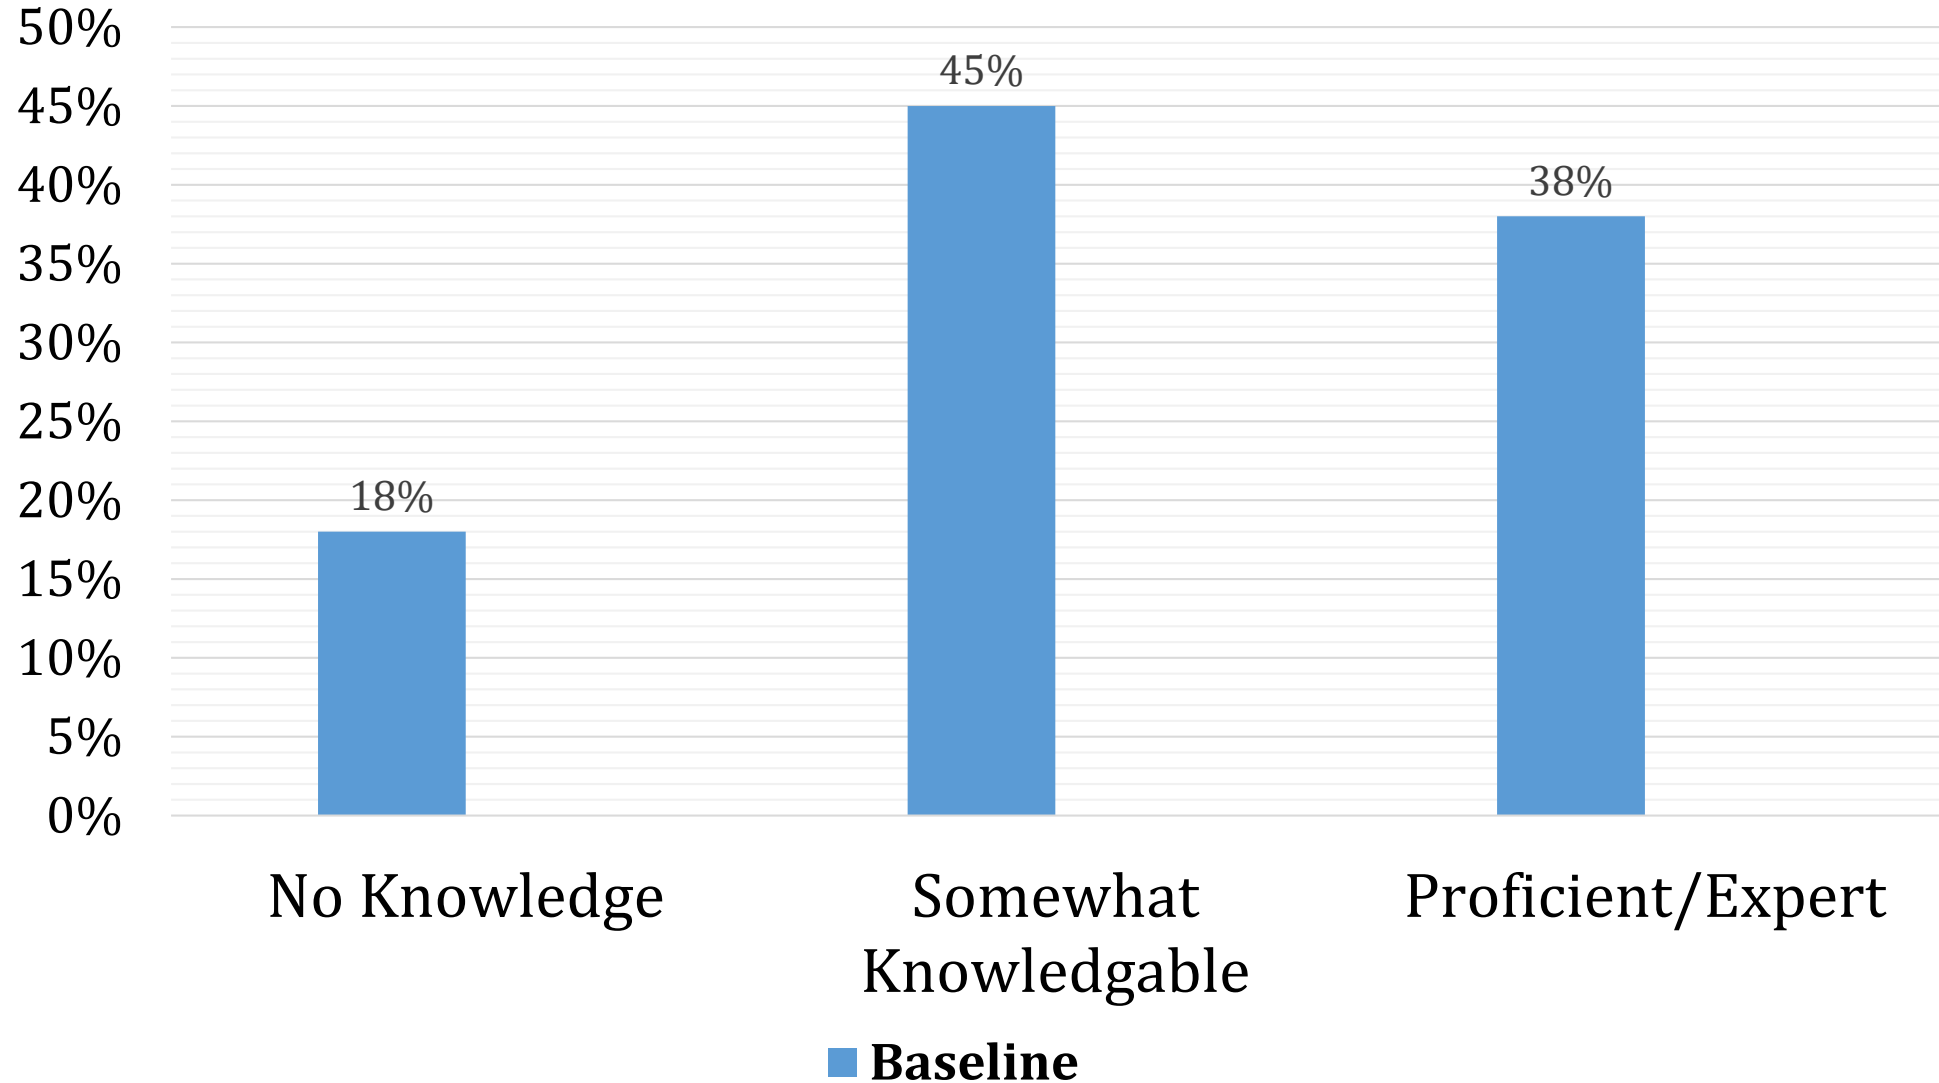

# Evaluation of the Interface Webinar Training

## **Pre-/Post-Survey**

- Self-Assessment Tool
- Consists of rating your knowledge/understanding
  1. No Knowledge
  2. Somewhat Knowledgeable
  3. Proficient
  4. Expert
- **n = 222**

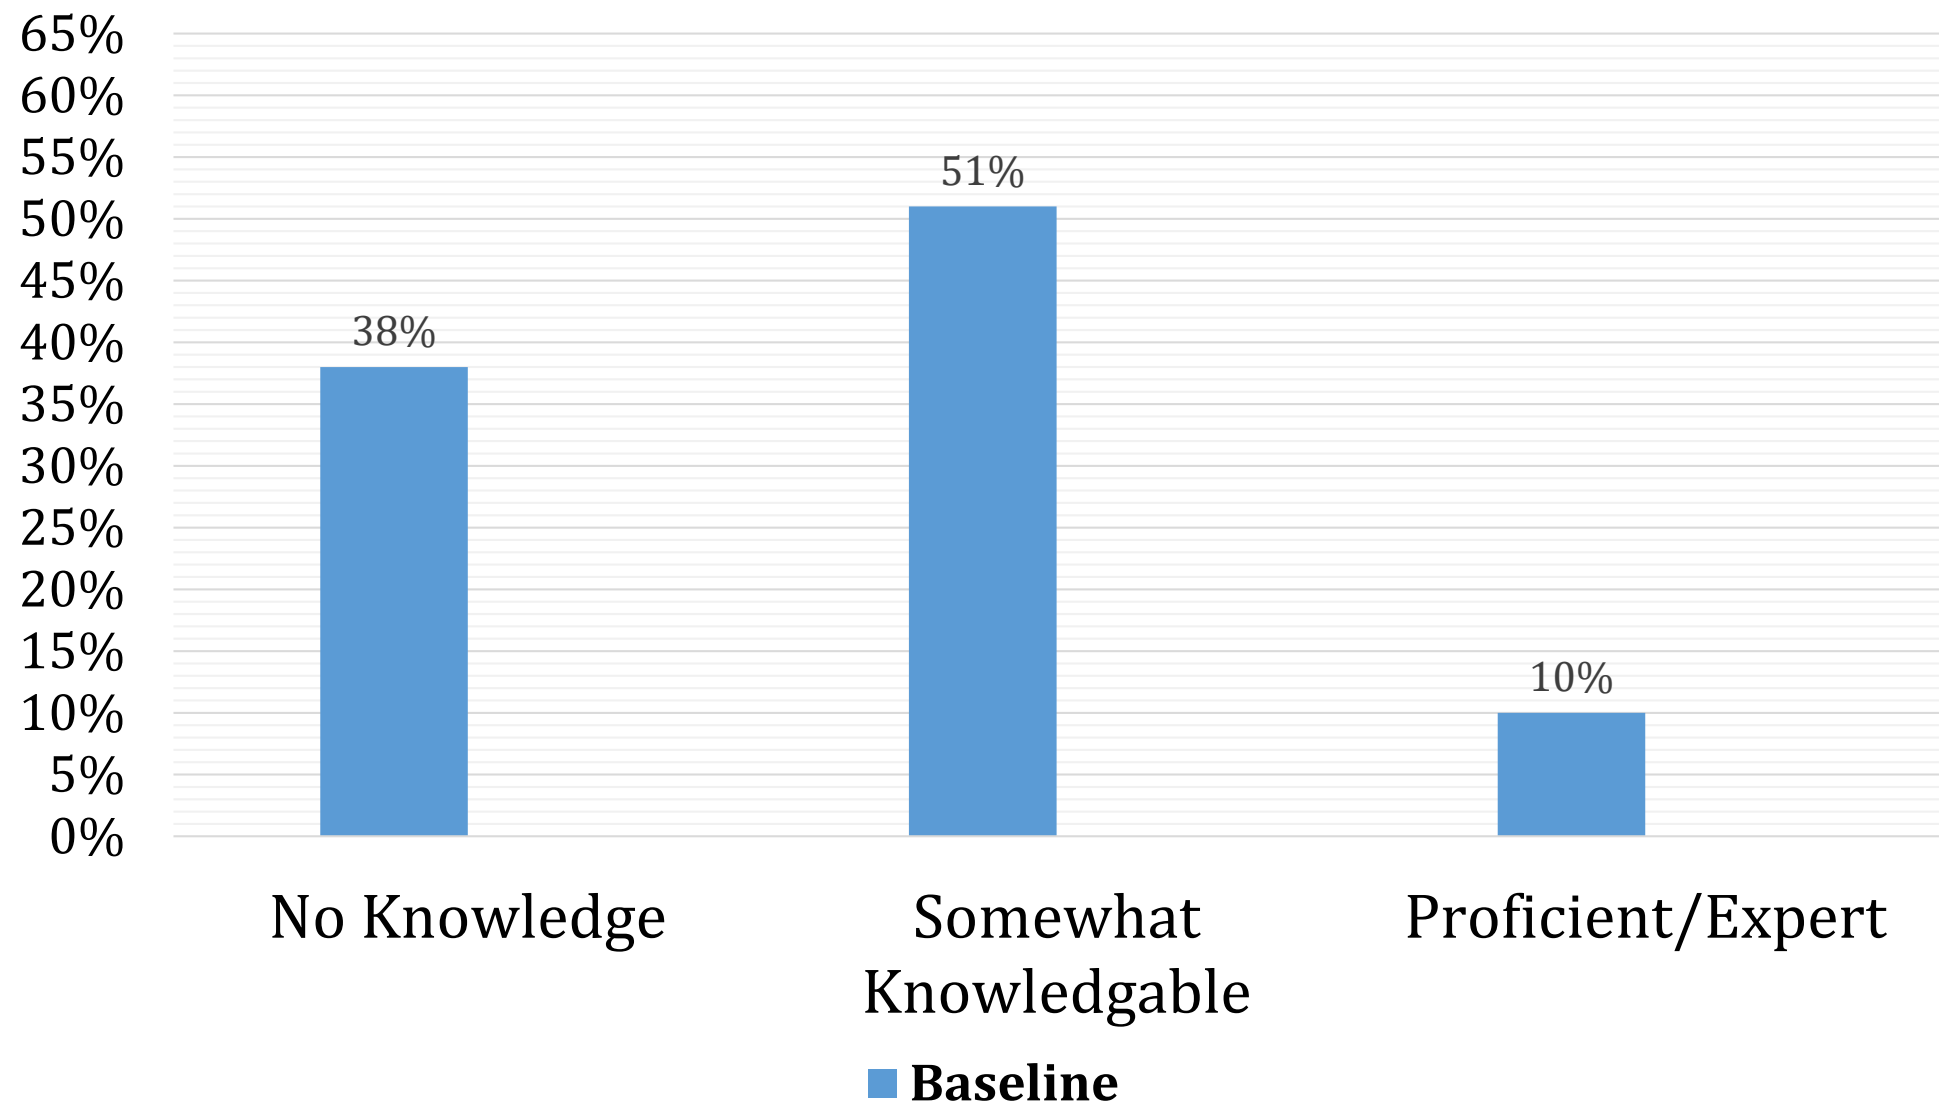

# Q1. Rate your knowledge of NJIIS

# Q1. Rate your knowledge of NJIIS

# Q2: Rate your knowledge of how data is interfaced with NJIIS

# Q2: Rate your knowledge of how data is interfaced with NJIIS

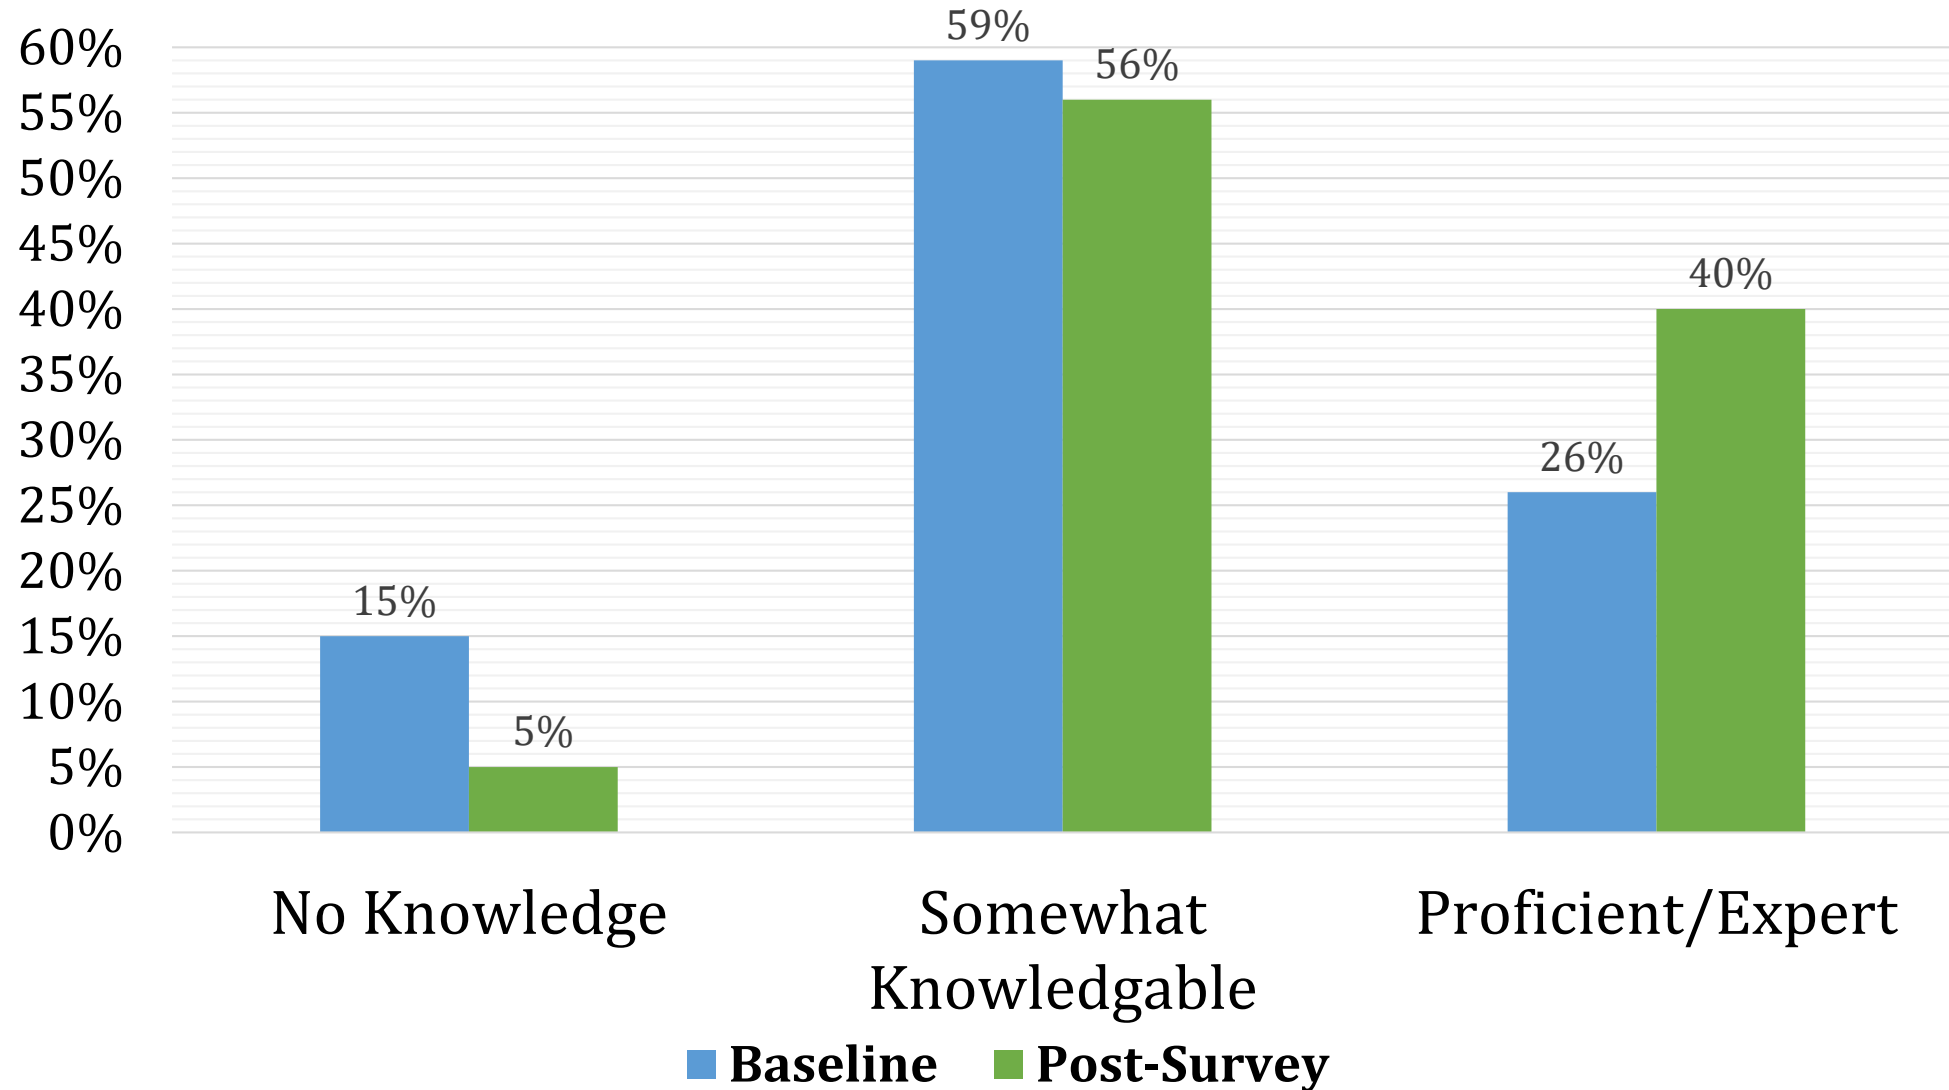

## Q3: Rate your understanding of Excel Spreadsheet Basics

## Q3: Rate your understanding of Excel Spreadsheet Basics

## Q4: Rate your understanding of the NJIIS interface reports

## Q4: Rate your understanding of the NJIIS interface reports

## Q5: Rate your knowledge of NJIIS Interface Help Guides

## Q5: Rate your knowledge of NJIIS Interface Help Guides

# LESSONS LEARNED

---

# GoToWebinar

Online platform for delivering webinars

## Pros

- Easy Setup
  - Poll questions
  - Pre-survey
  - Post survey
- Rich Features
  - Invite co-organizers/panelist to participate
  - Attendance reports are automatically generated
  - Generates a webinar link for repeat viewing

## Cons

- Cannot edit audio or visuals
  - Purchasing a recording/editing software (Camtasia) greatly reduced development time
- Playing live videos is still in Beta

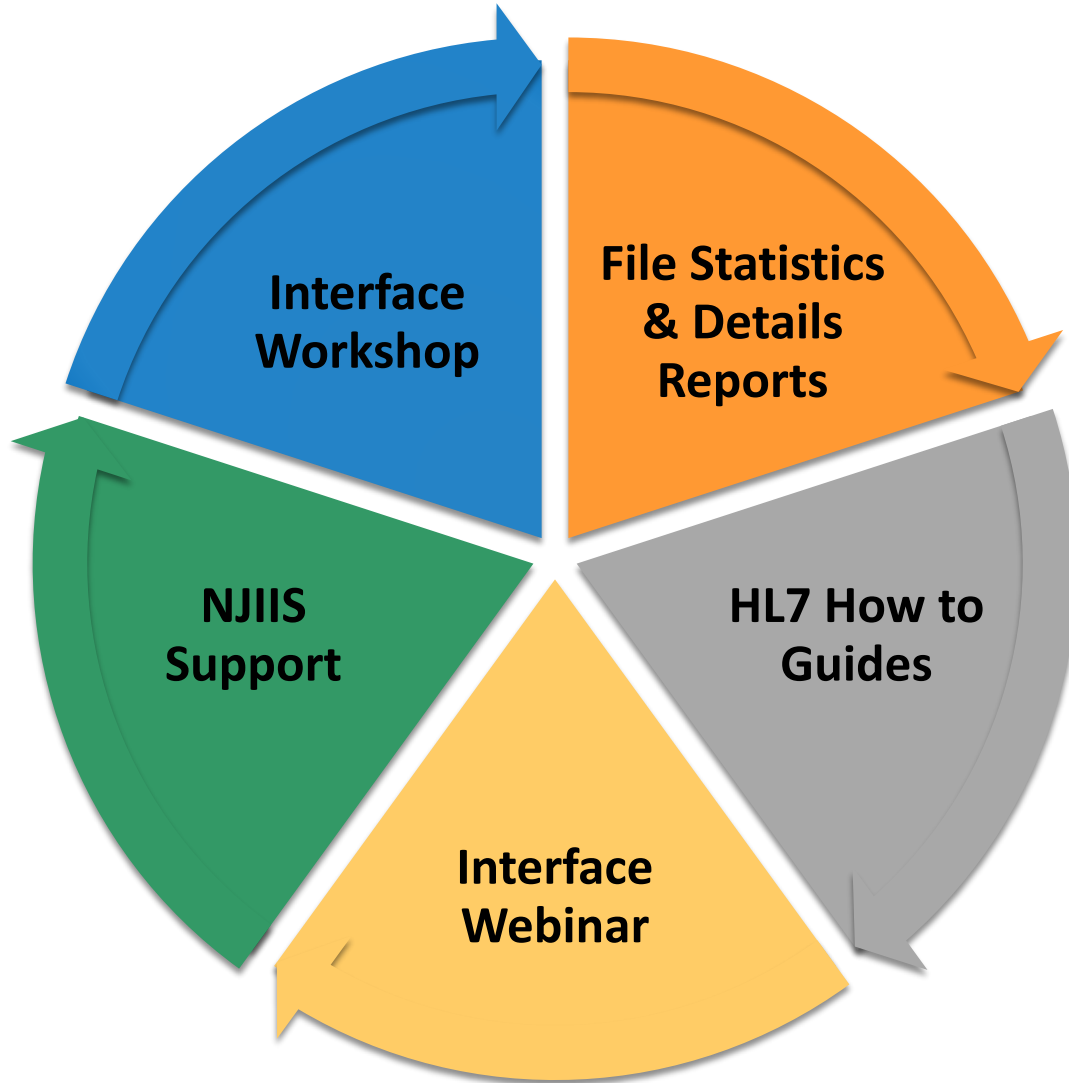

# Effective Marketing Plan

- Pre-Interfacing Sites
  - Users directed to the webinar in the Getting Started document
- Sites in the Testing Phase
  - Automated emails sent reminding users to take the interface webinar
- Pre-Production Sites
  - On the pre-production call:  
*“Please ensure that at least one employee from your practice registers to take the NJIIS Interface Webinar. This individual will be responsible for reviewing the interface-related reports on a routine basis to troubleshoot any issues that may arise in immunization data submission.”*
- Sites in Production
  - Interface workshops cannot be attended until completion of webinar training

# Where are we today?

**DATA  
QUALITY**

# THANK YOU!
