

AIRA
AMERICAN IMMUNIZATION
REGISTRY ASSOCIATION

Town Hall on Basic and Complete Validation for Data Quality Incoming/Ongoing

July 15, 2021
3:00pm-4:00pm ET

Welcome

All phone lines
are muted

This meeting is being recorded
and will be posted on the
AIRA repository

Technical Support

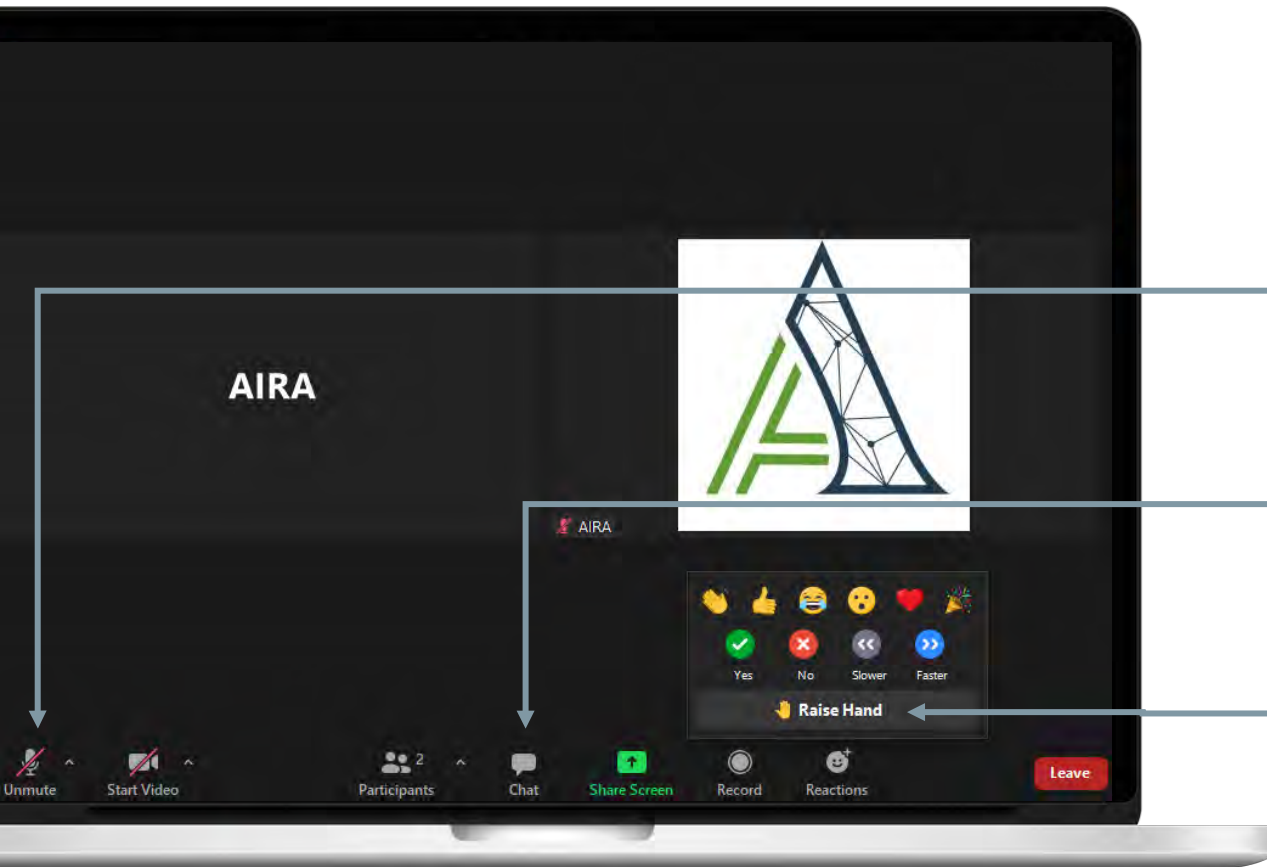

If you experience any technical issues during the meeting, please contact **Rebecca Sandtveit** via direct message in the Chat.

Questions

How do I ask a question?

There will be time allotted for Q&A following each of the updates.

Select the unmute icon and ask your question verbally.

Select the chat icon and type your question into the chat box.

Select the reactions icon, select "Raise Hand," and you will be called on.

Agenda

Welcome – Kevin Snow, Co-Chair, MACAW

M&I Overview – Kevin Snow, Co-Chair, MACAW

Data Quality Incoming/Ongoing Validation – Eric Larson, AIRA

DAR and Provider Participation – Assiatou Diallo, AIRA

Questions/Discussion/Open Forum – All

Wrap Up – Kevin Snow, Co-Chair, MACAW

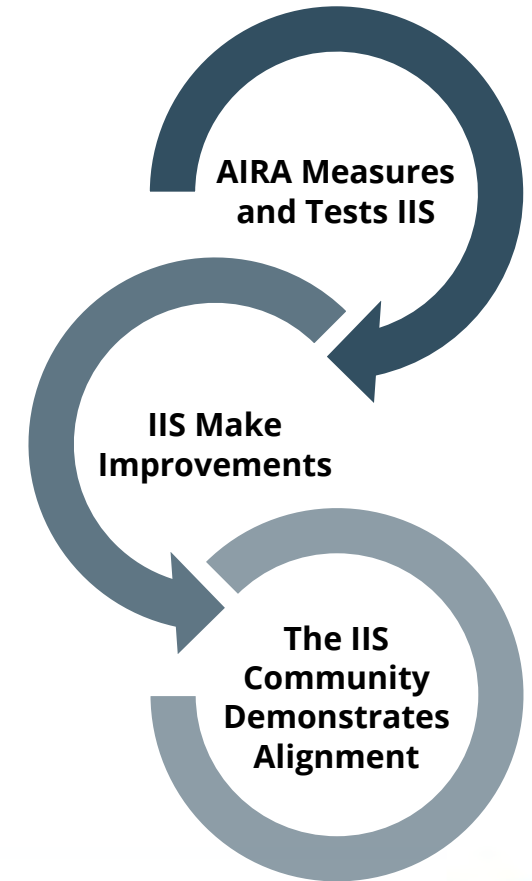

Measurement & Improvement Overview

Kevin Snow, MACAW Co-Chair

Measurement and Improvement Initiative – What is it?

- The IIS Measurement and Improvement (M&I) Initiative began in 2015 in collaboration with CDC as an effort to:
 - Test IIS alignment with standards
 - Provide IIS with information and assistance to improve
- All testing is conducted by AIRA through:
 - Connecting with pre-production systems or analyzing deidentified data

Who is Supporting This Process Along with AIRA?

MACAW

The Measurement for Assessment and Certification Advisory Workgroup, made up of IIS, Immunization Program Managers IIS Vendors and Federal Partners

CDC

Centers for Disease Control and Prevention, our funders, supporters, and collaborators

NIST

National Institute of Standards and Technology, who collaborate with AIRA to develop tooling to support measurement

IIS and Imm Programs

IIS and Immunization Programs do the heavy lifting of analysis, planning, funding and implementation

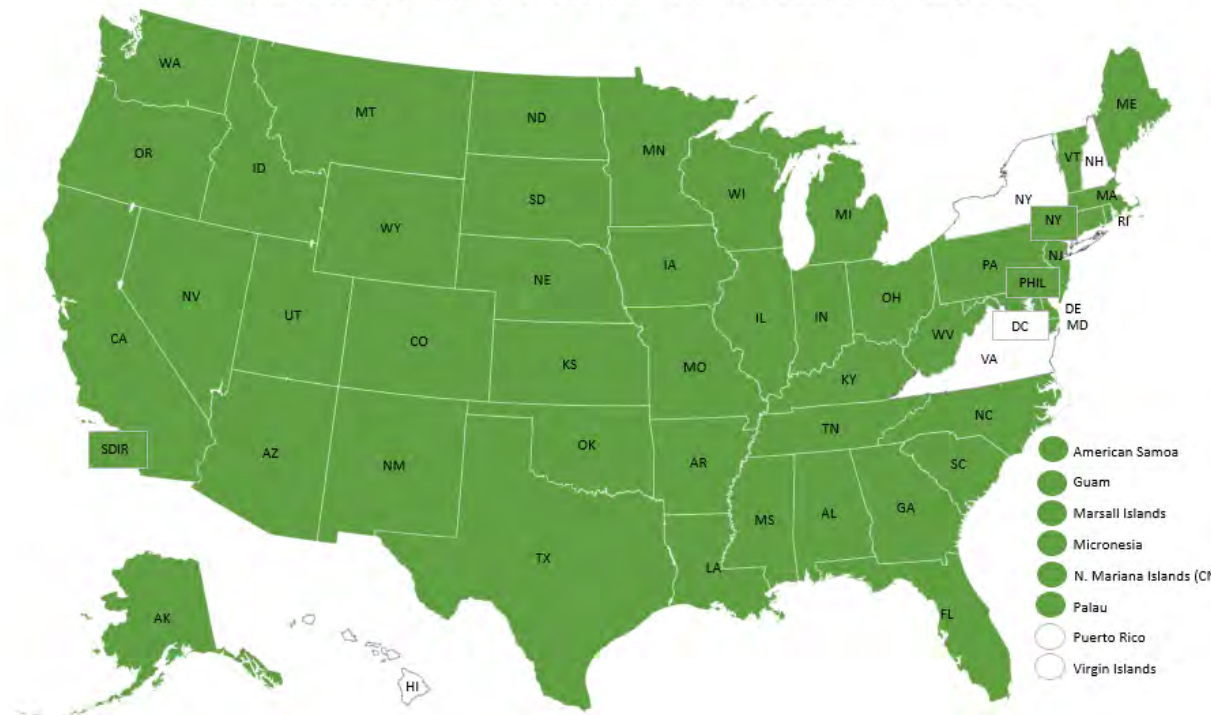

IIS Vendors

IIS Vendors support IIS and Immunization Programs in planning and implementation

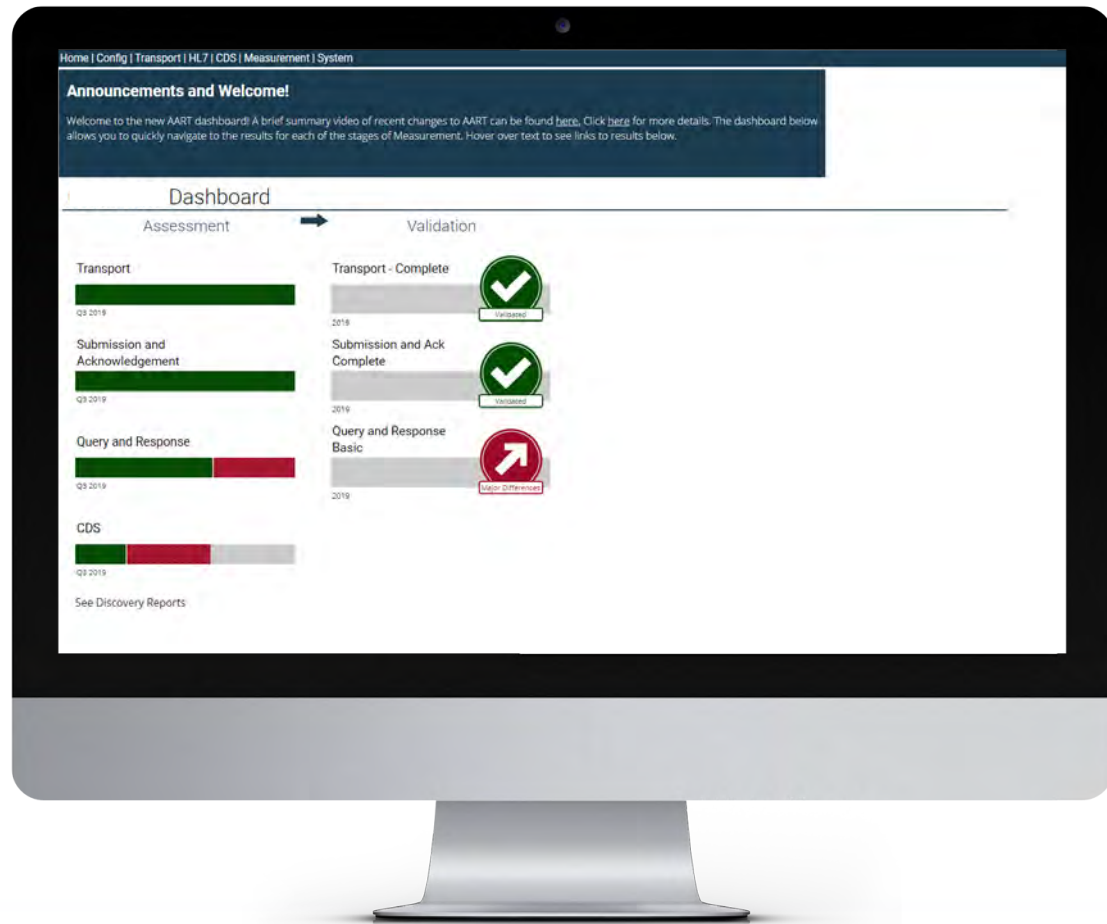

Thank You For Engaging With Us!

Jurisdictions Connected to AART & Measured in the Last 12 Months As of Quarter 1, 2021

- Participation is strong and increasing
- Improvements in standardization across IIS are broadly recognized

The AART Dashboard – Your Gateway To Data

Click to drill down to:

- Measure results and information
- Test case outcomes – expected and actual
- Historical perspectives
- Results from your peers who have shared their data and information

2021

2023

2021

Validation 101

- A summary testing step to acknowledge IIS that are progressing toward or achieving alignment with community-selected measures and tests.
- Some content areas may be broken down into “Basic or Complete” measures.
 - **Basic:** includes essential measures an IIS would be expected to pass to minimally meet a specific content area
 - **Complete:** includes a more comprehensive set of measures for a given area
- Validation is a yearly achievement.

Submission & Acknowledgment Validation (2021)

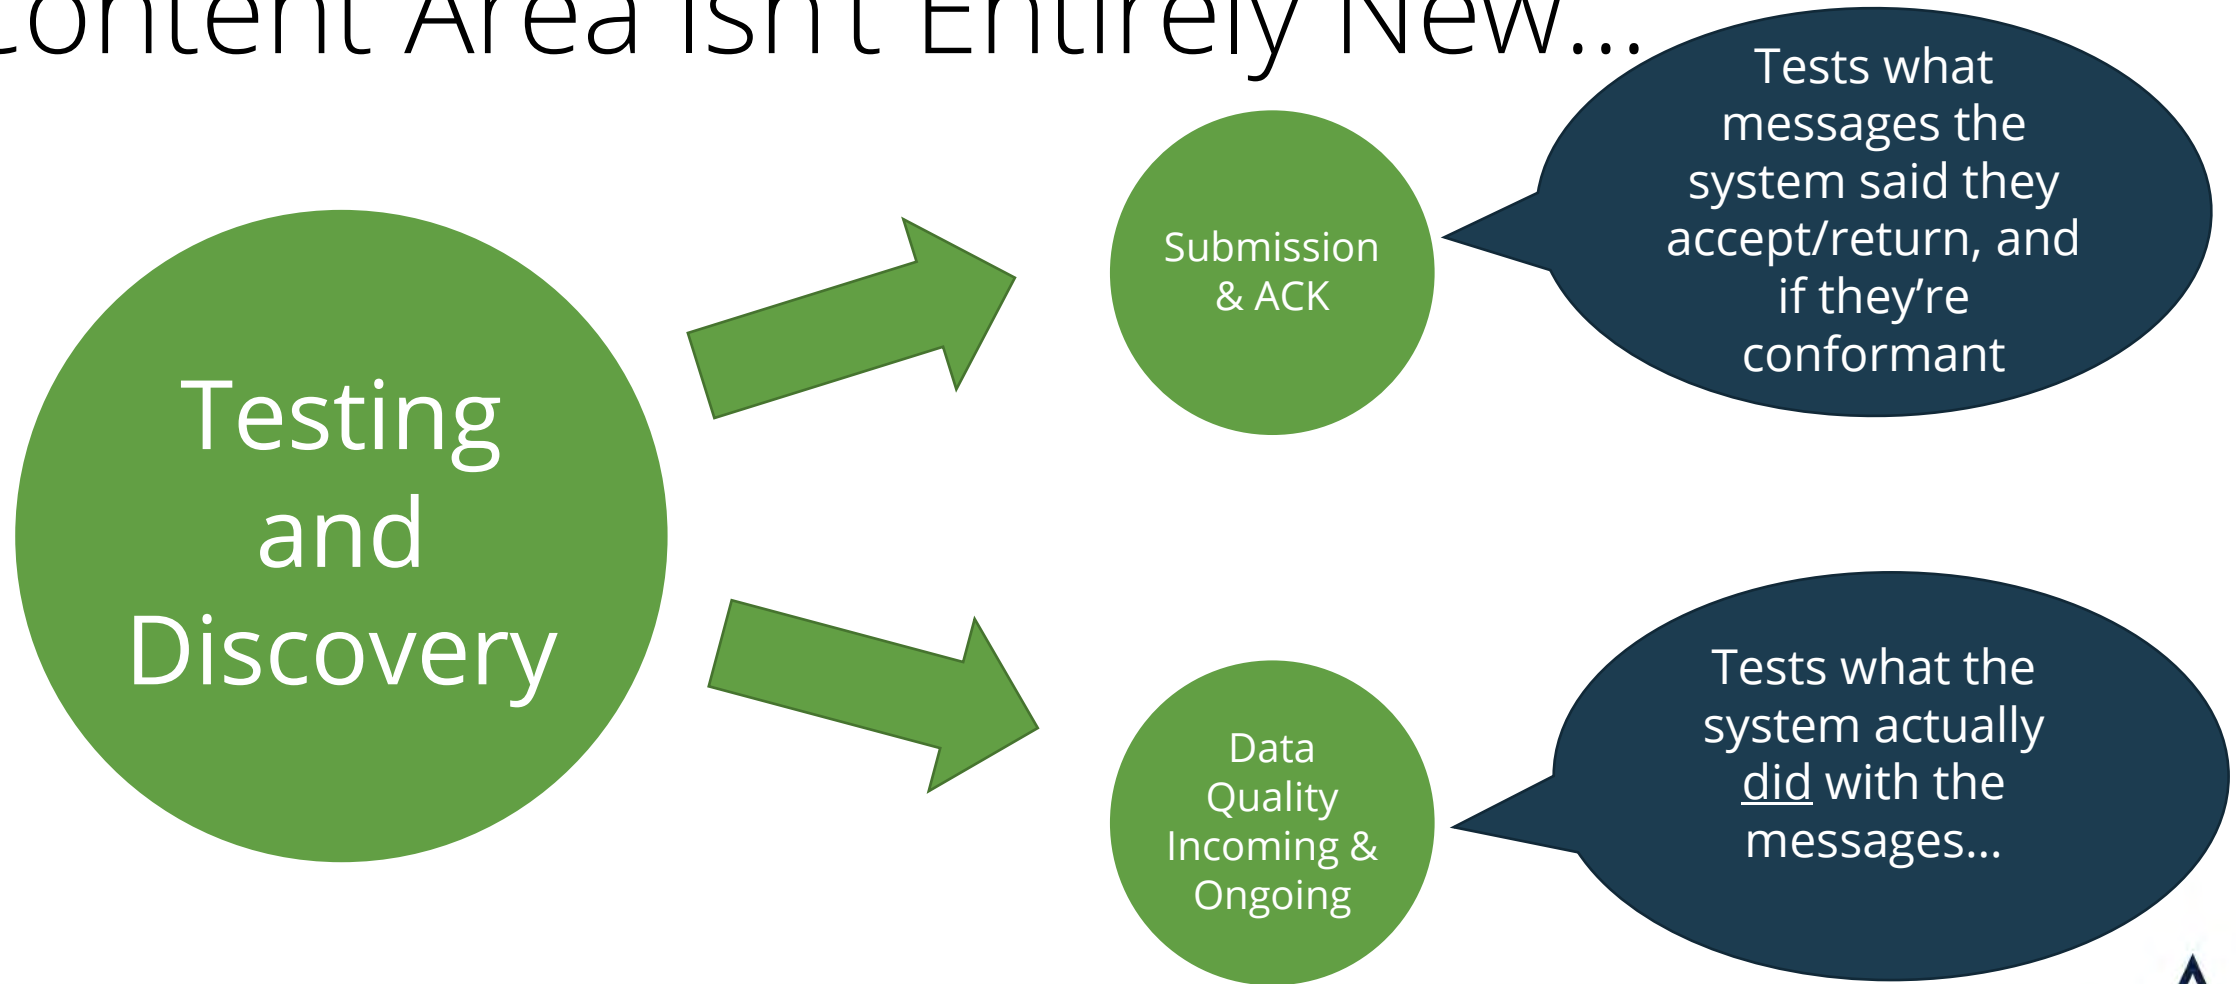

Assessment Measure	Basic Level	Complete Level
1 - The IIS processes an administered vaccine for a patient.	X	X
2 - The IIS processes a historical vaccine for a patient.	X	X
3 - The IIS processes the submission of a full immunization record for a patient.	X	X
4 - The IIS processes an update to a previously submitted vaccination event.	X	X
5 - The IIS processes a delete to a previously submitted vaccination event.	X	X
6 - The IIS processes a submission where the patient does not give consent (i.e., patient data is protected) to share data.	X	X
7 - The IIS processes a refusal of a vaccination.		X
8 - The IIS processes an adverse event.		X
9 - The IIS processes an observation about a patient which results in a contraindication or immunity to a vaccine preventable disease.		X
10 - The IIS processes messages with only minimally required data elements populated per the HL7 2.5.1, release 1.5 guide and addendum.		X
11 - The IIS processes both complete and incomplete/partially administered doses.		X
12 - The IIS responds to a correctly formatted message with no errors.		X
13 - The IIS responds to a submission that has an error.		X
14 - The IIS responds to a submission with an ACK within 5 seconds or less for 95% of the records		X
15 - The IIS processes an administered vaccine using the preferred NDC format.	X	X
16 - The IIS processes an administered vaccine using alternative NDC formats.		X

Data Quality Incoming/Ongoing Refresher

The Data Quality Incoming and Ongoing Content Area Isn't Entirely New...

Data Quality Incoming/Ongoing Scope

- In Scope

- The IIS's ability to detect data quality issues on a per message basis
- The IIS's ability to retain and return vaccination events from submission to query without changing the meaning

- Out of Scope

- Data quality monitoring of multiple messages (e.g., percentage of records submitted with phone number)
- Patient or vaccine matching/deduplication algorithms
- Address hygiene/cleansing

Measure Breakdown

- CDC Endorsed Data Elements
 - 14 Measures for patient demographic data elements
 - 10 Measures for vaccination event data elements
- Additional Aspects of Data Quality
 - 3 Measures to ensure IIS retain and return vaccination events from submission to query without changing the meaning

Data Element Data Quality

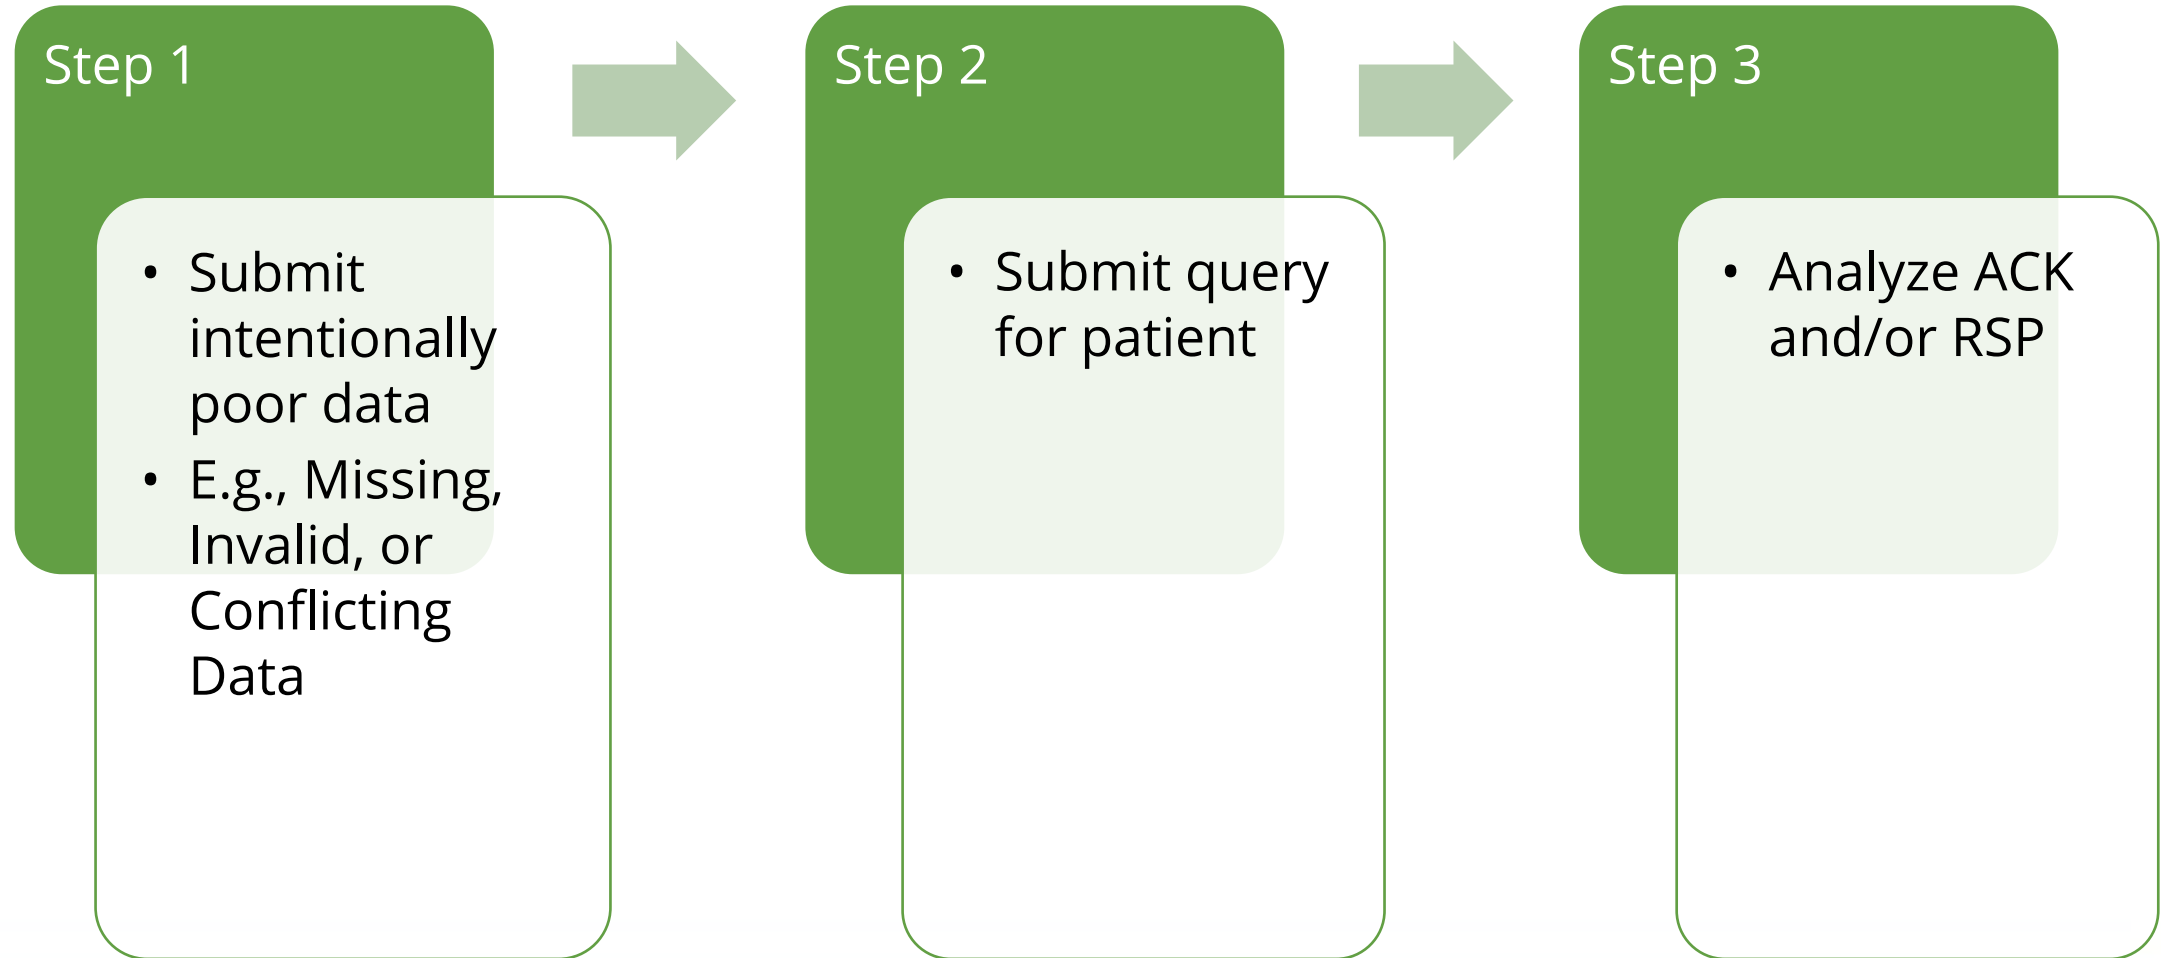

Example Measure

- The IIS detects data quality issues with the date of birth

Test Case	Expectation
DOB is missing	IIS detects data quality issue
DOB is in the future	IIS detects data quality issue
DOB is after vaccination date	IIS detects data quality issue
DOB is invalid (e.g., "yesterday")	IIS detects data quality issue

Measuring Data Element Data Quality

Additional Aspects of Data Quality

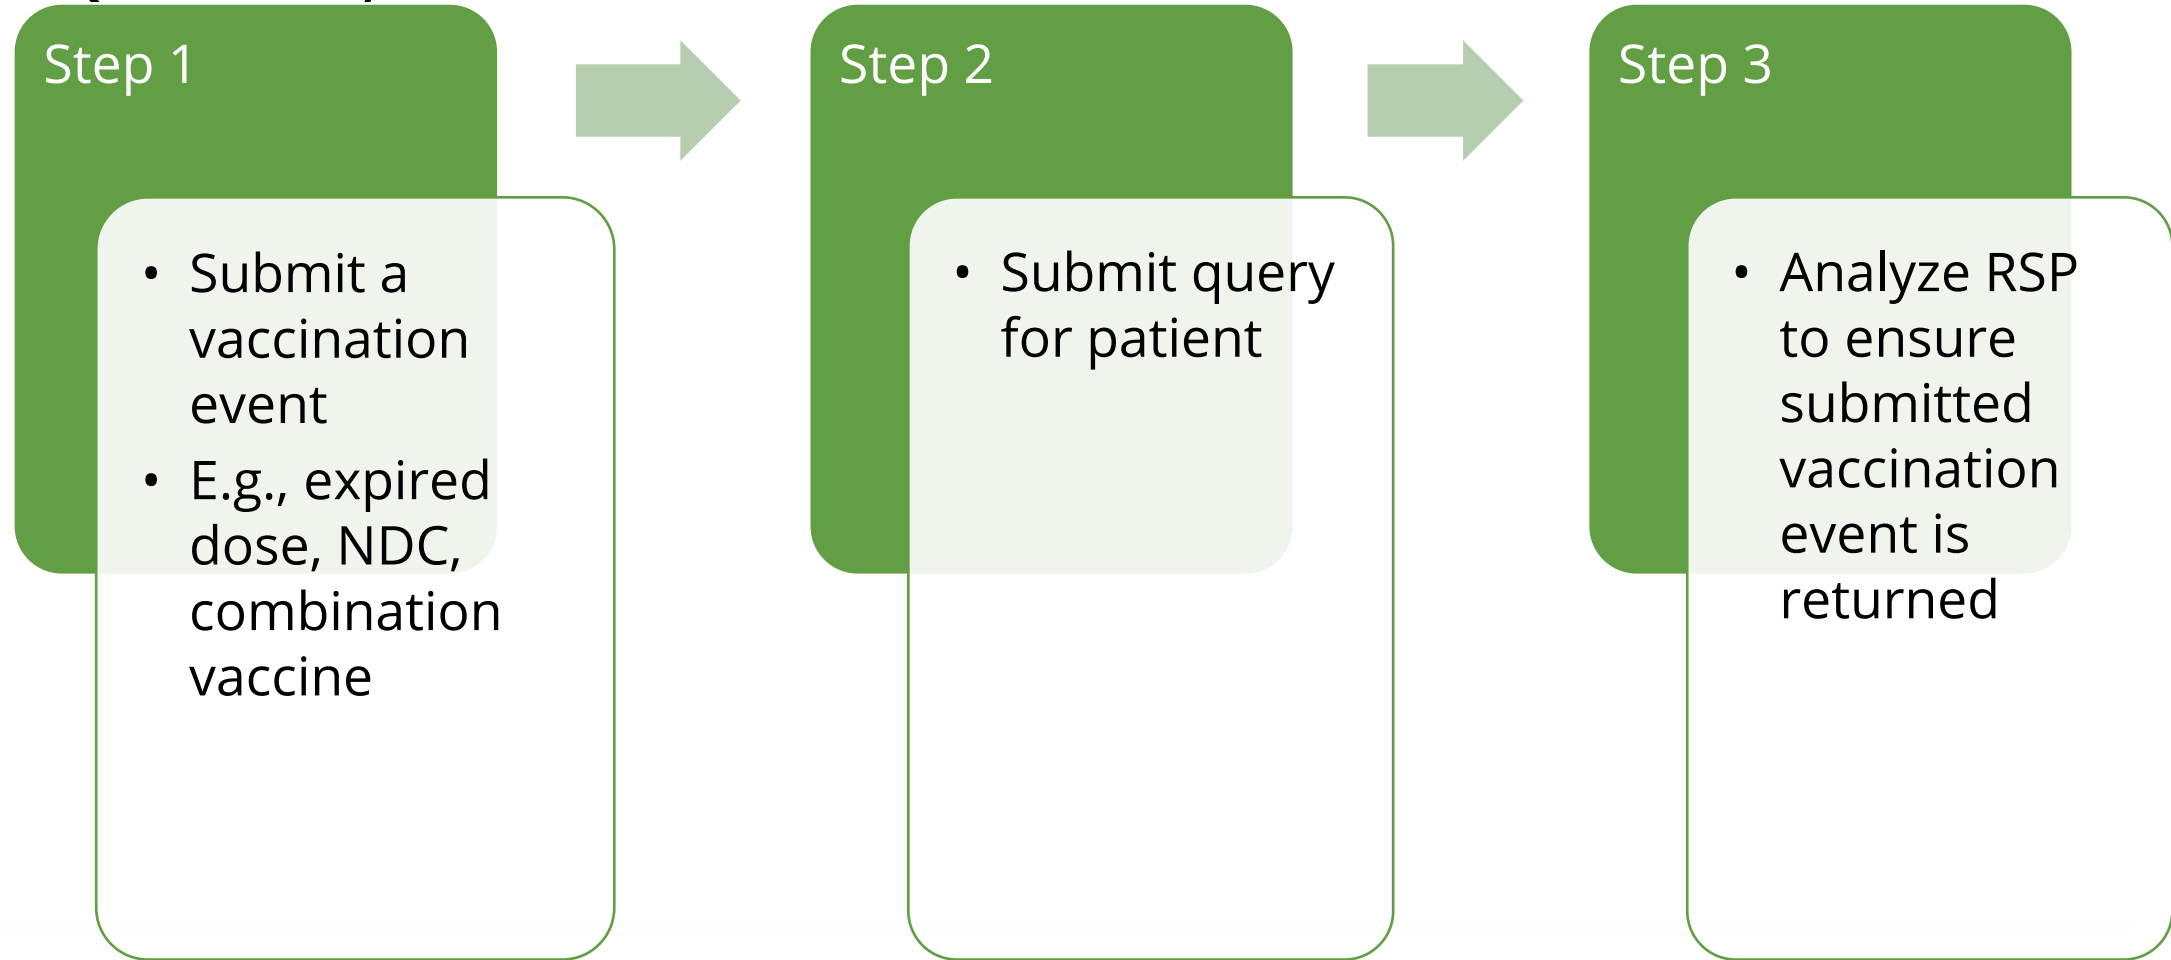

Example Measure

- The IIS returns critical information about a previously submitted vaccination event.

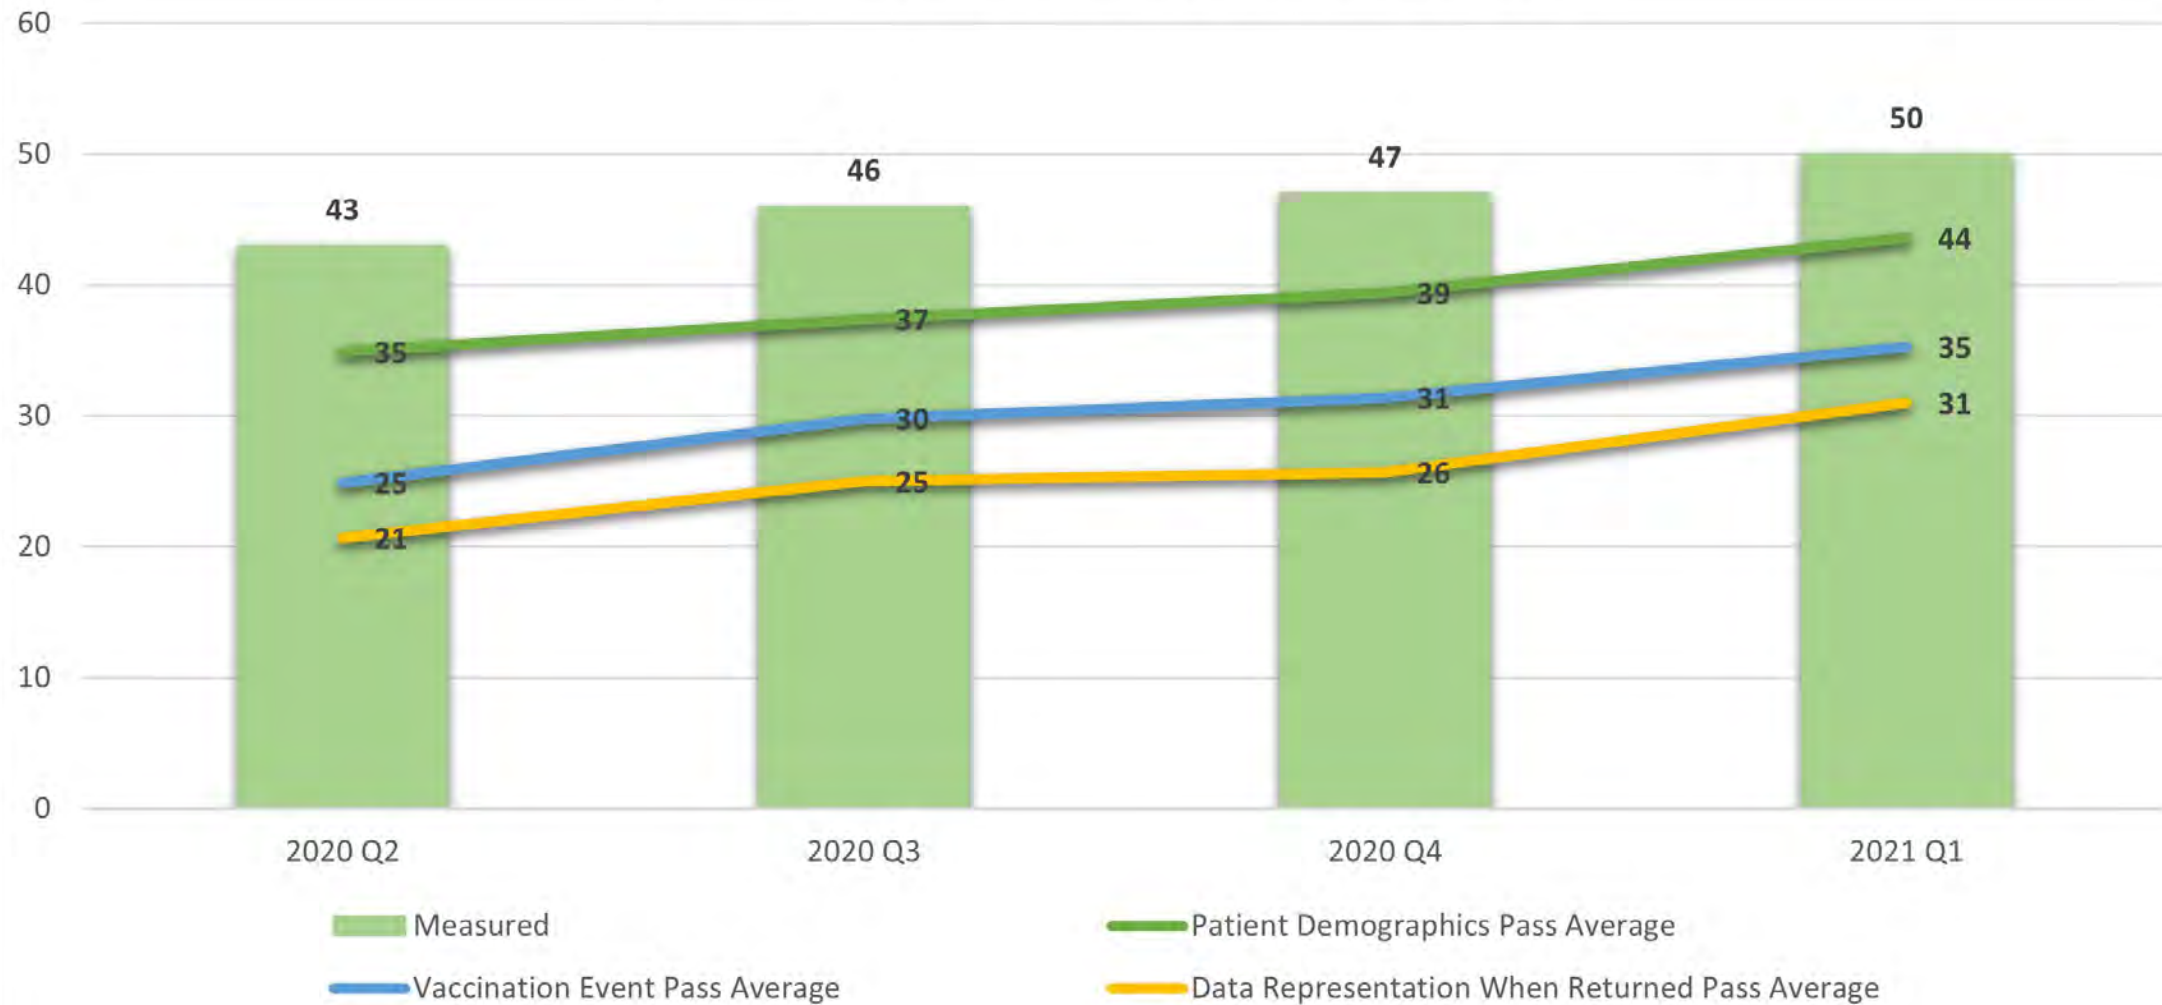

Test Case	Expectation
Submit vaccination event representing an expired dose was administered.	IIS returns the expired administration which includes the expiration date in the RSP.

Measuring Additional Aspects of Data Quality

Data Quality Incoming/Ongoing Trends

Validation Criteria

Basic and Complete

Patient Measures

Measure	Basic	Complete
IIS detects data quality issue with patient:		
1) Name: first	X	X
2) Name: last	X	X
3) Date of birth	X	X
4) Gender	X	X
5) Address: State	X	X
6) Address: Country		X
7) Race	X	X
8) Ethnicity	X	X
9) Multiple birth indicator and birth order		X
10) Phone number and phone type		X
11) Responsible person name: first		X
12) Responsible person name: last		X
13) Relationship to patient		X
14) Patient ID and Patient ID type	X	X

Immunization Measures

Measure	Basic	Complete
IIS detects data quality issue with:		
15) Vaccination administration date	X	X
16) Dose level eligibility		X
17) Contraindications/precautions		X
18) Exemptions/refusals		X
19) Vaccination event type (e.g., Admin/Hist)	X	X
20) Vaccine funding source		X
21) Vaccine product	X	X
22) Vaccine manufacturer name	X	X
23) Vaccine expiration date	X	X
24) Vaccine event ID	X	X

Additional
Aspect
Measures

Measure	Basic	Complete
25) IIS Maps between coding systems	X	X
26) IIS Returns key information	X	X
27) IIS Returns a consolidated history	X	X

Data at Rest is the measurement of data that has been accepted into the IIS production environment.

What is
measured?

Cohort of 0 to
2-year-olds in
your IIS.

What is measured?

 **Completeness Indicators**

 **Validity Indicators**

 **Timeliness Indicators**

How is this information presented? – AART

Results Summary

Measure	Measure Title	Meets	Does Not Meet	Data Unavailable	No Threshold
1	Completeness Indicators	12	5	9	0
2	Validity Indicators	3	0	19	1
3	Timeliness Indicators	2	2	5	0

Test Case Results				
Test Case	Test Case Title	Result	Value	Threshold
1.1	Patient First Name	Meets	0%	Lower than 1%
1.2	Patient Middle Name	Does Not Meet	34%	Lower than 25%
1.3	Patient Last Name	Meets	0%	Lower than 1%
1.4	Patient DOB	Meets	0%	Lower than 1%
1.5	Patient Gender	Meets	0%	Lower than 1%
1.6	Patient Address Street	Meets	0%	Lower than 15%
1.7	Patient Address City	Meets	0%	Lower than 15%
1.8	Patient Address State	Meets	0%	Lower than 15%
1.9	Patient Address Zip Code	Meets	0%	Lower than 15%
1.10	Patient Address Complete	Meets	0%	Lower than 15%
1.11	Next-Of-Kin First Name	Meets	0%	Lower than 10%
1.12	Guardian First Name	Data Unavailable	0%

Two views available for your data!

IIS-Wide Report

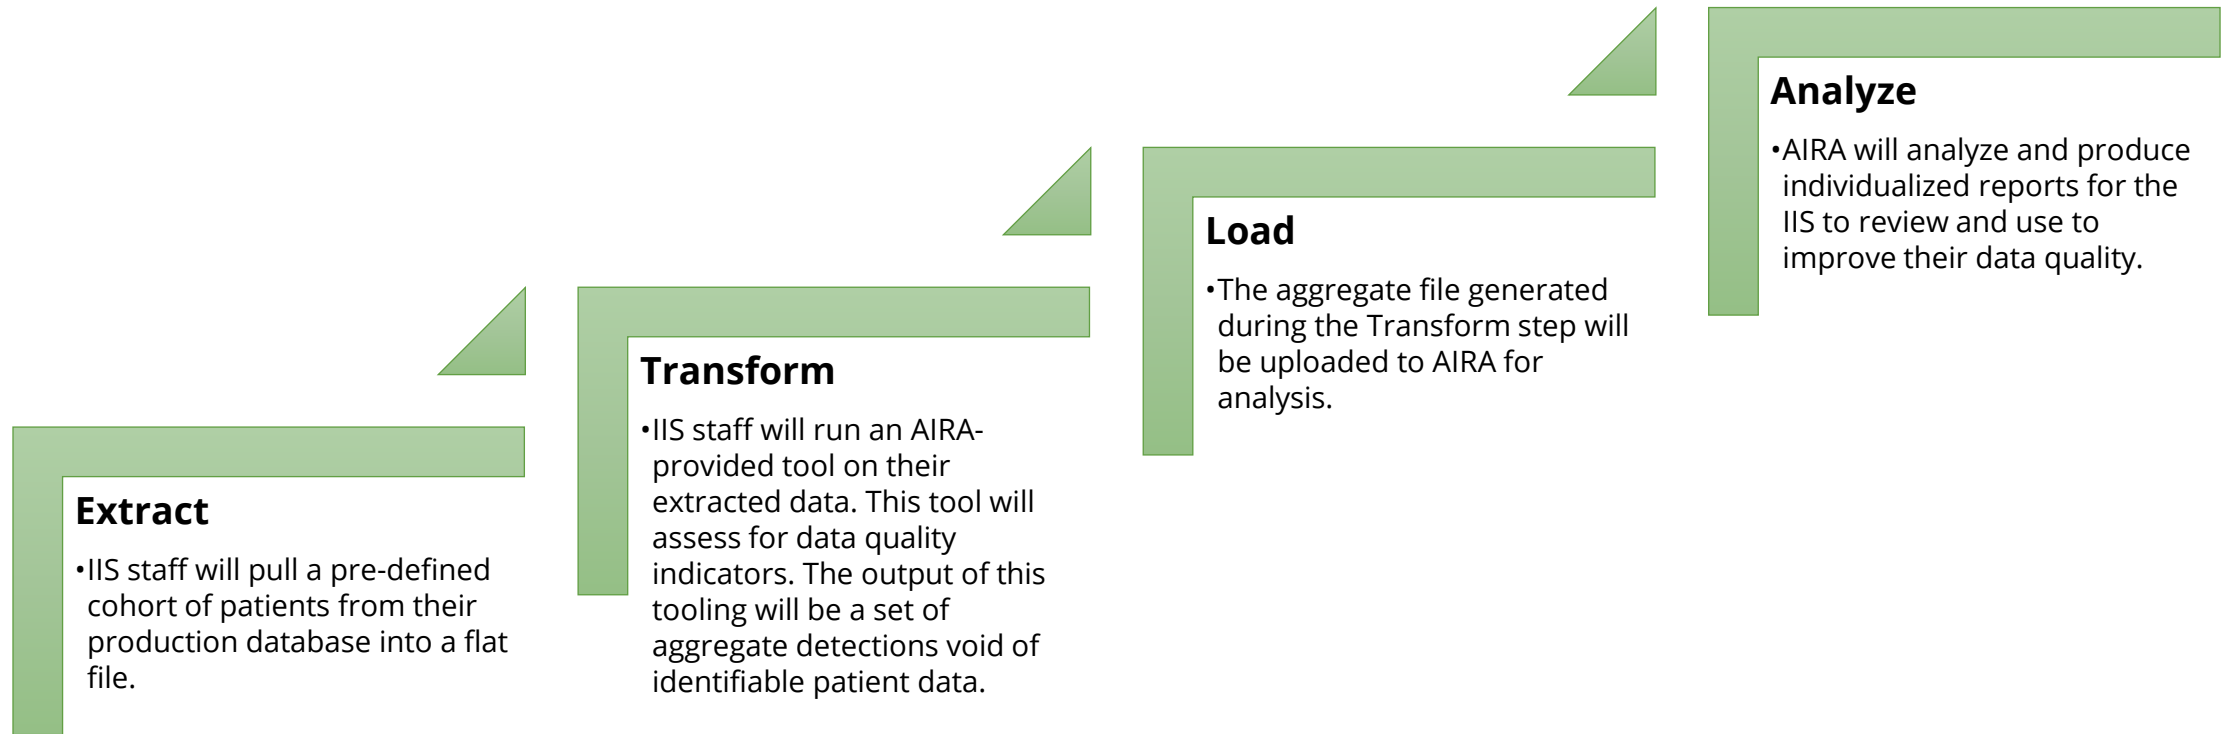

- Provides a view of the overall picture of the completeness, validity, and timeliness of the IIS data.

Provider Breakdown Report

- Stratifies the entire cohort of data by provider.

How does it work?

2020 DAR Pilots

- Analyzed data from 7 jurisdictions.
- Compiling the extract took the most amount of time to participate ~ 18 to about 40 hours.
 - **We have sample scripts!**
- Provider breakdown report provided actionable information.
 - **Grouping functionality allows for additional views!**

DAR Testing and Discovery Next Steps

Summer 2021

- Technical improvements
- Education and communication

Fall 2021

- Enroll jurisdictions
- Measure data and generate reports

A background image showing a hand clicking a computer mouse on a desk. To the right, a large, three-dimensional '@' symbol made of cardboard stands upright. The scene is softly lit, creating a warm, professional atmosphere.

Provider Participation

Assessing
completeness for
enrollment and
submission of provider
organizations within a
jurisdiction

What will be measured?

In Scope

- The completeness of enrollment of provider sites in a jurisdiction
- The submission of data to the IIS from provider sites in a jurisdiction

Out of Scope

- Evaluation of patient saturation in jurisdictional IIS.
- Evaluation of vaccination saturation in jurisdictional IIS.

Provider Participation Next Steps

2021- PREPARE PILOT

2022 – CONDUCT PILOT

2023 –
TESTING AND DISCOVERY
