10

# Dashboard Cards – Errors: By Category

# Managing Ongoing Data Exchange Activities

- Data monitoring and Code Table maintenance
- Allows Jurisdictions to identify areas for provider/staff training
- Tracking of Protection Indicator setting and handling of protected data

# Improving Overall Data Quality within the IIS

- Assist in error identification and creation of troubleshooting guidance/documentation
- Monitor clean-up efforts for various data quality issues
- Aid in participation of the AIRA IIP Data Validation Workgroup

# Closing

- Availability of HL7 Messages Dashboard in QA environments
- Dashboard use in data monitoring and ongoing management
- Utilized to improve data quality within the IIS
- Q&A/Community Discussion
