AMERICAN IMMUNIZATION
REGISTRY ASSOCIATION

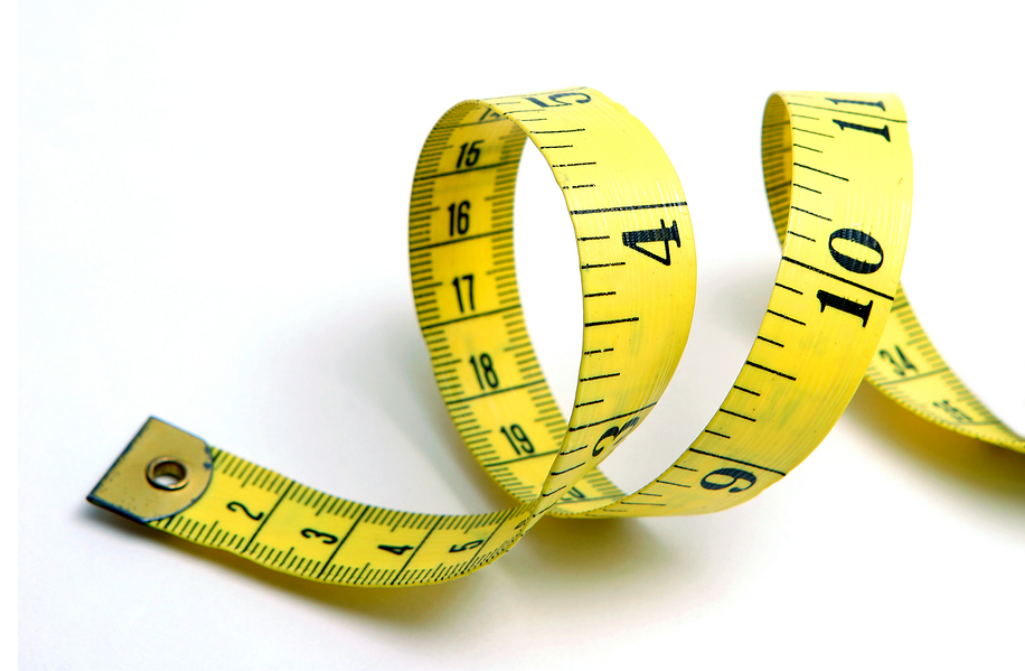

AART User Group Mini-Series

June 24, 2020

4:00 PM ET

Agenda

- Welcome to Session 5!
- Goals of the AART Mini-Series
- Validation
- Future Areas to Be Tested
- Improving ACK Messages

Goals

1) Increase the use of AART to:

- ✓ identify areas for improvement,
- ✓ prioritize IIS enhancements,
- ✓ test new IIS functionality,
- ✓ and reflect on accomplishments.

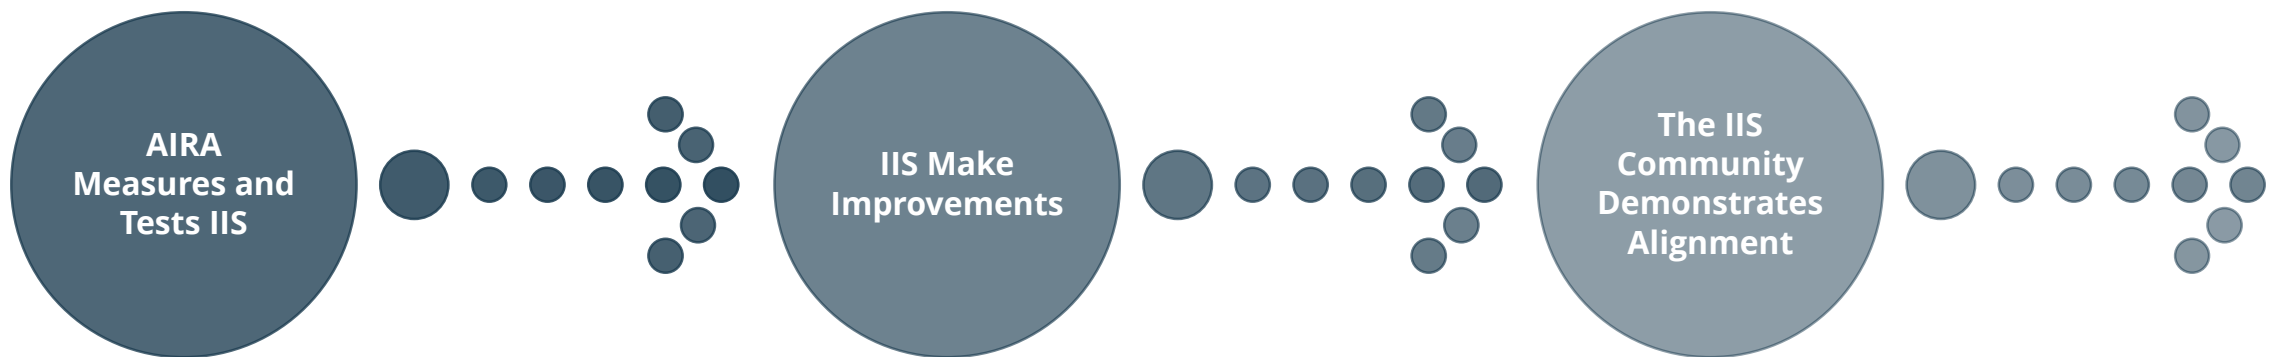

2) Support your use of AART by convening a group of engaged users to share and learn from one another

Measurement and Improvement Initiative – What Is it?

- The IIS Measurement and Improvement (M&I) Initiative began in 2015 as an effort to:
 - Test IIS alignment with standards
 - Provide IIS with information and assistance to improve

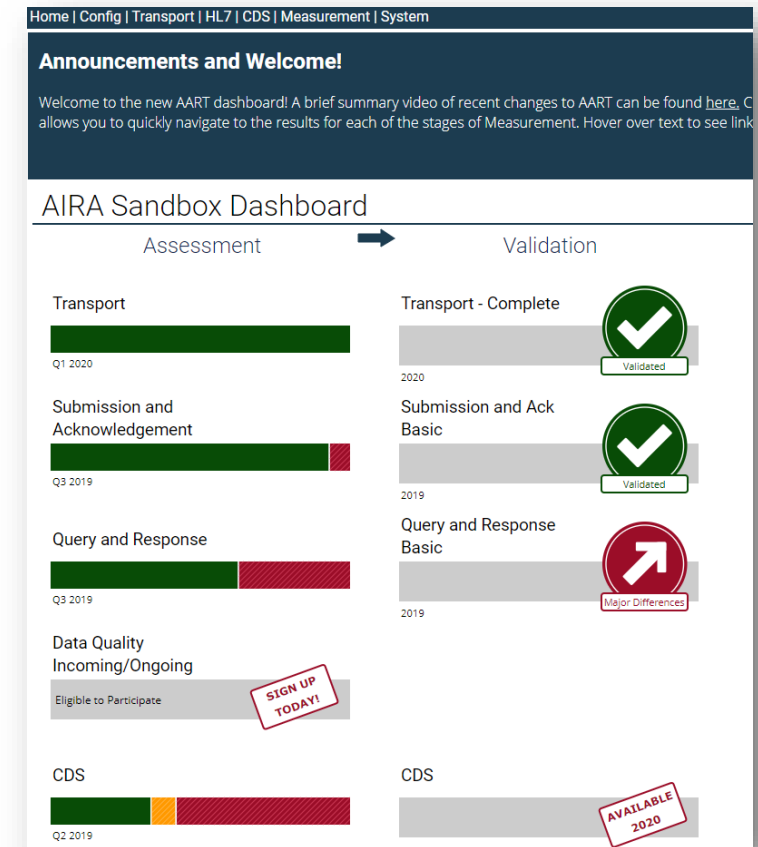

So What is AART?

AART is... the Aggregate Analysis Reporting Tool

AART was developed to visualize and compile the testing results and information on **prioritized** community-driven measures and tests related to Functional Standards

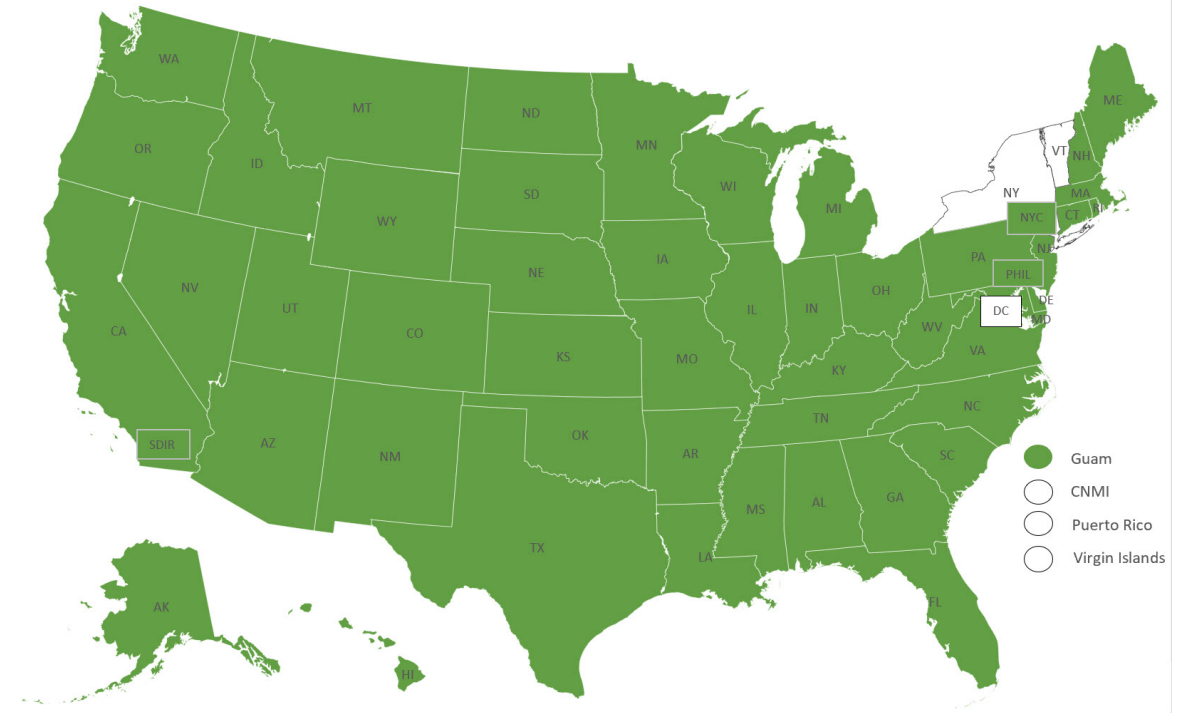

Did you know...

1. AART has been testing with IIS since 2015
2. There are over 6 million test cases in AART
3. You can view test results for your peer IIS at the content area level, and at the test case level

Thank You For Engaging With Us!

- Participation is strong and results are being reviewed and acted upon
- Partners are publicly recognizing improvements in standardization across IIS
- We are seeing progress in all areas of quarterly measurement

AART Clinics

- Once a year, in-person, @ AIRA National Meeting
 - National Meeting planned for Portland Oregon in August 2020 has been postponed until August 3-5, 2021
 - Working to schedule virtual meetings in the fall
- Request a clinic or follow up clinic anytime!

Announcements and Welcome!

Welcome to the new AART dashboard! A brief summary video of recent changes to AART can be found [here](#). Click [here](#) for more details. The dashboard below allows you to quickly navigate to the results for each of the stages of Measurement. Hover over text to see links to results below.

Major Differences

AART User Group Mini-Series

Session 1: Introduction to Series, polling for future topics **Completed**

Session 2: HL7 Discovery & Assessment Reports **Completed**

Session 3: Clinical Decision Support **Completed**

Session 4: User Experience – HL7 Assessment **Completed**

Session 5: Validation and Future Areas To Be Tested **Today!**

Session 6: User Experience – Clinical Decision Support

AART Registration

- AART login page
- Register here
 - You can also reset your password on this page
- AART Updates

Reminder! If you haven't registered yet you can do that today!

AART - Home

app.immregistries.org/aart/home

Aggregate Analysis Reporting Tool (AART)

Login

Email Address

Password

Do you need to register?

Registration is open for all Immunization Information System (IIS) staff, IIS vendors, EHR vendors who submit data to IIS and other IIS community members.

Did you forget your password?

We can send you a new password right away.

AART Updates: December 2019

Updates to AART reports, tests, and software can be found here.

Validation

Future Areas to Be Tested

Future Areas to Be Tested

- Assessment
 - Data Quality – Incoming/Ongoing Data Submission
 - Data Quality – Data at Rest
- Discovery
 - HL7 – CDC Code Set Changes
 - HL7 – CDC Endorsed Data Elements

Data Quality - Incoming/Ongoing

In Incoming/Ongoing Data we are ensuring that IIS can detect if trading partners (e.g., EHRs, pharmacies, etc.) are sending poor data

The Incoming and Ongoing Data Content Area Isn't Entirely New...

Data Quality - Incoming/Ongoing

- In Scope

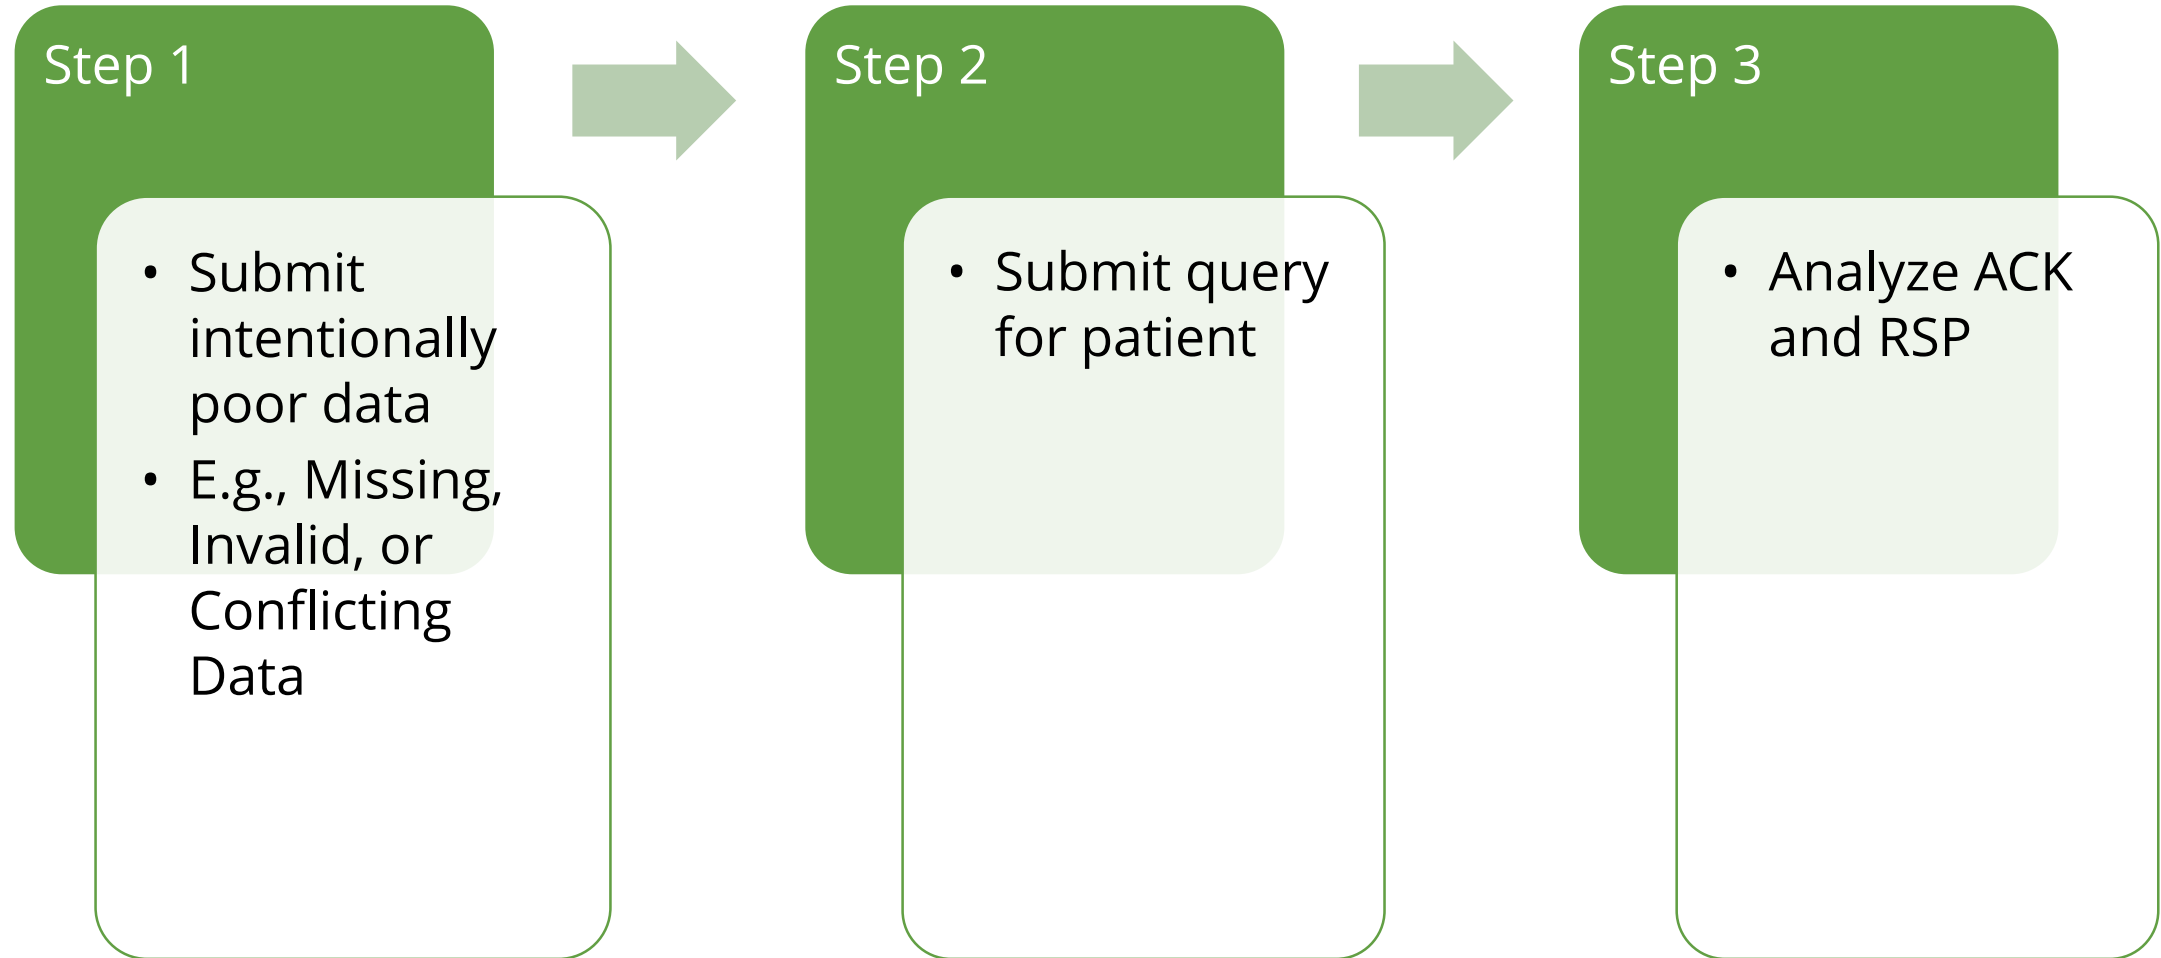

- The IIS's ability to detect data quality issues on a per message basis
- The IIS's ability to retain and return vaccination events from submission to query without changing the meaning

- Out of Scope

- Data quality monitoring of multiple messages (e.g., percentage of records submitted with phone number)
- Patient or vaccine matching/deduplication algorithms
- Address hygiene/cleansing

Measuring Data Element Data Quality

Data Element Data Quality Issues

- **Missing data:** These tests intentionally omit a data element and submit the record to the IIS.
 - e.g., The IIS detects the first name is empty
- **Invalid data:** These tests intentionally submit an illogical value and submit the record to the IIS.
 - e.g., The IIS detects the phone number has an invalid value of “no phone”
- **Conflicting data:** These tests intentionally submit HL7 messages per the HL7 Implementation guide, but the data within the message is illogical when compared against other data elements
 - e.g., The IIS detects the vaccination date is before the birth date

Patient Demographic Data Elements

- Patient name: first
- Patient name: last
- Patient date of birth
- Patient gender
- Patient ID
- Patient ID type
- Race
- Ethnicity
- Patient multiple birth indicator
- Patient birth order
- Patient address: zip code
- Patient address: state
- Patient address: country
- Patient telephone number
- Patient telephone number type
- Patient status indicator – provider level
- Responsible person name: first
- Responsible person name: last
- Responsible person relationship to patient

Vaccination Event Data Elements

- Vaccination administration date
- Vaccine product
- Vaccine manufacturer
- Vaccination event record type
- Vaccine expiration date
- Vaccine funding source
- Dose level eligibility
- Vaccine event ID
- Contraindications/precautions
- Contraindication/precaution observation date
- Exemptions/refusals
- Exemption/refusal date

Additional Aspects of Data Quality

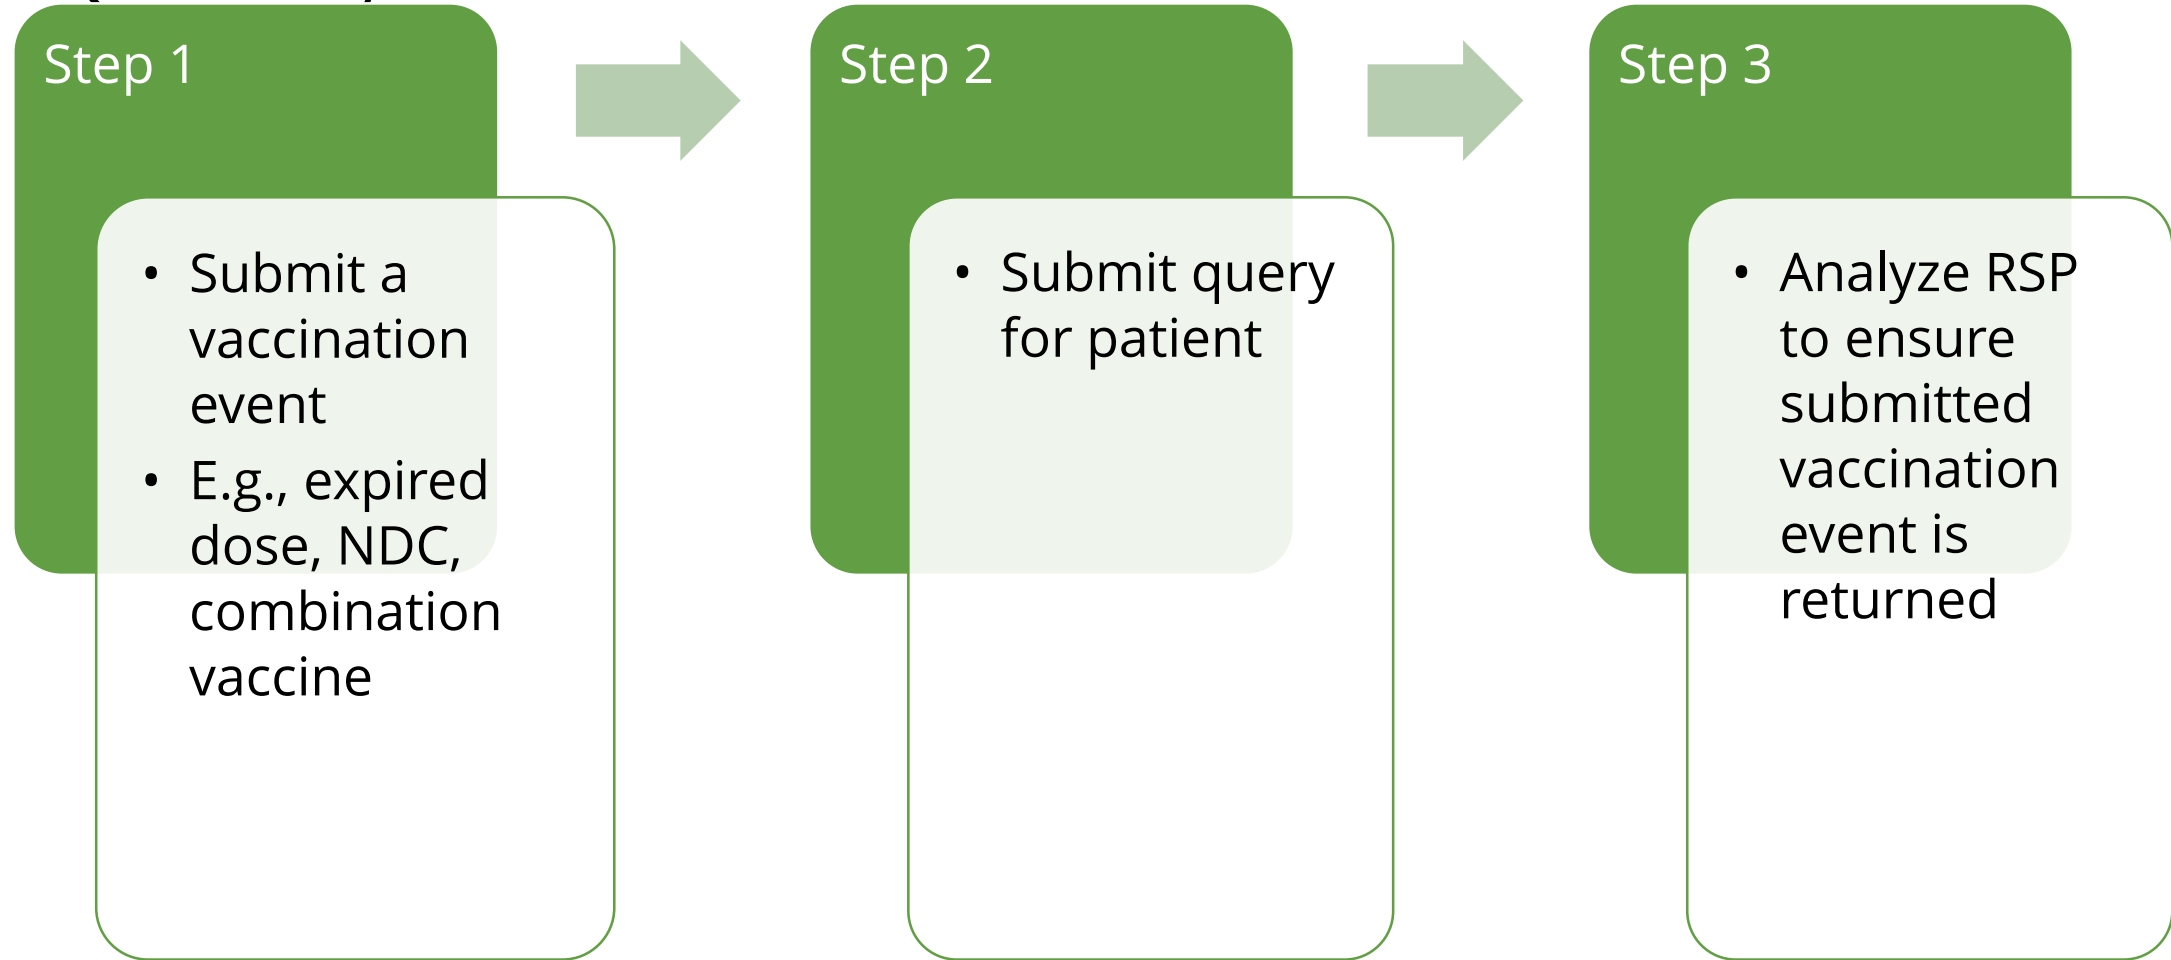

Example Measure

- The IIS returns critical information about a previously submitted vaccination event.

Test Case	Expectation
Submit vaccination event representing an expired dose was administered.	IIS returns the expired administration which includes the expiration date in the RSP.

Measuring Additional Aspects of Data Quality

Additional Aspects

- IIS has the ability to map between coding systems (NDC to CVX)
- IIS returns critical information about a previously submitted vaccination event
- IIS returns the consolidated immunization history following an update

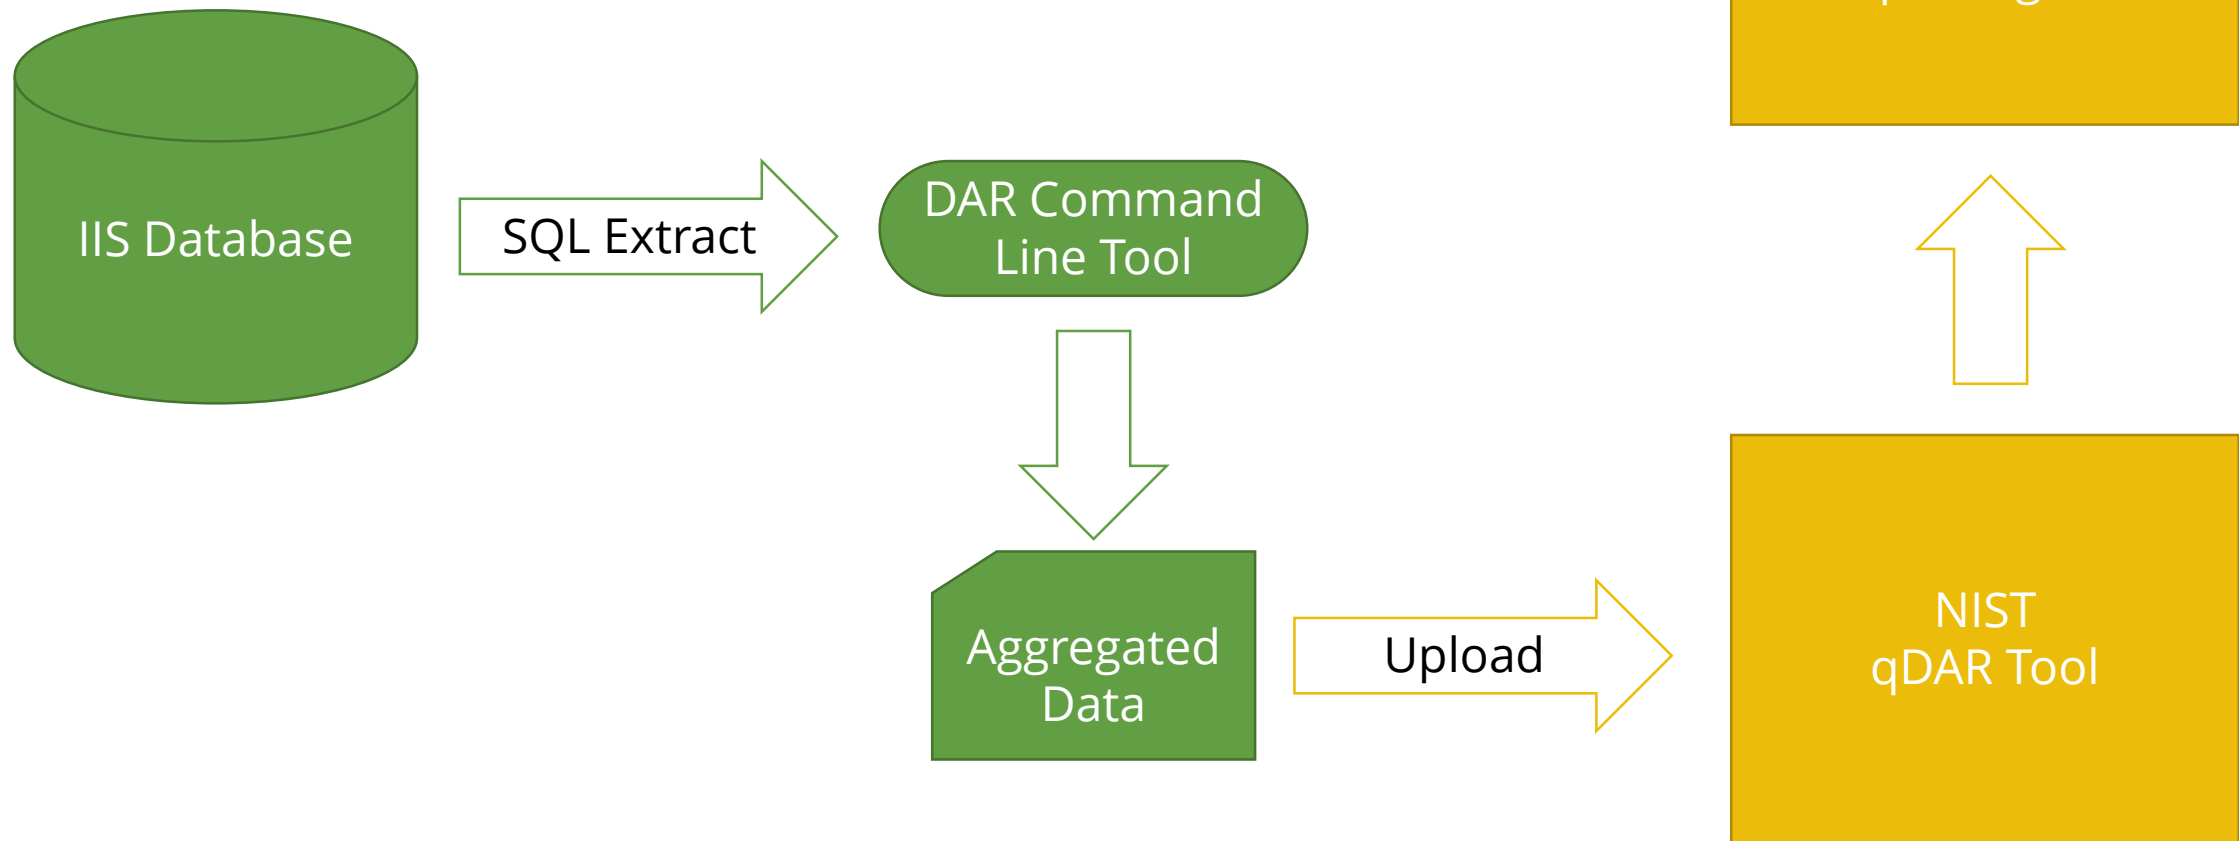

Data at Rest

- The ultimate area to measure
- Challenges:
 - Measuring real data, as it is in the IIS database
 - Identifying data cannot be sent to AIRA or AART
 - Support multiple analysis of the underlying data
 - By age of patient
 - By type of vaccination
 - By which provider reported the data
 - Provide actionable data back to IIS

Data at Rest

Data at Rest

- NIST qDAR
 - Under current development by NIST
 - Will be deployed alongside AART
- AART Changes
 - New Discovery and Assessment reports
 - Overall results shown in AART
 - User access directly from AART to qDAR
 - Allow in-depth access to data details
 - Allow exploration of data at provider level

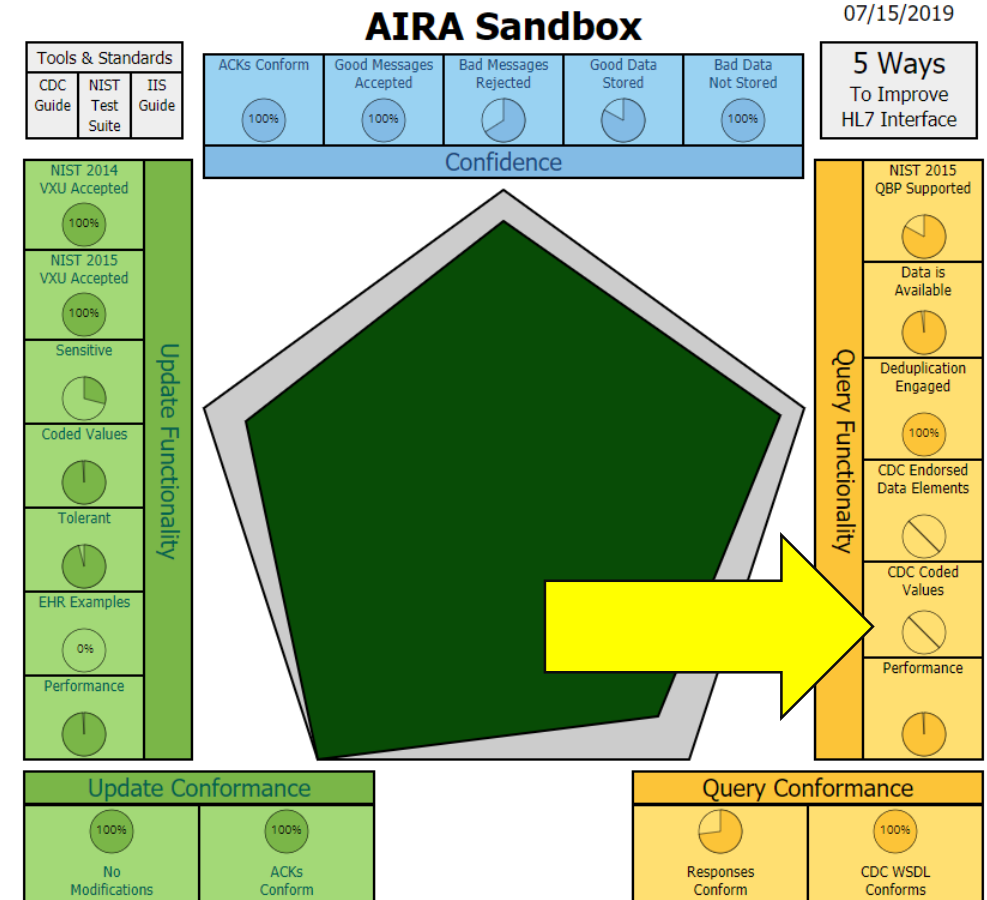

CDC Code Set Changes

- Original Coded Values
 - Test case for every coded value
 - Expects IIS to accept message
 - Bulk of tests in Discovery
 - Does not verify storage
- New Coded Values Tests
 - Discover when IIS applies CDC Code Set changes
 - Changes starting from 2019

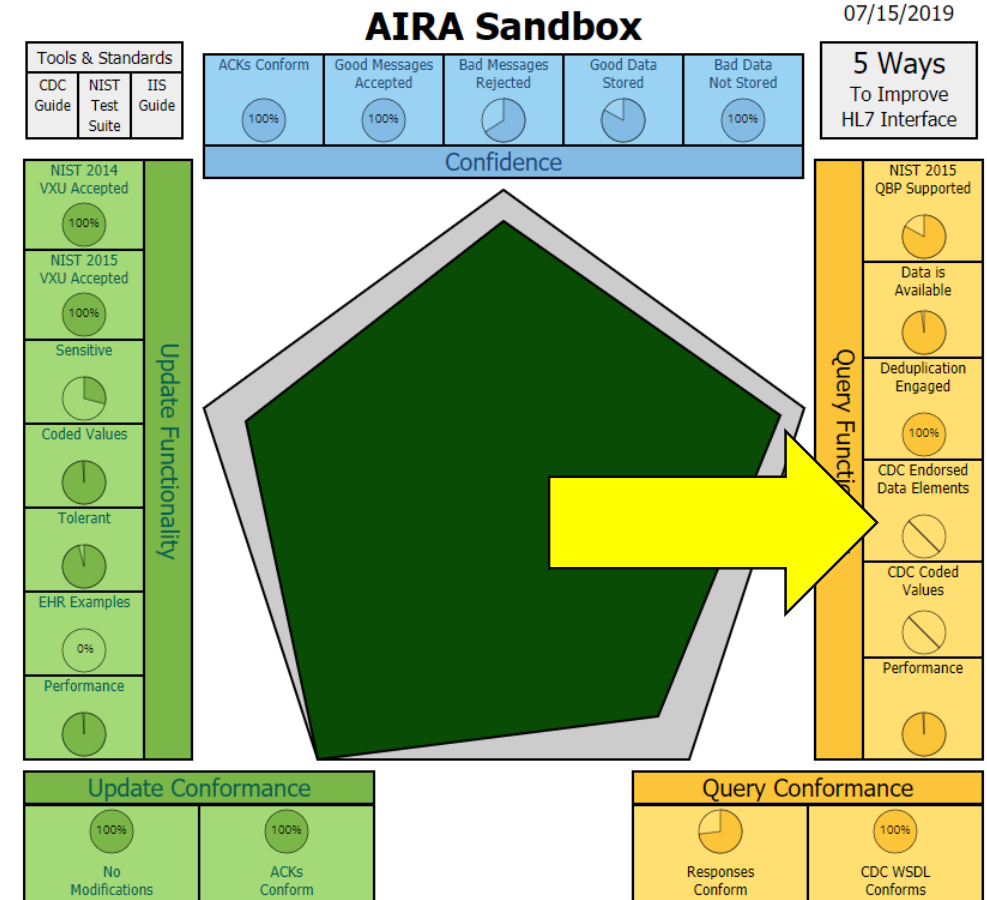

CDC Code Set Changes

- Original Coded Values
 - Test case for every coded value
 - Expects IIS to accept message
 - Bulk of tests in Discovery
 - Does not verify storage
- New Coded Values Tests
 - Discover when IIS applies CDC Code Set changes
 - Changes starting from 2019

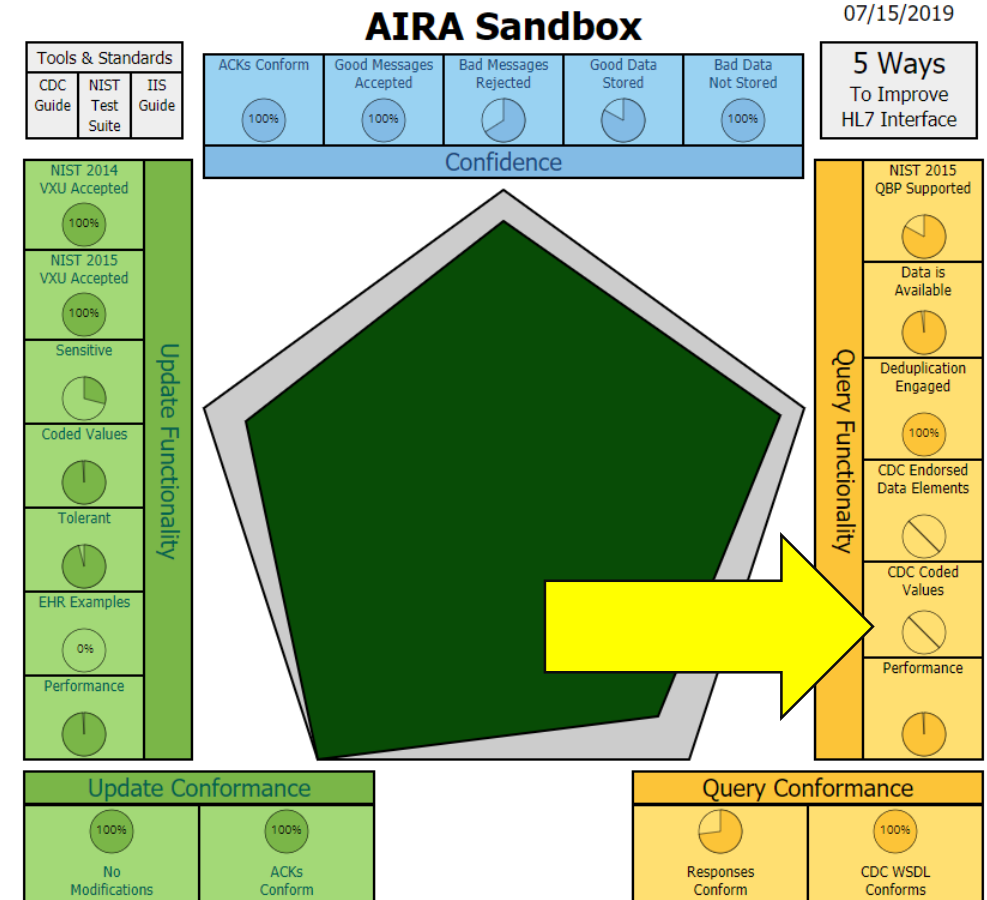

CDC Endorsed Data Elements

- Content cross-over with Data Quality Incoming/Ongoing
- Explores if IIS can:
 - Receive message with data
 - Return data in query response

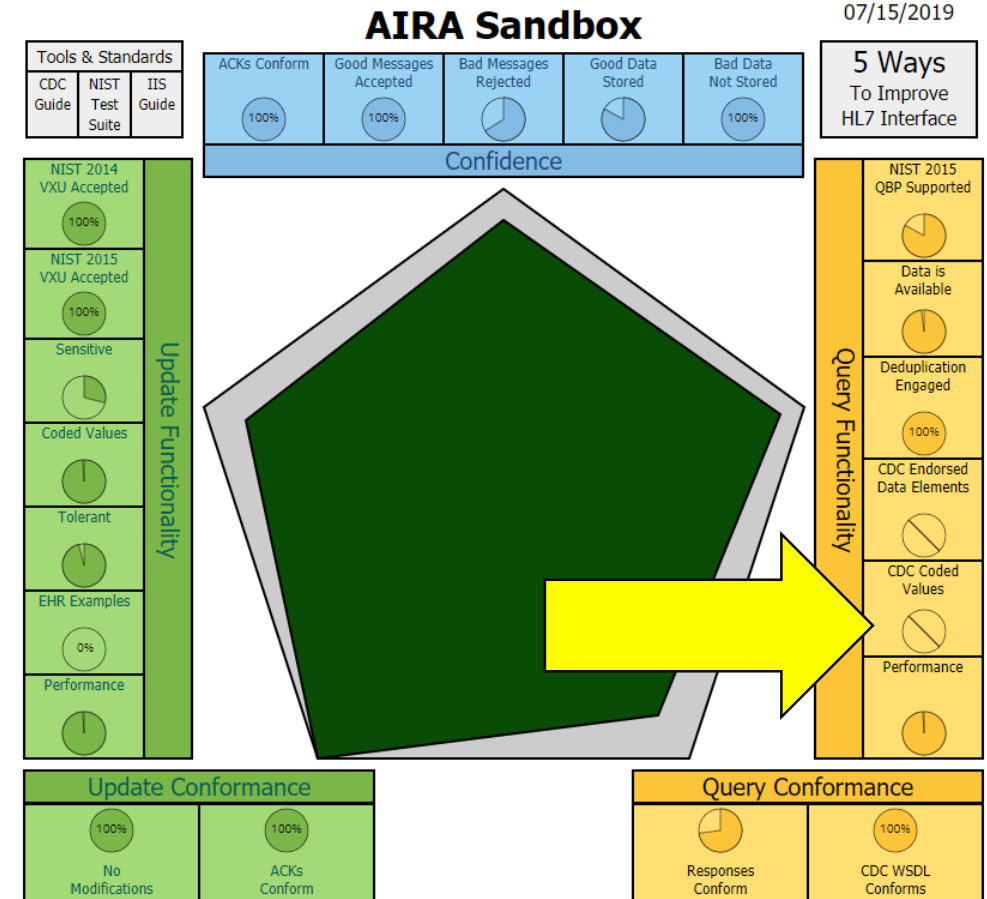

CDC Code Set Changes

- Original Coded Values
 - Test case for every coded value
 - Expects IIS to accept message
 - Bulk of tests in Discovery
 - Does not verify storage
- New Coded Values Tests
 - Discover when IIS applies CDC Code Set changes
 - Changes starting from 2019

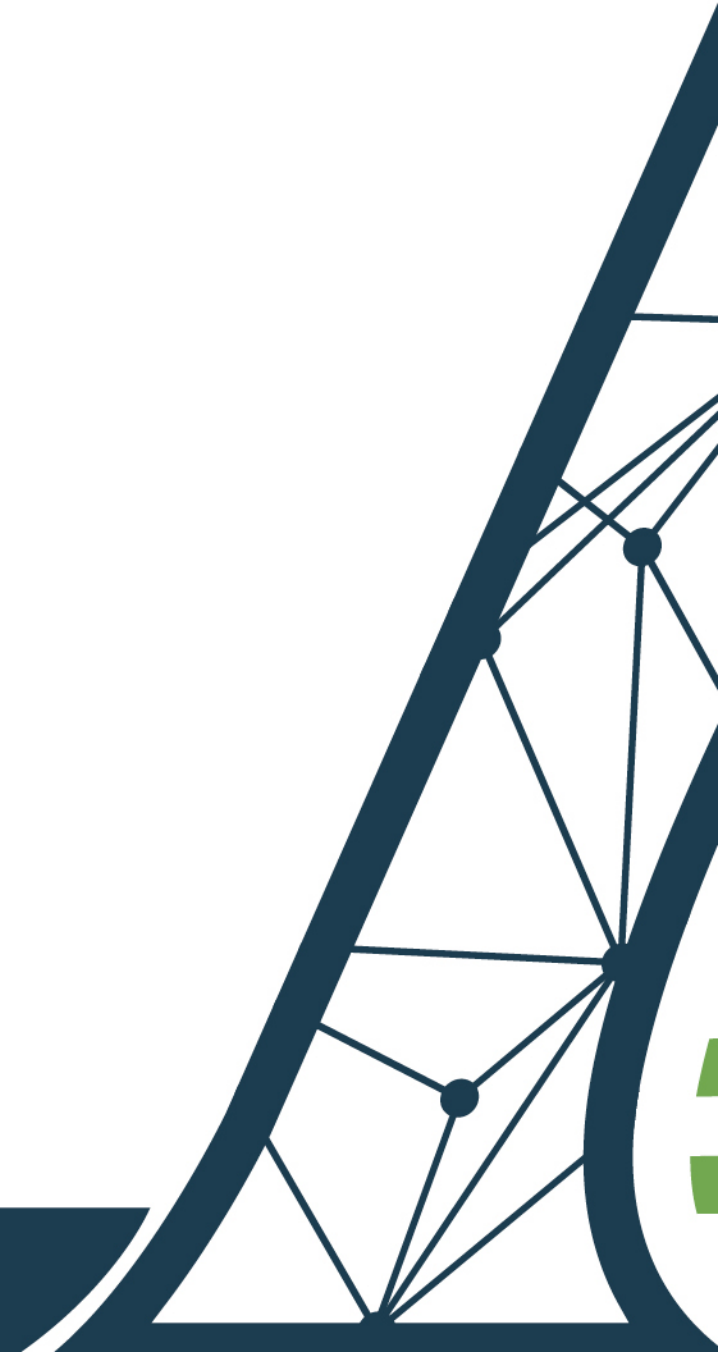

CDC Code Set Changes

- New Coded Value Tests
 - IIS accepts code
 - IIS returns code in query response
 - Vaccine Deduplication supports code
 - CDS supports code

ACK Messages

Grammar Saves Lives

- In human communication:
 - Diminishes appearance of competency
 - Indicates a lack of attention to detail or level of seriousness
 - Can lead to confusion
- In computer communication:
 - May require additional work
 - Reduces usability of information

Grammar Saves Lives

- HL7 responses are the only visible part of the IIS for most users
- We expect our submitters to follow our published standards
- COVID-19 is shining a spot light on our current gaps

ACK Resources

- NIST Tooling: <https://hl7v2-iz-r1.5-testing.nist.gov/iztool/#/cf>
- HL7 Guide:
