COVID-19: Resource Repository

Repository of Resources for Maintaining Immunization during the COVID-19 Pandemic

This repository of resources is intended for use by healthcare settings, state and local health departments, professional societies, immunization coalitions, advocacy groups, and communities in their efforts to maintain immunization rates during the COVID-19 pandemic. The repository includes links to international, national, and state-level policies and guidance and advocacy materials, including talking points, webinars, press releases, media articles, and social media posts, as well as telehealth resources. The materials listed below can be sorted and searched by date, title, geographic area, source, type, category, or setting.

This repository will grow with your help. If you know of national, state, or local guidance documents or other resources that should be added, please send a message to info@immunizationcoalitions.org.

COVID-19 and Routine Vaccination

What does CDC advise about routine immunization services during the COVID-19 pandemic?

CDC is clear: Routine vaccination is an essential preventive care service for children, adolescents, and adults (including pregnant women) that should not be delayed because of the COVID-19 pandemic.

The complete CDC Interim Guidance for Immunization Services During the COVID-19 Pandemic is at this link: www.cdc.gov/vaccines/pandemic-guidance/index.html.

What does CDC advise about administering recommended immunizations to children and teens when COVID-19 is circulating?

It is important to assess the vaccination status of all children and adolescents at each patient visit to avoid missed opportunities for vaccination and ensure timely vaccine catch-up. All vaccines due or overdue should be administered according to the recommended CDC immunization schedules during that visit, unless a specific contraindication exists, to provide protection as soon as possible and minimize the number of healthcare visits needed to complete vaccination.

Due to COVID-19 in my community, many children in my practice missed well-child visits or were seen only on a telemedicine visit and need to be caught up on recommended vaccinations. How do we tackle this problem?

Begin by identifying children who have missed well-child visits and/or recommended vaccinations and contact them to schedule in person appointments. Consider months, young children and extending through adolescents.

- Use a reminder/recall system or other vaccination information system (IIS) or electronic health record to identify and notify children in need of catch-up vaccination
- Assess immunization status at every visit and provide all vaccinations due or overdue
- Consider standing orders to simplify the process of vaccination. Templates are available here: www.immunize.org/standing-orders
- Follow the CDC catch-up schedule to get children up to date on vaccination as efficiently as possible: www.cdc.gov/vaccines/schedules/hcp/imz/catchup.html#guidance

Vaccination and COVID-19

Vaccination and COVID-19

During the COVID-19 pandemic, healthcare professionals face challenges providing recommended, catch-up, and, in some cases, new or expanded vaccination services to children, teens and adults. IAC has assembled key resources and links to support safe, effective vaccination at all ages in routine and non-traditional vaccination settings. In addition, we provide links to key COVID-19 resource pages from clinical and public health partners involved in immunization. To view additional helpful materials, be sure to visit our [COVID-19 Resource Repository](#).

Mass Vaccination Resources

Resources for Developing Mass Vaccination Clinics

Mass vaccination clinics involve the administration of vaccine(s) to a large number of people over a relatively short period of time, allowing providers to rapidly and efficiently immunize communities. Due to the unique nature of mass vaccination clinics, they frequently are held in non-traditional or temporary settings, such as in parking lots or large indoor spaces. Patient flow may be managed through a variety of venues, such as walk-through, drive-through, and curbside clinics, or by using mobile medical units.

This listing from the [Immunization Action Coalition](#) offers access to guidance documents, toolkits, and other helpful resources, produced over a span of many years, and to information that can be adapted to meet the needs of your mass vaccination program and planned clinic locations. Please keep in mind that many of the guidance documents listed below were created in the past and will need to be modified to ensure additional protections are implemented (e.g., social distancing and wearing protective equipment such as masks, face shields, goggles, and gloves, where appropriate) to safeguard staff and patients from COVID-19.

Are you aware of additional resources or guidance documents that should be considered for inclusion in this listing? Please send information about additional resources to Info@mass-vaccination-resources.org.

Upcoming Resources

New documents are added to the ISD SharePoint *COVID-19 – IIS Resources* folder as they are approved. Web pages are in development to make certain resources about COVID-19 vaccine monitoring and assessment available to broader audiences.

Upcoming Resources include:

- Overview of Privacy Preserving Record Linkage (PPRL) Technology
- IT Architecture Overview
- VAMS Q&A
- DUA Overview and Guidance
- Data Use Agreement for Reporting Vaccine Data to CDC
- Data Requirements, Dashboard, and Data Lake Q&A
- COVID-19 Vaccine Administration Tracking Solution Guidance
- COVID-19 Vaccine Comprehensive Data Requirements
- Vaccine Tracking Toolkit Materials and Overview
- VAMS Training Materials for all user groups
- Provider Enrollment Overview for Providers
- Provider Enrollment Overview for Jurisdictions

For more information, contact CDC
1-800-CDC-INFO (232-4636)
TTY: 1-888-232-6348 www.cdc.gov
