DXC Technology

CURRENT STATE

- IIS' exist across all grantees.

- IIS' range in maturity of implementation.

- Immunization Programs demands are often very similar.

- IIS' are being asked to support more and more activity.

- Funding continues to be a concern.

- Innovation is a key to our success.

- Collaboration is a key to our success.

WE GET TRAPPED FOCUSING ON THE BIG STUFF

- Small simple solutions can make a big difference.

- Tools to support our end users where EHRs may be incomplete go a long way.

- Pay attention to repeatable activity that is time consuming.

- Ideas are not always technology dependent.

THINK SIMPLE

- Iowa Password Reset

Password Reset is typically the single biggest issue for the help desk. Create a simple way to allow automated password reset decreases these calls. Plus you can have fun with your questions…..

So what is your favorite fair food at the Iowa State Fair!

DEDUCT FROM INVENTORY VIA DATA EXCHANGE

- Data exchange has added a level of complexity to handling automated deduction from Inventory when the EHR doesn't send what is needed to make a good decision.

- Providing tools to help our user community manually adjust helps to support vaccine inventory integrity.

						Record Count: 4
Immunizations Not Decremented for Organization: - PORTAL ORG - 159874						
Vaccination Date	**Lot/CVX**	**Eligibility**	**Trade Name**	**Patient Name**	**DOB**	**Actual Lot**	**Update**
02/16/2018	TEST18/21 - Varicella	317 Eligible - Uninsured Adult	Varivax ▾	RANGER, POWER	02/13/1999	TEST556 ▾	☐

PATIENT STATUS

- AFIX/IIS Integration forces the patient status question to a whole new level.

- Tools need to be made available to allow for changes to status in a more efficient way.

Manage Patient Status Criteria

Select All/ Deselect	Last Name	First Name	Birth Date	Patient ID	Current Status
All ☑					
☑	SANDS	CHARLEY	09/24/2014		Active
☑	SHINGRIX	TESTA	04/12/2000		Active
☑	SHINGRIX	TESTING	01/01/1965		Active
☑	SMITH	FRI	01/01/2015		Active

ADDRESS THE HEARTACHES

- Application monitoring enhancements to allow IIS program ability to monitor and support application functions is useful

- Common query functionality to save time on gathering information on common questions required by Program Leadership, Legislature or CDC.

Application Monitoring

Application Services	Description	Status	Action
NYSIIS REST	Receives UPHN requests and sends to NYSIIS for processing	Running	
RJM	REST Job Monitor sends requests back to UPHN after the jobs are processed	Running	Restart
ETL	ETL services insert data from the transactional database into the Data Mart	Running	Restart
IRPIPE	Used to communicate across the system for long running reports and processes	Running	Restart
MatchServer	Controls the communication between RunMatch and Data Exchange	Stopped	
RunMatch	RunMatch services are required for patient de-duplication purpose	Stopped	
LargeDX	Data Exchange processes data load transactions against the database and inserts data into the NYSIIS application. Processes large UPHN and all UI dx jobs	Running	Restart
SmallDX	Data Exchange processes data load transactions against the database and inserts data into the NYSIIS application. Processes small UPHN dx jobs	Running	
UPHN Connections	Indicates if UPHN port/network connections are working so that NYSIIS can contact UPHN. It does NOT show if the actual UPHN application is up	Running

Select	Query Description	Generate

Please Note: When running queries that use Age Range, please be sure to enter the range from youngest to oldest. Reversing the order will not return results.

☐ Total number of patients: Age [____] Days ▼ through Age [____] Days ▼ residing in [All Counties ▼] County.

☐ Total number of new patients added from: [____] 📅 To: [____] 📅 in [All Counties ▼] County.

☐ Total number of vaccinations: Age [____] Days ▼ through Age [____] Days ▼ residing in [All Counties ▼] County.

☐ Vaccinations administered (only new imms from inventory) From: [____] 📅 To: [____] to patients in [All Counties ▼] County.

☐ Vaccinations that were entered into ImmuNet from [All Vaccine Sources ▼] From: [____] 📅 To: [____] 📅 for [All Counties ▼] County.

☐ Total number of patients: Age [____] Days ▼ through Age [____] Days ▼ with at least [1 ▼] immunizations in [All Counties ▼] County.

☐ Total number of patients: Age [____] Days ▼ through Age [____] Days ▼ who have completed the 4:3:1:3:3:1:4 series in [All Counties ▼] County.

☐ Total Number of active users.

☐ Total number of new users added From: [____] 📅 To: [____] 📅

☐ Total number of active orgs.

☐ Total number of new orgs added From: [____] 📅 To: [____] 📅

☐ Total number of orgs that have ever performed manual data entry into ImmuNet.

☐ Total number of orgs that performed manual data entry From: [____] 📅 To: [____] 📅

☐ Total number of new orgs that performed manual data entry From: [____] 📅 To: [____] 📅
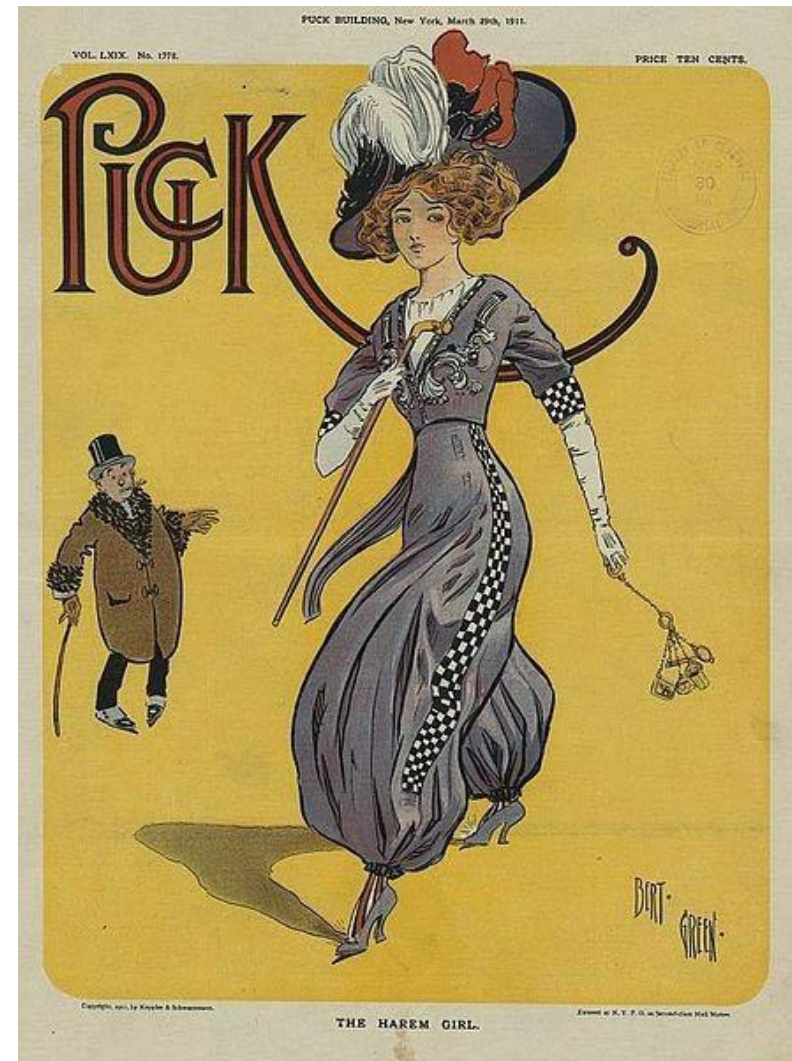

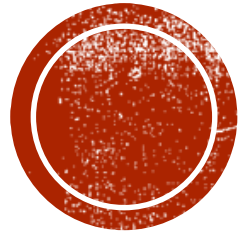

AND A GIFT – KIND OF

- Immunization generator tool to help in testing.
  - Ability to create large random data sets with immunizations
  - Easily moved into an HL7 file format
  - Excel based
  - Patient/Immunization/Comments setup using relative dates
    (2 year old, DTaP at 2 months) or specific dates

THE BLOOMER COSTUME.

FROM BLOOMER TO PANTSUIT

- Ask your peers what tricks they have for making their day to day job easier.

- Share with the community items you consider to be timesavers. (SnapShots is a great place to share.

- Ask your help desk what are the biggest pains.

- Think outside of the box, sometimes a simple script is as powerful as a fancy report.

THANK YOU!
