Next Steps

- AIRA will conduct data quality checks on the file and then produce reports.
- You will be notified by email once the reports are generated.

When all else fails...

Submit a DAR
technical assistance
request at:
<https://www.immregistries.org/request-technical-assistance>

The screenshot shows the website [immregistries.org/request-technical-assistance](https://www.immregistries.org/request-technical-assistance). The header features the AIRA logo (American Immunization Registry Association) and a 'Member Login' button. A navigation bar includes links for Home, About AIRA, Workgroups, Ongoing Efforts, Events, Repository, and Members. The main content area is titled 'Request Technical Assistance' and contains a form titled 'AIRA Technical Assistance Requests'. The form text states: 'AIRA offers technical assistance on a wide range of IIS topics, including new services specific to onboarding, in collaboration with Centers for Disease Control and Prevention (CDC) and other partners.' Below this is a 'Category of Request' dropdown menu. The dropdown is open, showing a search bar and a list of options: '-Select-', 'AART Access', 'Data Quality/Data Use', and 'Data at Rest (DAR)'. The 'Data at Rest (DAR)' option is highlighted in green.
