

One-Sheet Resources

What are one-sheet resources?

AIRA has developed a series of one-sheet resources to communicate the role and value of immunization information systems (IIS) for use by the IIS community. The resources include fact sheets and infographics that provide information on the key features of IIS, how an IIS makes the community stronger, and more.

Titles of the resources are:

- 4 Ways AIRA Supports the IIS Community
- EHR and IIS (Infographic)
- How IIS Support a Patient's Journey (Infographic)
- Value of IIS (Infographic)
- Why a National IIS Doesn't Exist

Who should use these resources?

- IIS managers and staff
- Immunization program managers
- Health department leadership and employees, including other IIS and immunization program staff
- Industry partners (IIS vendors, EHR vendors, etc.)
- Non-profit partners (AIM, ASTHO, PHII, coalitions, etc.)
- IIS users and stakeholders (healthcare providers, health departments, pharmacies, schools, coalitions, etc.)

Can I add my logo to these resources?

The short answer is, yes. Stay tuned for further information and instructions. But no need to wait to use the resources – they're ready to go as is!

Will more one-sheets be released?

We currently have more one-sheets in the pipeline. If there's a burning topic that isn't covered by these resources, let us know! You can email suggested topics to info@immregistries.org.
