# Methods

## Timeliness of vaccination entry into the WIR by data input type, January 2013- September 2017

## Vaccination entry within one day of vaccine administration

### Data Entry Type

MEI post PRC	One person	Shared Entry	Data Exchange	Total
Improved	9	4	0	13
Consistent	6	4	6	16
Worsened	3	1	0	4

# Results

Best improvement post PRC

- Organization type: **LHD**
- Vaccination entry: **One person**
- Provider size: **Small**
- Pre-PRC timeliness: **12.14%**
- Post-PRC timeliness: **61%**

# Results

Worst improvement post PRC

- Organization type: **LHD**
- Vaccination entry: **One person**
- Provider size: **Small**
- Pre-PRC timeliness: **75.04%**
- Post-PRC timeliness: **56%**

# Survey Feedback

12

- Identified areas of success and improvement with staff

6

- Updated WIR user trainings

2

- Changed internal processes

# Survey Feedback

“Summary of timeliness of data entry helps us in [the] fall when we [hold multiple] influenza clinics.”

“All of the [PRC] is reviewed and considered helpful—we strive for completeness and accuracy.”

“We use it to set goals for our facility as far as complete documentation.”

# Conclusion

- Timeliness variable on the PRC helped improve vaccination entry to the WIR.
- Organizations manually entering data saw more improvement than those that submitted through data exchange.
