# *ImmTrac2*

**The Texas Immunization Registry**

---

## **Data Quality Enhancement**

# Introduction

---

- ImmTrac2 - Texas's IIS
  - Implemented in April 2017
  - Follows ImmTrac - April 1996
- Data Quality Enhancement (DQE) plan was developed and focused on several key areas
  - Current Data
  - New Data
  - New Data Sources

**TEXAS**  
Health and Human Services

**Texas Department of State  
Health Services**

# Enhancement

---

- What is meant by Enhancement?
  - Growing the Data set
  - Filling in gaps in the Data set
  - Improving the reliability of Data
  - Increasing the validity of the Data

# Texas's Strategy

---

- Automation
- Database focus
- Program side issue identification
  - We develop the query's that define the problem
- Data input improvement
- High prioritization of Data quality issues
  - Faster expected turnaround time from vendor
- Integration with multiple 3<sup>rd</sup> party sources

TEXAS  
Health and Human Services

Texas Department of State  
Health Services

# Automation

---

- Validation before submission
- Increase rate at which orgs submit electronically
- Merge process has been increasingly automated to include clients entered via the UI
- No new manual processes
- Deep analysis finds areas with variable entry quality

TEXAS  
Health and Human Services

Texas Department of State  
Health Services

# Database Focus

---

- Internal staff regularly query the database for Data quality issues
  - Identification of issues in total terms
  - Full issue correction and root cause analysis
- Metrics and quality performance broken down by organizations
- Visualization of Data quality
- Standardized queries over time

# Collecting New Data

---

- Provider engagement
- Data validation on input
  - Organization names
  - Organization address
  - Email address (users and clients)
- Third party Data sources
  - Smarty Streets
  - Texas VFC and ASN program
  - Texas Education Agency
  - State childcare licensing agency
  - NPPES (Provider NPI Lookup)
- Geocoding addresses

**TEXAS**

Health Services

# Adding Additional Submitters

---

- #1 barrier to adult submissions in Texas is provider knowledge that ImmTrac2 is a lifetime registry.
  - They just need to submit adult consent
- However, by adding the ability to see the immunization history once adult consent is added:
  - We expect far more adult consents to be added to the system
  - This value added feature is a win-win-win-win for the program, provider, patient, and population

Health Services

# Deduplication

---

- Duplicate Data can be a big problem
  - Address Data
  - Immunizations
  - Organization names
  - Clients
- Validation on the fly
- Immunization scheduler
- Data entry feedback
  - UI Messaging

TEXAS  
Health and Human Services

Texas Department of State  
Health Services

# Data Validation

---

- Prevent problems in the first place
  - There are usability limitations to this use case
  - Some issues are still found and dealt with after the fact
- Enhanced data exchange performance
- Vital statistics as source record
- Bidirectional validation
- Internal processes
- 3<sup>rd</sup> party Data validation

# Techniques for Data Quality Analysis

---

- Can't fix what isn't identified
- Operationalize Data by answering specific questions
- Custom and regular query's and data quality dashboards on the program side
- Sharing more data than ever with key stakeholders

**TEXAS**  
Health and Human Services

**Texas Department of State  
Health Services**

# Results

---

- Time to merge has decreased by 95% year to date
- Time to approve applications has improved by 95%
- Increased immunization submission acceptance by 110% year over year
- Increased client submission acceptance by 66% year over year

TEXAS  
Health and Human Services

Texas Department of State  
Health Services

# Data Quality Challenges

---

- Results/Immunity designators
  - Titer results
  - TB results
- Vaccine dose deduplication
- Improved consent rates

TEXAS  
Health and Human Services

Texas Department of State  
Health Services

# Summary

---

- Adding automation allows staff to continually solve other problems, instead of being driven by day to day data quality processes
- Bring in 3<sup>rd</sup> party data sources. They are cheap to maintain, but are sources on which to automate data validation
- Leverage existing resources
  - Programmatic
  - Systemic
  - People
- Own your own data quality
