

AIRA
AMERICAN IMMUNIZATION
REGISTRY ASSOCIATION

AIRA Members & Partners Quarterly Meeting

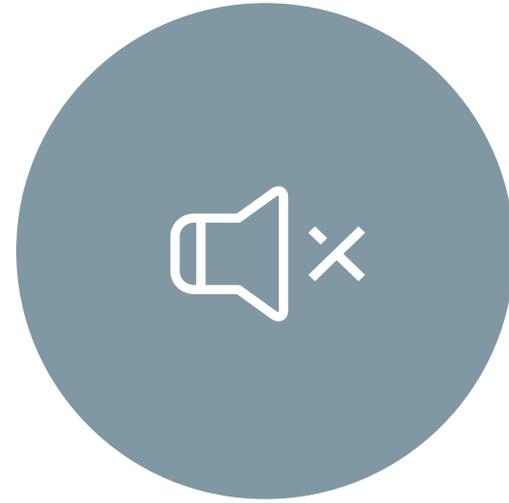

July 15, 2024

Welcome – Heather Roth, President

This meeting is being recorded
and will be posted in the
AIRA repository

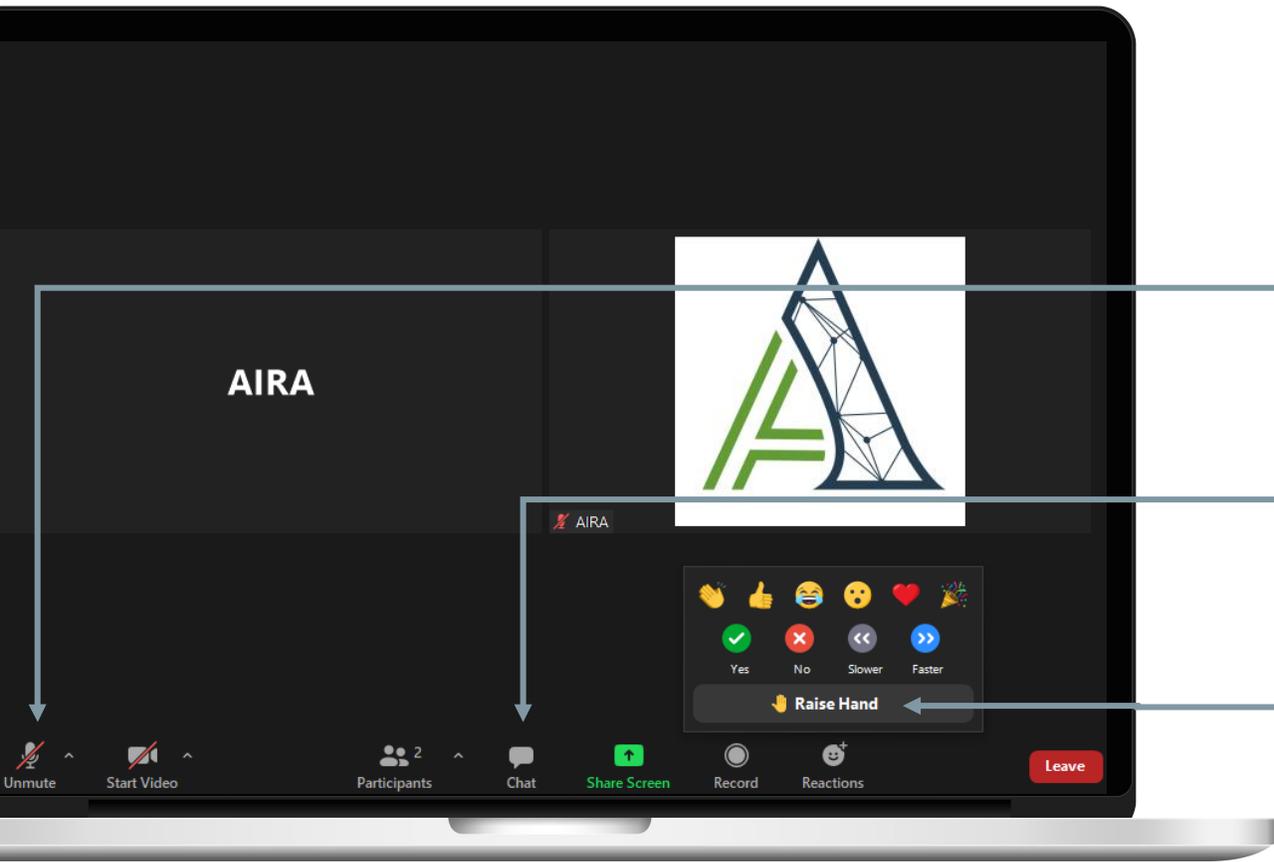

All phone lines
are muted

Welcome – Heather Roth, President

How do I ask a question?

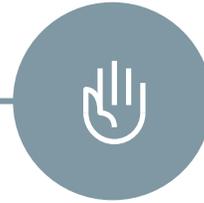

There will be time allotted for Q&A following each of the updates.

Select the unmute icon and ask your question verbally.

Select the chat icon and type your question into the chat box.

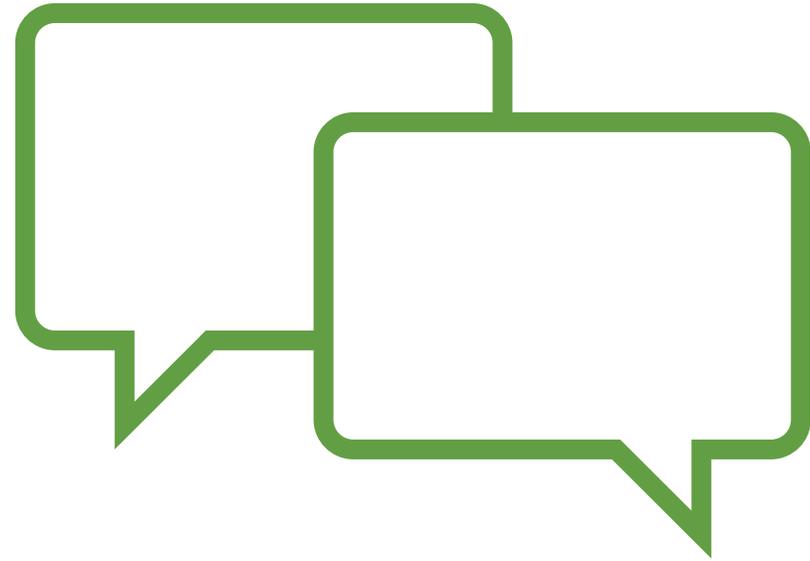

Select the reactions icon, select "Raise Hand," and you will be called on.

Technical Support

If you experience any technical issues during the meeting, please contact **Jo Turcotte** via direct message in the Chat.

American Immunization Registry Association (AIRA) Update

Rebecca Coyle

Important Changes

- Announced on July 11th, AIRA will undergo a workforce reduction
- We regret the impact this will have on our community
- We are dedicated to maintaining the quality of our services to our members and partners
- More information about impacted programs and services is forthcoming

Discovery Sessions

Discovery Sessions

- Average attendance: 100

Recently Covered

- IIS Functional Standards
- AIRA 2024 Recap
- Emerging Standards

Up Next

- **July:** *Moving Needles:* Increasing Connectivity between Post Acute and Long-Term Care EHRs and IIS
- **August:** IG Digitalization Project
- **September:** Pharmacoepidemiology, Vaccine Safety, and IIS

Impact: Over 560 individuals from 132 organizations attended AIRA's Discovery Sessions in FY 2023.

IIS Manager Collaborative

- Space for IIS managers to connect with peers
- Bi-monthly virtual discussions
- Avg attendance: 40 IIS Managers

January 2024:

Medicaid Funding
Part 2

March 2024:

IZ Gateway –
Provider Landscape
& Data Participation
Gaps

May 2024:

Data Modernization

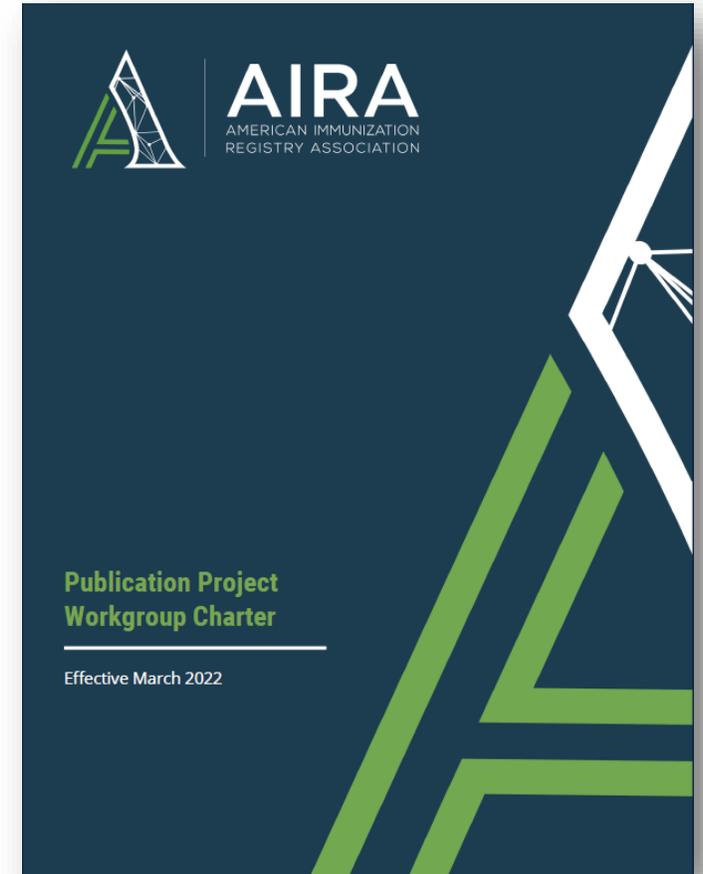

July 2024:

Workforce
Development &
Staff Training
Offerings

Publication Project Workgroup (PPW)

- Increased interest in membership
- Reviewing & updating charter
 - Broadening membership from invite-only to open
 - Membership more inclusive of a range of publication experience
 - Changing meeting cadence

A large, stylized logo for the AIRA 2024 National Meeting. It features a central hexagonal shape with a white background and a dark blue border. The top of the hexagon is a green triangle containing the text "AIRA 2024" in white. The main body of the hexagon contains the word "National" in a dark blue script font and "MEETING" in a dark blue sans-serif font. Below the hexagon is an orange arrow pointing to the right, containing the text "May 7-9 | Orlando, Florida" in white. The background of the top half of the image is a light blue sky with palm fronds on the left and a white geometric shape on the right.

AIRA 2024

National
MEETING

May 7-9 | Orlando, Florida

AIRA 2024 National Meeting Recap

- 585 registered attendees
- 90 breakout presentations, 9 plenary sessions
- 47 AART Clinic appointments

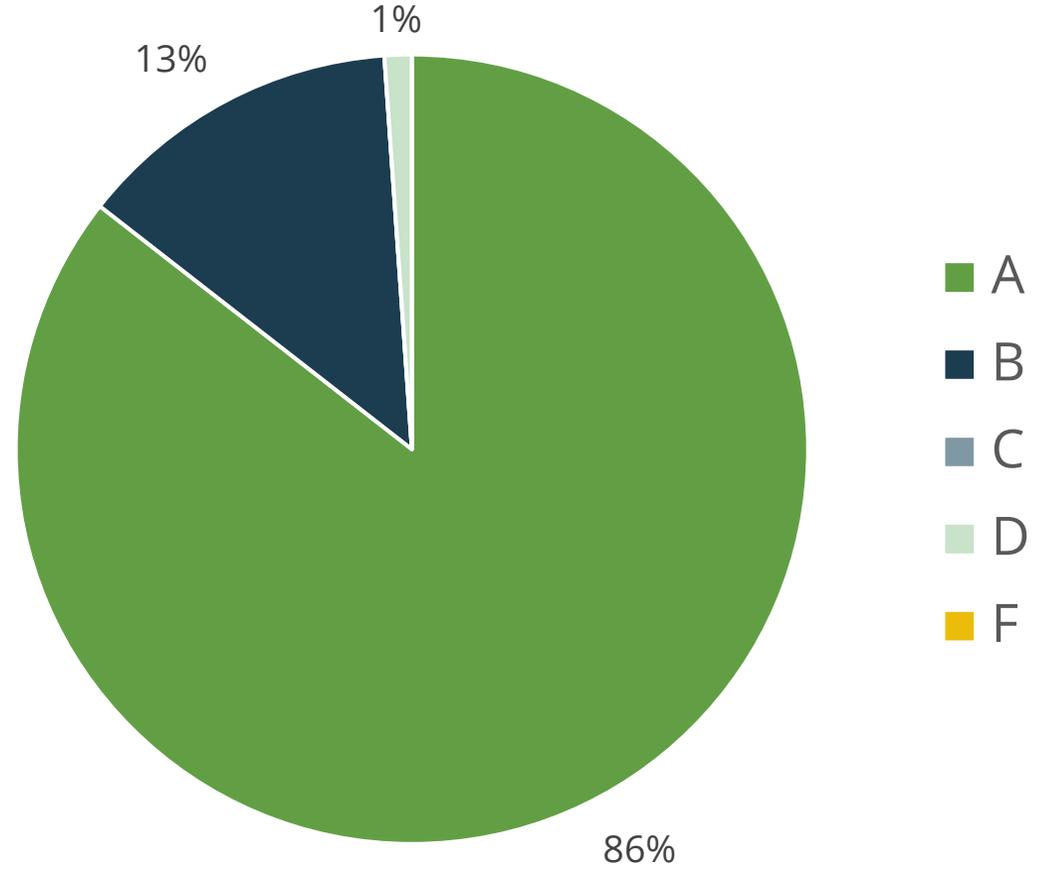

Other, 28%

Who Attended

High-level Evaluation Recap

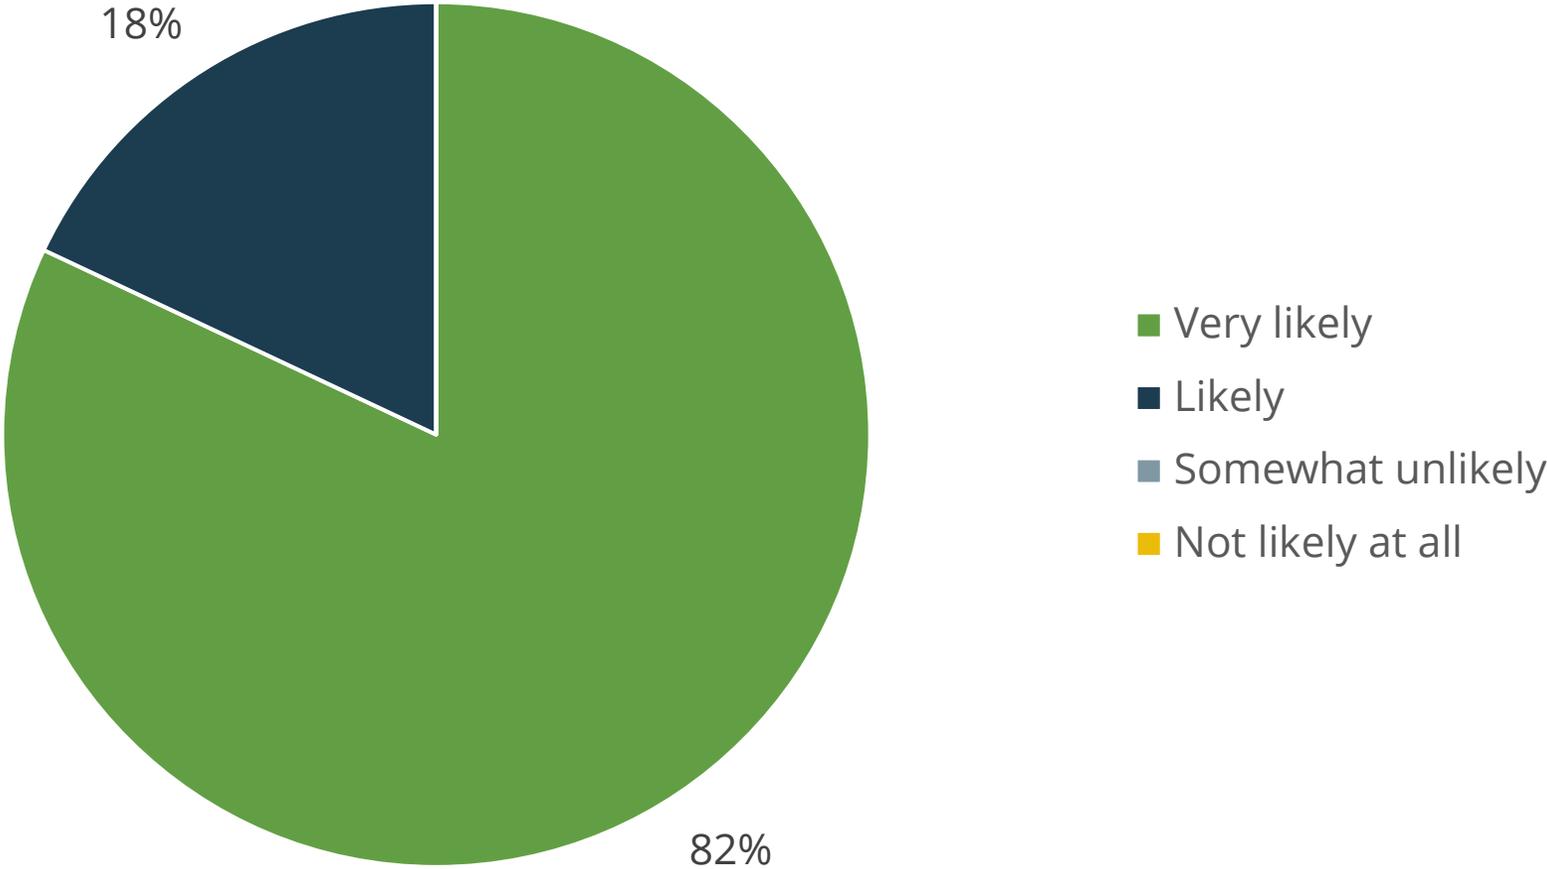

What is your overall grade for the AIRA 2024 National Meeting?

(90 answered; 1 skipped)

How likely are you to use this meeting's content in your work or share it with others who may use it?

(89 answered; 2 skipped)

Meeting Content

What went well:

- Diverse, broad topics, excellent opportunities to learn and share
- Overall great breakout presentations topics and content
- Well organized tracks

What could we do better:

- Include tracks that are less technical for newer folks
- Allow more time for breaks and networking

Attendee Takeaways

- “How important it is to **network** and make connections.”
- “Immunization community is connected but still needs to be thinking about **future and funding**.”
- “Understanding that other states have similar issues. Finding **creative solutions** that we can bring back to our IIS.”
- “This is a great group of supportive people. Everyone created a sense of **community**.”

ON-DEMAND COURSE

HL7 v2.5.1 Immunization
Update (VXU) Messages

- ✓ In-depth review of HL7 v2.5.1 VXU messages and their role in exchanging information between systems.
- ✓ Designed to enhance the IIS community's skills in interoperability and alignment with national standards as documented in the HL7 Immunization Implementation Guide (IG).
- ✓ Ideal for those with prior exposure to HL7 messaging and interoperability.

 info@immregistries.org

 immregistries.org

Research reported in this publication was supported by National Center for Immunization and Respiratory and Disease of the Centers for Disease Control and Prevention under award number NU380T000291 under CDC-RFA-OT18-1802 Strengthening Public Health Systems and Services Through National Partnerships to Improve and Protect the Nation's Health. The content is solely the responsibility of the authors and do not necessarily represent the official views of CDC.

New AIRA e-Learning Course: Coming Soon!

Registration opens early August

Keep an eye out for announcements
in AIRA's Weekly Update!

Technical Advisory Bulletins (TABs)

- Builds on and clarifies specifications in the *HL7 v2.5.1 Implementation Guide for Immunization Messaging, Release 1.5 and Addendum, October 2018*
- Each TAB addresses a specific topic
- Use TABs to inform the development and maintenance of HL7 exchange capabilities and interfaces

Technical Advisory Bulletins (TAB) Resources

Issued on May 15, 2024 by AIRA

★★★★★

OPEN RESOURCE:

[↓ TAB Overview](#)

[↓ TAB Query Response Flexibility](#)

[↓ TAB Additional "Unknown" Race and Ethnicity Codes](#)

[↓ TAB Scenarios for Updates and Queries](#)

[↓ TAB System Entry Date/Time \(RXA-22\)](#)

[↓ TAB Messaging Phone and Email](#)

The technical advisory bulletins (TAB) intend to provide additional clarity on national specifications to support the interoperability of immunization information between systems. These documents build on and further clarify specifications in the HL7 v2.5.1 Implementation Guide (IG) for Immunization Messaging, Release 1.5 and Addendum, October 2018 (National IG).

Immunization Integration Program (IIP)

Testing & Recognition

- New modular test plan published on the NIST IIP Test Suite
- Preparing to test with pilot vendor, Office Practicum

Collaborative

- Immunization data exchange with pharmacies - conducting interviews with Pharmacy Management System vendors to understand capabilities and workflows
- Illinois/Chicago technical assistance – supporting development of a roadmap to improve data quality through implementation of IIP's acknowledgment and data validation guidance

Onboarding Shared Services (OSS)

Training

Provider Onboarding for IIS 6-week live training course concluded in April, 108 participants representing 29 jurisdictions

On-demand version of Session 1 piloted with ~50 learners

Technical Assistance

6-month onboarding TA project with IL/Chicago concluded

9-month USAPI Onboarding Learning Community continues through July

Resources

Provider onboarding templates refreshed and republished in the AIRA repository

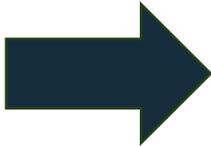

AIRA's Work with IZ Gateway

Provide subject matter expertise to support IZ Gateway documentation development

Develop strategies to assist IIS and multi-jurisdictional vaccine providers with connecting and exchanging data through IZ Gateway

Track and monitor the completion of interjurisdictional MOUs

Completed Revisions and Published:

1. IIS-IIS Companion Guide version 4.1
2. Provider-IIS Companion Guide version 3.1
3. QBP/RSP Analysis Findings version 4.0

Revision in Progress:

1. DoD/VA Oracle Health Gap Analysis version 3.0
2. EDN/RIISE Gap Analysis version 3.0

Coming Soon:

1. AZOVA Gap Analysis

National Set of Test Patients for Standardized Query Testing Pilot July 2024

Questions?

Office of Public Health Data, Surveillance, and Technology (OPHDST) Update

Jim Jirjis & Tara Ramanathan Holiday

Trusted Exchange Framework and Common Agreement (TEFCA) Overview

Jim Jirjis, MD, MBA, FACP

Division Director, Data Policy and Standards Division (DPSD)

Presented at American Immunization Registry Association's (AIRA) Members and Partners Meeting

July 15, 2024

Who We Are

The Office of Public Health Data, Surveillance and Technology (OPHDST) is leading efforts to improve the availability and use of public health data to inform decision-making and action across the public health ecosystem.

Customer-centric, user-focused, mission-based, and here to serve

A team of experts with cross-functional knowledge and skills

Driven by unified public health data strategy that helps focus our resources and clarify our priorities

National Center for Health Statistics, the federal government's principal health statistics agency, reports to OPHDST

The Public Health Data Strategy (PHDS) has put us on a path to achieve our vision

by outlining the data, technology, policy and administrative actions needed to exchange critical core data efficiently and securely across health care and public health.

Core Public Health Missions:

Public Health Data Goals:

1. Strengthen the core of public health data
2. Accelerate access to analytic and automated solutions to support public health investigations and advance health equity
3. Visualize and share actionable insights to inform public health action
4. Advance more open and interoperable public health data

History of Health Data Interoperability Policy

2005

HITECH Act. Established Meaningful Use Program, moved Healthcare to a digital medium.

2019

Data Modernization Initiative. Effort to modernize core data and surveillance infrastructure across the federal, tribal, and state public health landscape

2023

Policymaking. Introduced a national framework (TEFCA), a CDC Data Office (OPHDST), a Public Health Data Strategy, and investments in content, terminology and exchange standards

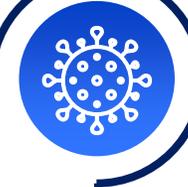

2016

21st Century Cures Act. Focused on interoperability for healthcare, patient access, usability and clinician burden reduction

2020

The COVID-19 Pandemic. All systems, processes and people were tested, and opportunities for public health were clarified

TEFCA Framework Promotes Policy and Technical Alignment

- **The Trusted Exchange Framework consists of seven non-binding trust principles:**

- Standardization
- Openness and transparency
- Cooperation and nondiscrimination
- Privacy
- Security and safety
- Access
- Equity and public health

- **The Common Agreement:**

- Is a 64-page, legally binding contract between the RCE and approved QHINs.
- Qualified Health Information Networks (QHIN) are required to flow down many provisions of the Common Agreement to their Participants and Sub participants, including the requirement to comply with applicable law and relevant Recognized Coordinating Entity (RCE) Standard Operating Procedures (SOP).
- Because of the flow-down requirements, the Common Agreement will effectively require all persons and entities participating in the TEFCA ecosystem to comply with the same “rules of the road” when engaging in data exchange through a TEFCA-enabled network.

- **Standard Operating Procedures**

- **The QHIN Technical Framework**

TEFCA Goals

GOAL 1

Establish a universal policy and technical floor for nationwide interoperability

GOAL 2

Simplify connectivity for organizations to securely exchange information to improve patient care, enhance the welfare of populations, and generate health care value

GOAL 3

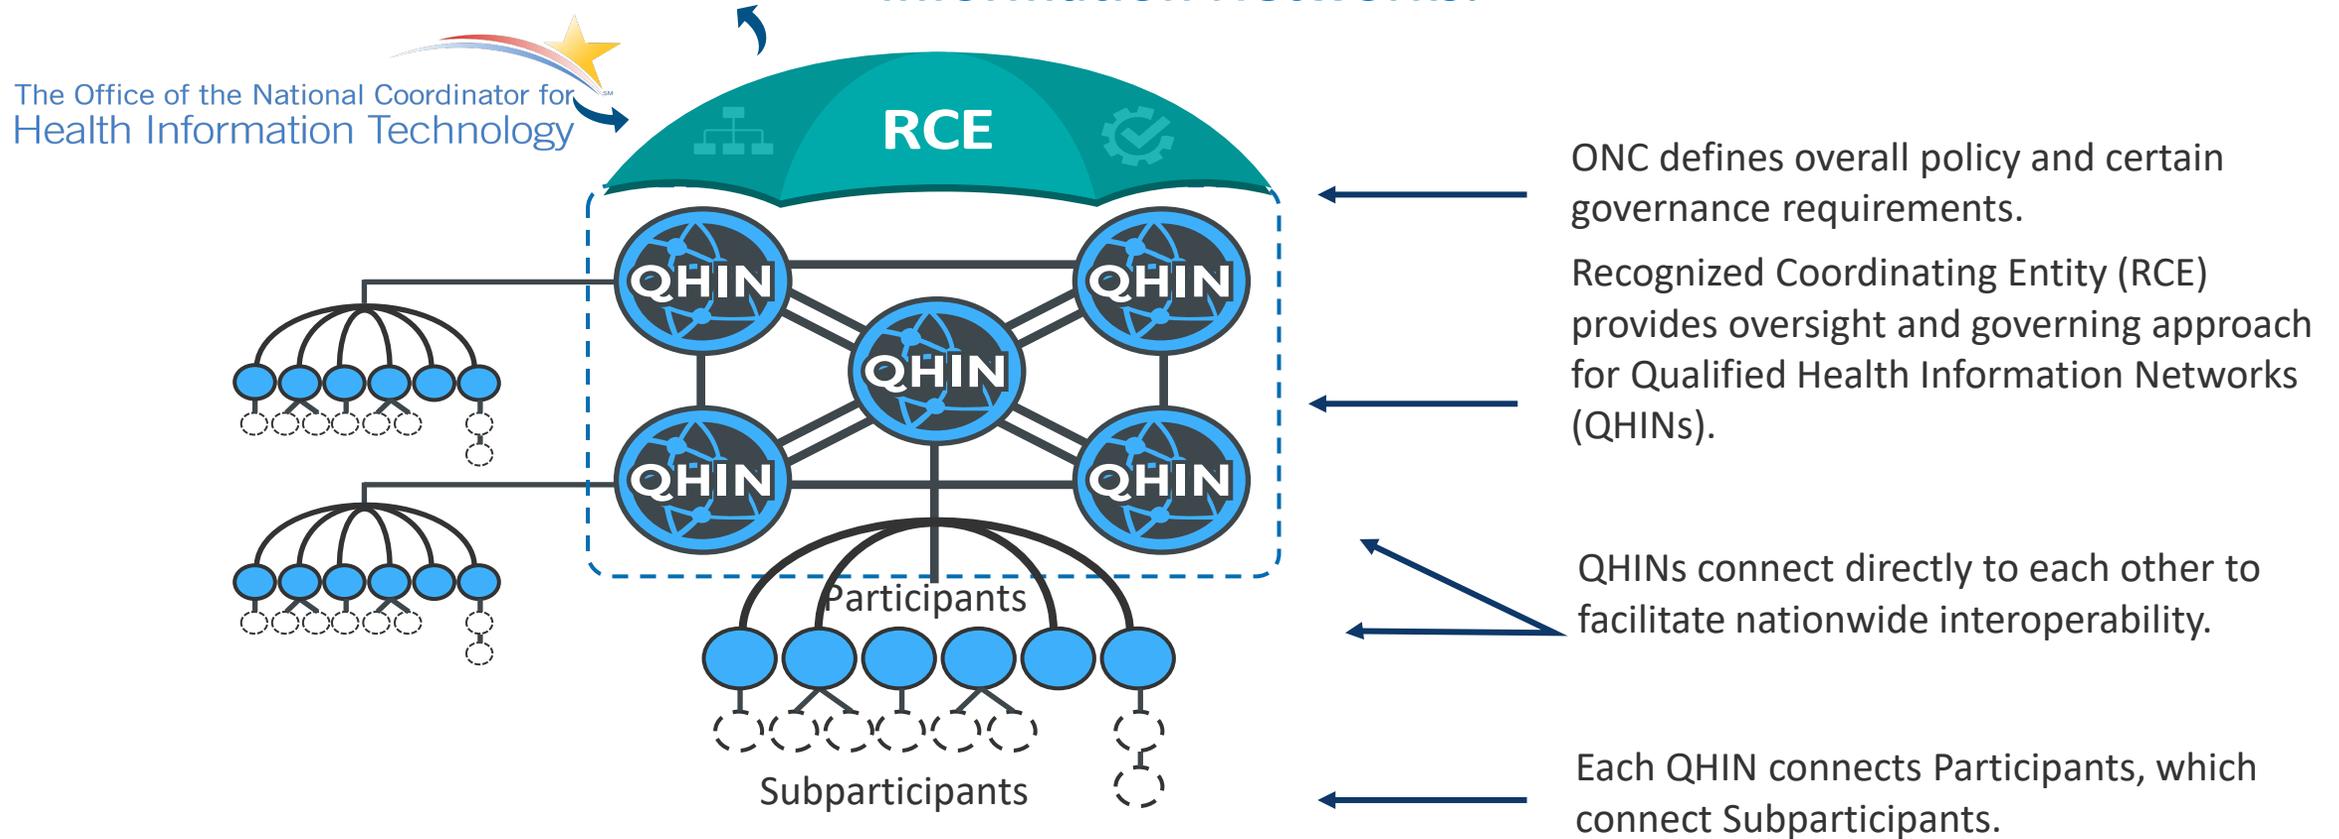

Enable individuals to gather their health care information

TEFCA Realized in the Immunization Information Systems (IIS) (examples, not exhaustive)

- Bi-directional exchange of immunization data between healthcare and public health
- Query to get updates to immunization administration record
- Push transactions to public health or CDC program from pharmacy or healthcare organization in real time to IIS

How will exchange work under TEFCA?

One benefit of TEFCA is that large volumes of data are already flowing through Health Information Networks.

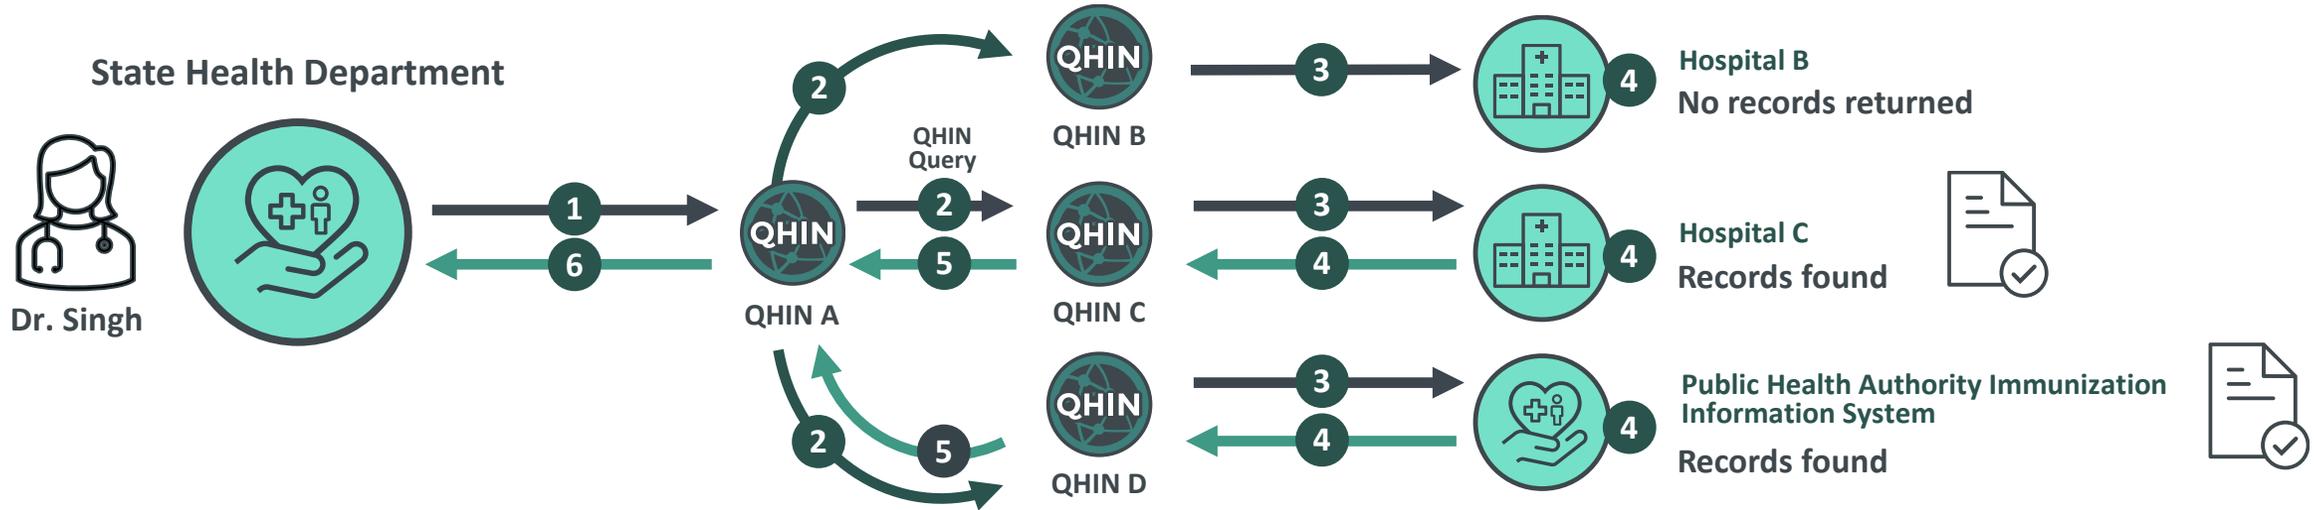

These networks can help filter, link, and route data in ways that make it easier for all levels of public health to analyze and act on.

Example: Public Health Exchange Purpose*

Use Case: Public Health Authority queries TEFCA for a case investigation

1 Dr. Singh (Participant) is performing a case investigation. She has a public health need and the appropriate authority to understand all previous care provided to a particular patient, Robert. Dr. Singh sends a request for medical records to QHIN A for the Exchange Purpose of Public Health.

2 QHIN A initiates QHIN Query to all QHINs.

3 QHIN B, C, D execute their query methodology to request Robert's records from their Participants.

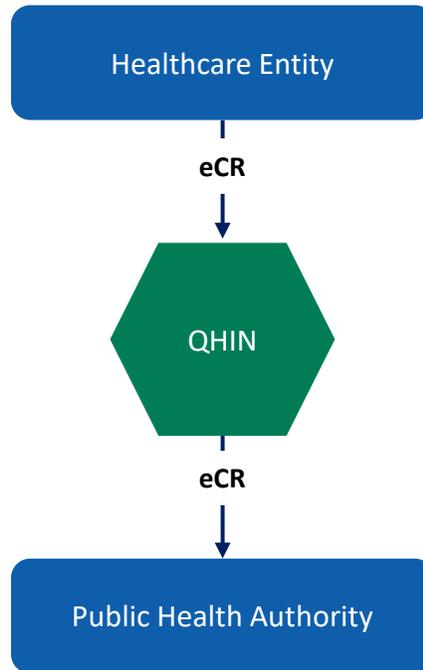

4 Hospital B finds no records. Hospital C and a Public Health Authority's Immunization Information System (both Participants) respond to their respective QHINs with Robert's records.

5 In Response, QHIN C, D send Robert's records to QHIN A.

6 QHIN A sends Robert's records to Dr. Singh.

Electronic Case and Disease Reporting and Data Exchange

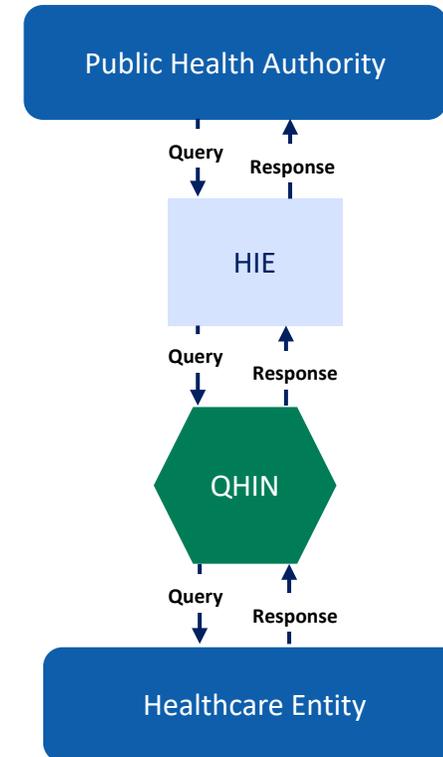

PUSH: data to public health

VALUE: Leverage electronic case reporting

- Address agreements and technical specifications.
- More complete data being available to the case worker
- Set the stage for potential future FHIR® exchange

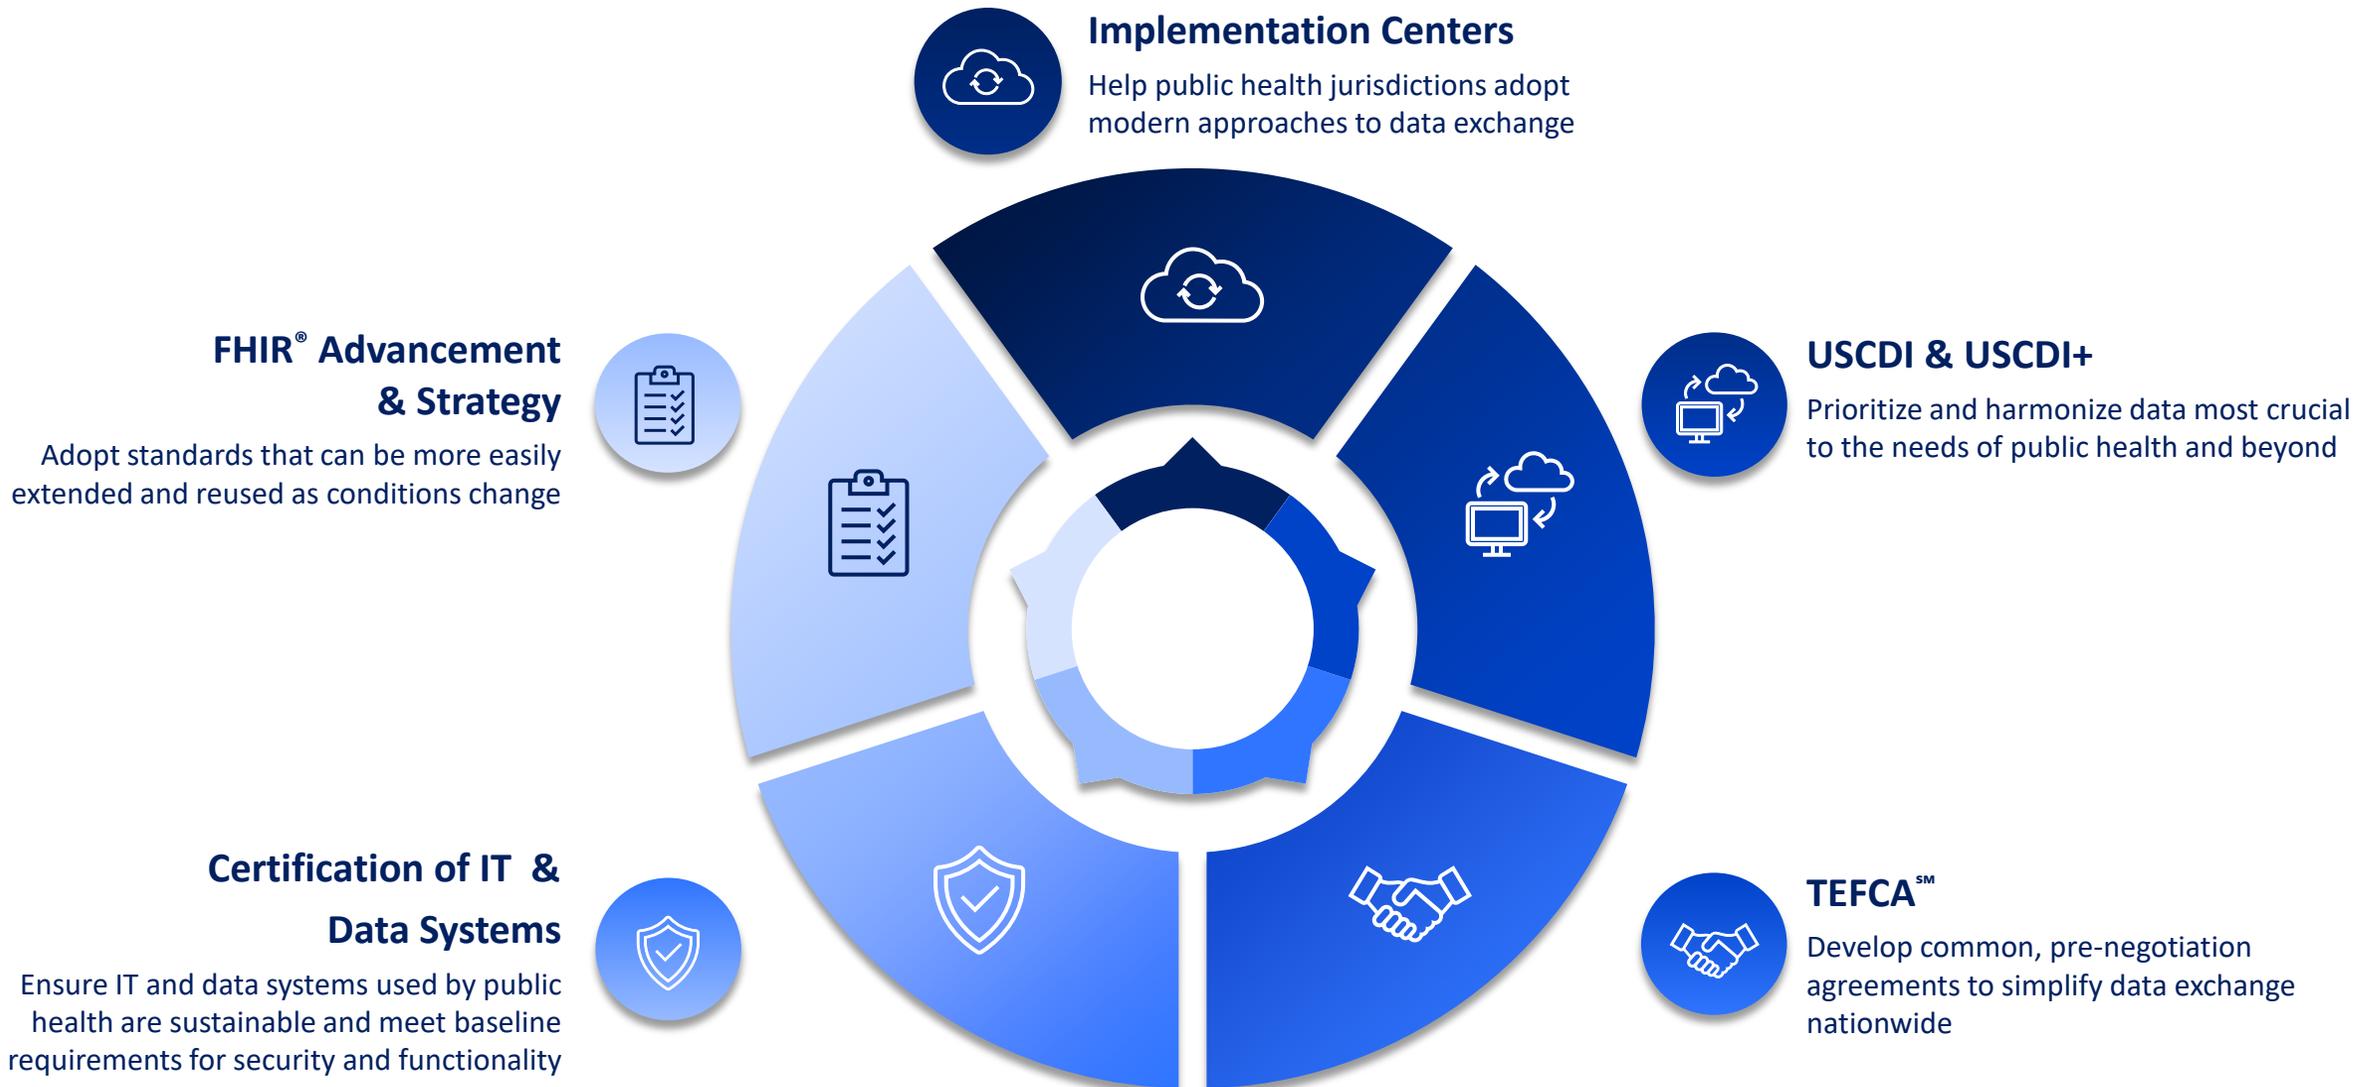

PULL: request data from healthcare

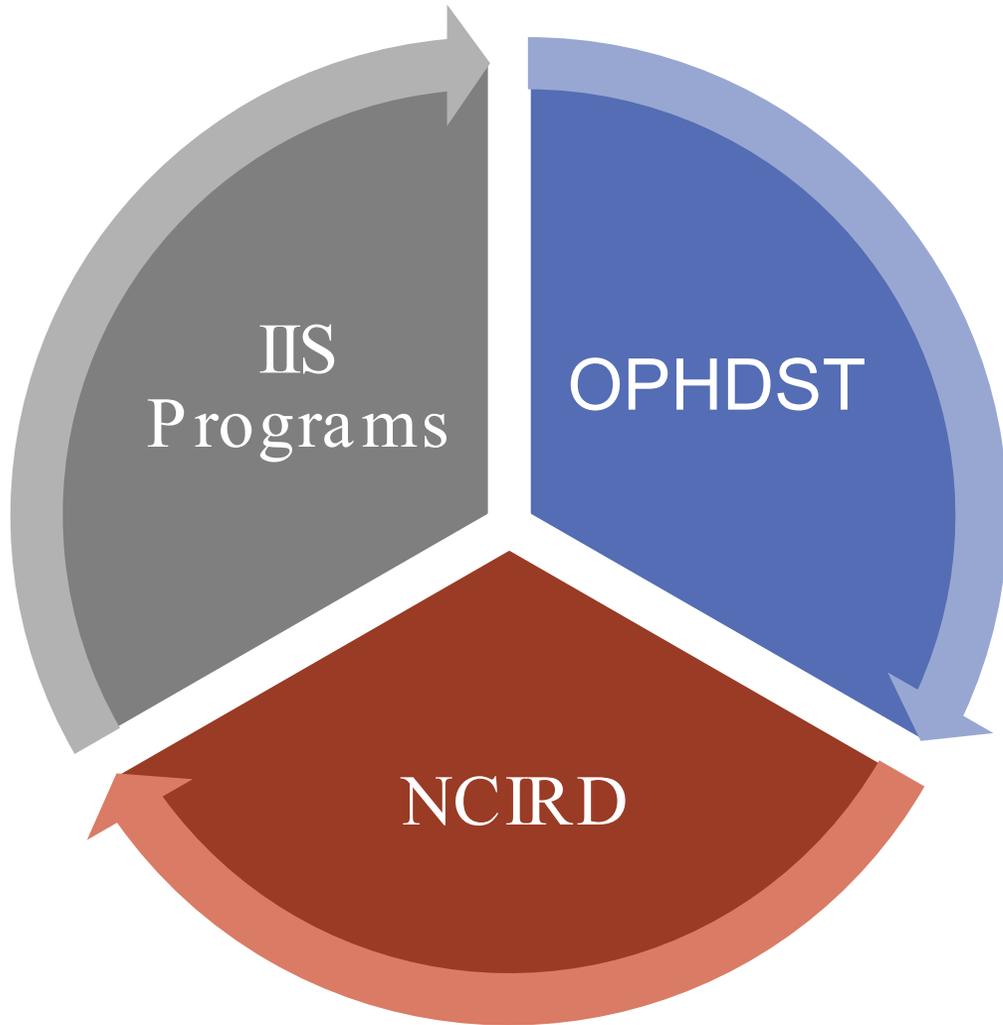

VALUE: Request data to complete records, longitudinal follow-up

- Utilizing TEFCA allows case investigators to more easily search in portal for this information and saves a material amount of time for them
- Longitudinal follow-up of cases

The Big Picture: Where does TEFCA fit in?

Working Together: TEFCA Benefits for Immunization Space

- CDC is eager to hear ways it can leverage AIRA's partnership in making immunization data exchange better for public health
- OPHDST and National Center for Immunization and Respiratory Diseases (NCIRD) seek AIRA's collaboration on ways TEFCA can be useful for immunization data sharing

Thank you

For more information, contact CDC

AIM Update

Kristy Westfall, IIS Policy Associate Director

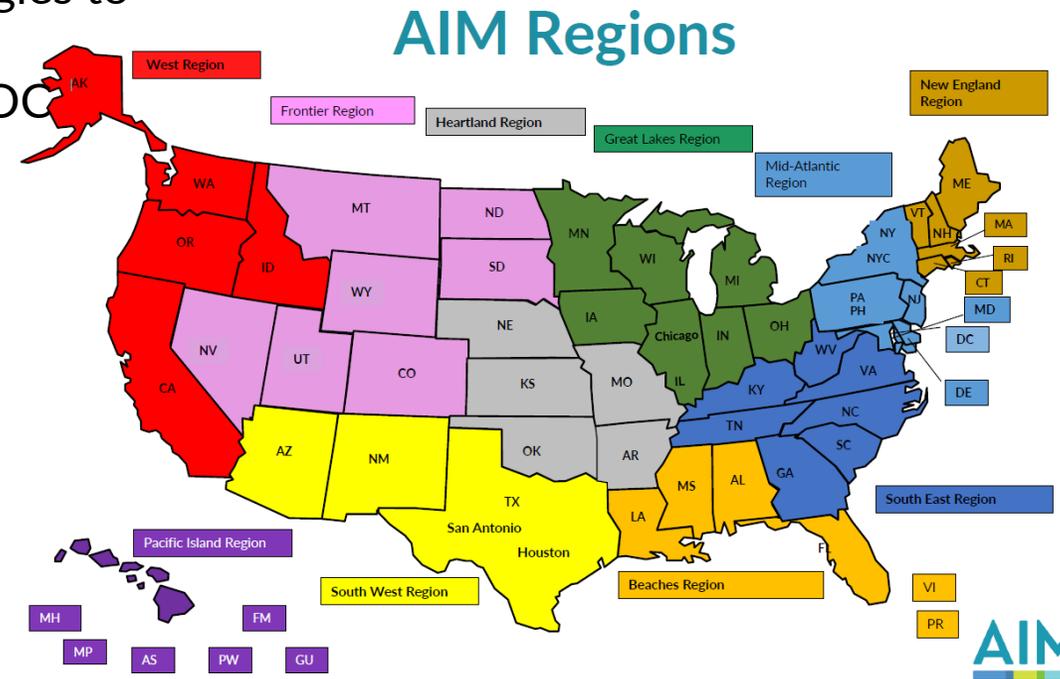

July 15, 2024

Association of
Immunization
Managers

VAC Regional Meetings for Adult Vaccines

- 8 regional meetings to develop jurisdiction-based strategies to improve adult vaccination rates
- Hosted by AIM; funded by cooperative agreement w/CDC
- Invited partners:
 - Immunization programs
 - Medicaid programs
 - Pharmacists
 - Physicians
 - Immunization coalitions
 - Long-term care associations
 - Community-based organizations
 - CDC
- Goal:
 - Work with your jurisdiction's team to develop a plan to improve adult vaccination rates
 - Leave with a plan to continue the conversation and move the needle!

Atlanta, GA	Lincoln, NE
Boise, ID	Kona, HI
St. Paul, MN	Burlington, VT
Tampa, FL	Washington, D.C.

iREACH Vaccine eLearning Modules

- Series of six (6) publicly accessible eLearning modules to increase knowledge and support community conversations about the flu, COVID-19, and basic information about vaccines and vaccine safety
- Created with community health workers, trusted messengers, and community champions in mind
- The eModules and supplemental materials are accessible, easy-to-use, and available in English and Spanish

iREACH Vaccine eLearning Modules

iREACH
resource. engage. connect.

Spanish Version: Módulos de reaprendizaje de vacunas

This series of six eLearning modules (eModules) was created by the iREACH team at the Association of Immunization Managers (AIM) to increase knowledge and support community conversations about the flu, COVID-19, and basic information about vaccines and vaccine safety.

Please always complete these eModules alongside a review of the latest recommendations and information from the Centers for Disease Control and Prevention (CDC) website, as some information in the eModules will change over time.

Intended audience: These accessible, easy-to-use eModules and supplemental materials are available in English and Spanish. While the eModules are available to everyone, they were specially created with community health workers, promotoras, trusted messengers and community champions in mind.

Learn how to best use these modules as a training tool by reviewing our train-the-trainer guide.

Accommodations: All iREACH resources are designed with accessibility in mind but might not be fully Section 508-compliant. If you need accommodations to use this resource, please contact AIM.

Length: Each self-paced module takes, on average, 30 minutes to complete.

Module order: We recommend that you start with the vaccine basics and vaccine safety basics modules, as they build the foundation for the vaccine-specific modules. Then we recommend following this with the flu disease basics, flu vaccine basics, COVID-19 disease basics, and COVID-19 vaccine basics modules.

Certificates of completion: When you finish the evaluation at the end of each module, you will receive a digital certificate of completion that includes a printable option.

Registration and fees: The courses are free, and you do not need to register to take them.

Content for this training series was created by the AIM iREACH team and subject matter experts.

Utilizing Infodemiology to Improve Vaccine Confidence: Resources for Immunization Programs and Partners

AIM Webinar on July 16 from 1-2pm ET

- Joe Smyser, Ph.D., MSPH, CEO at Public Good Projects, will discuss infodemiology, a public health discipline that studies the spread of information with the goal of improving health.
- Dr. Smyser will also cover how immunization programs and partners can use infodemiology resources to improve vaccine confidence.
- Jessica Malaty Rivera, MS, Infectious Disease Epidemiologist and Science Communicator at de Beaumont Foundation, will share science communication tips for health care providers and public health professionals.

Slam Dunk Strategies for Adolescent Immunization: Utilizing Sports-Based Approaches to Increase Catch-up and Engagement

AIM Webinar on July 15 from 1-2pm ET

- Facilitated by immunization advocate Ethan Lindenberger, webinar panelists will share their experiences incorporating adolescent immunizations into team sports and sporting events.
- Attendees will receive tools to implement adolescent immunization awareness and education programs across jurisdictions that knock vaccine-preventable diseases out of the park!
- Panelists:
 - Amy Herrington, DNP, RN, CEN, CNE, Clinical Team Manager, Kentucky Department of Health Immunization Branch
 - Remeka Jones, Deputy Chief of Public Affairs and Equity, Washington State Department of Health
 - Robin Mowson, MA, MPH, Director of Immunization, National Association of County and City Health Officials

Recording
Available Soon!

The State of Vaccine Coverage and Confidence: Insights for the Vaccine Conversation

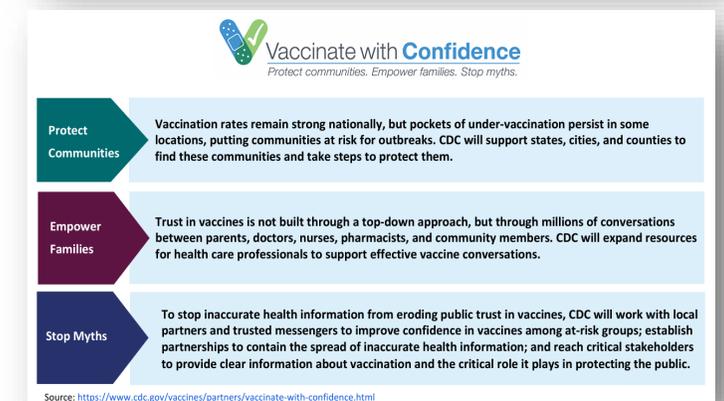

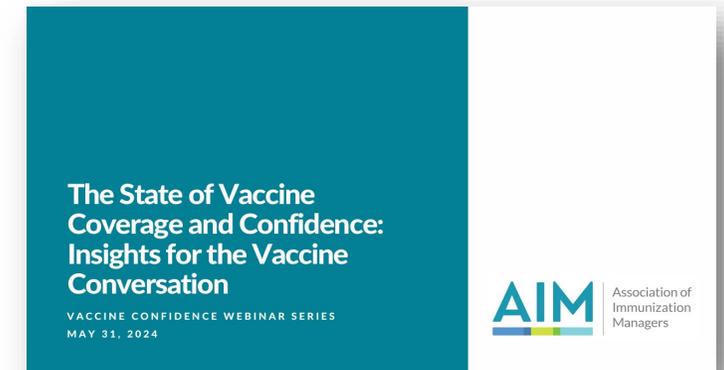

May 2024 Webinar Recording Now Available

Objectives:

- Provide immunization program managers and partners with an update on the state of vaccine confidence and childhood immunization coverage in the United States.
- Highlight emerging research on the scope and impact of vaccine hesitancy, the facts surrounding common vaccination concerns, and the latest evidence regarding effective communication techniques for the vaccine conversation.

Speakers:

- Tiffany Humbert-Rico, MPH, Health Communications Specialist, CDC
- Christina Voss, Health Communications Specialist, CDC Contractor from The Leading Niche
- Sean T. O’Leary, MD, MPH, Professor of Pediatrics, University of Colorado

Immunize.org Update

Kelly Moore

AIRA Member and Partner Update

Kelly L. Moore, MD, MPH

President & CEO

July 15, 2024

Three updates

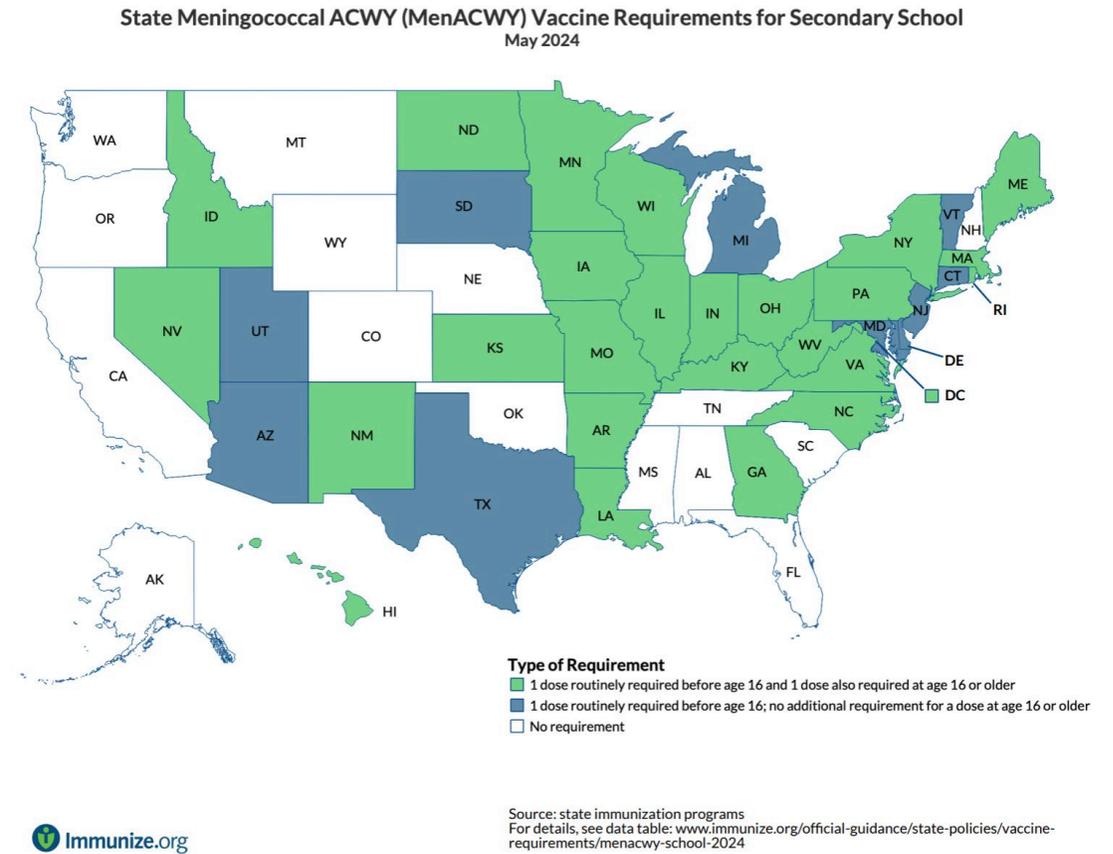

- Updated school immunization requirements
- New clinic resource
- New orientation video series

Updated Immunize.org School Requirements Coming Soon:

www.immunize.org/official-guidance/state-policies/requirements/

- Updates as of May 2024
- Each vaccine, exemption types
- Verified by every state Immunization Program Manager
- Go-live before end of July
- March 2023 content will be available and archived on site

New Resource Coming for 2024-25 Flu Vaccination Season

- Immunize.org is repository of all VIS translations
- New printable resource for clinic staff or patients to scan and access VIS for influenza (IIV, RIV)
- 44 languages available (3-page)
- On website by end of July
- Feedback welcomed
- If useful, can do for other VISs

QR Code Links to Vaccine Information Statement (VIS) Translations **Influenza (Flu) Vaccine** (Inactivated or Recombinant)

INTRODUCTION

VISs produced by CDC explain both the benefits and risks of a vaccine to the recipient. Federal law requires that healthcare staff provide the current VIS (in English) to a patient, parent, or legal representative before each dose of certain vaccines. Immunize.org makes translations available to support recipients who need them. Links to additional VIS resources for healthcare professionals are provided at the end of the document.

English
Influenza (Flu) Vaccine
(Inactivated or Recombinant)

Influenza (Inactivated or Recombinant) VIS Translations

Scan the QR code for the most current available translation of the VIS (pdf format). The date of the English version translated is on the document. If a translation of the current VIS is not available, the link will go to an out-of-date VIS translation that is still considered acceptable for use.

Spanish
Vacuna contra la influenza (gripe)
(inactivada o recombinante)

Albanian
Vaksina e Gripit

Office of the National Coordinator for Health Information Technology (ONC) Update

Rachel Abbey

Public Health Informatics Institute (PHII) Update

Candace Garcia

AIRA Members and Partners Quarterly Update

Public Health Informatics Institute (PHII)

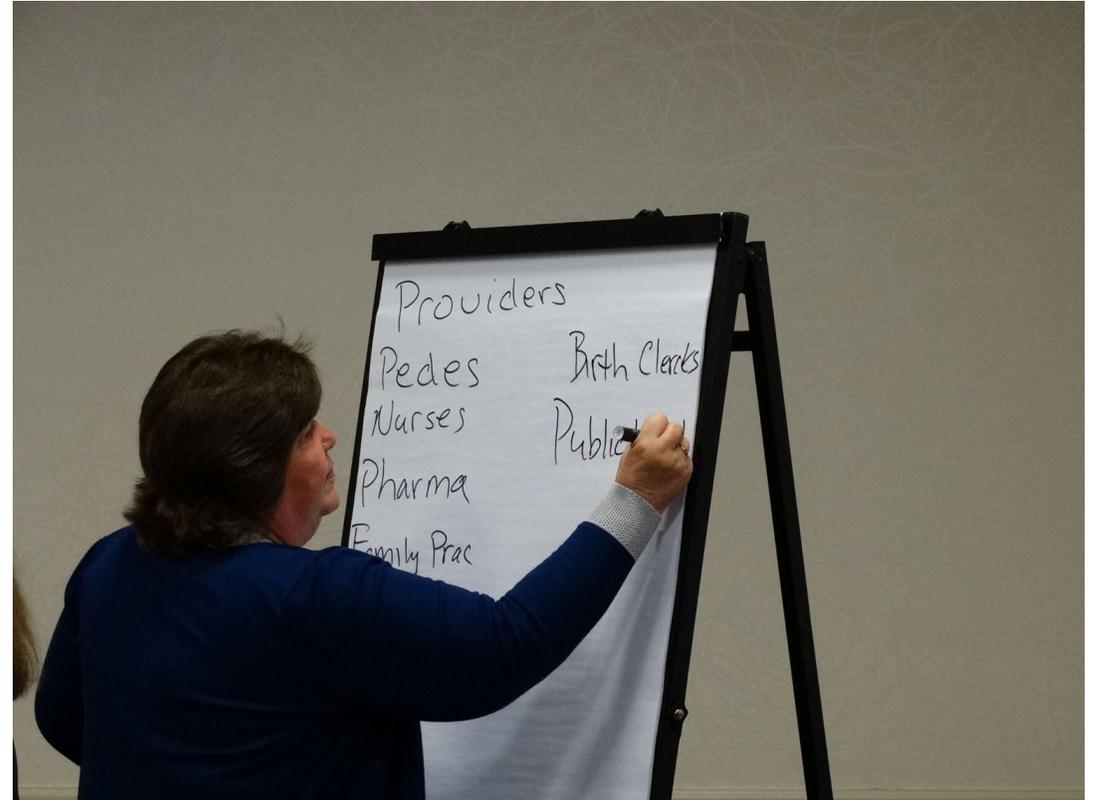

Candace Garcia, Senior Informatics Analyst

July 15, 2024

PHII updates

- How PHII supports IIS
- Technical assistance projects
- Workforce development projects
- DMI Stories from the Field

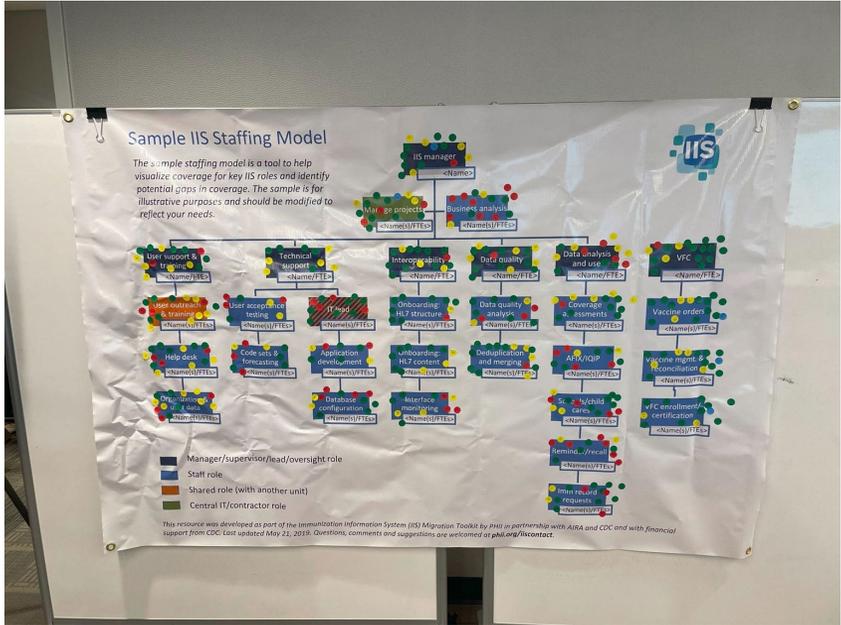

How PHII supports IIS

PHII supports IIS with a portfolio separated into two streams:

Workforce development

Technical assistance

phii.org/iishub

informatics
ACADEMY

A
PROGRAM
OF

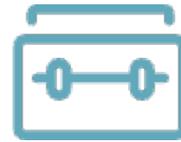

PUBLIC HEALTH
INFORMATICS
INSTITUTE

Offers training, learning solutions and resources for public health staff, healthcare providers and partners supporting and using IIS.

Technical assistance (TA) offerings and resources

**Best practices and
standards guidance**

**Toolkits and operations
tools**

Learning community

PHII offers TA in three ways – standards and best practices, toolkits and a learning community to help you apply the developed tools.

Standards and best practices

Immunization Information System (IIS) Functional Model

The IIS Functional Model presents a framework and terminology for conveying and communicating the core functions, capabilities and attributes of IIS. These systems, whether as a single integrated IIS or as a set of interoperable modules, support public health immunization programs in achieving the **CDC IIS Functional Standards** and in providing trusted data and information to improve clinical immunization practice, increase vaccination and reduce vaccine-preventable disease.

The model also serves as a companion and index to the **IIS Baseline Requirements Traceability Matrix (RTM)**, which provides detailed requirements across IIS functions, capabilities and attributes. The RTM and other requirements tools can be found at phii.org/iis-requirements.

IIS Core Functions and Capabilities

These functions and capabilities represent core functionality of IIS. Refer to the **IIS Baseline RTM** for descriptions and functional requirements associated with each.

Administer System	Manage Organizations & Facilities	Manage Users
<ul style="list-style-type: none"> Hierarchy configuration System configuration User roles & permissions System alerts 	<ul style="list-style-type: none"> Organization/facility search Add, edit, inactivate organization/facility VFC/vaccine program enrollment Organization/facility outreach 	<ul style="list-style-type: none"> User search Add, edit, inactivate user Authentication & authorization Password management
Support Interoperability	Ensure Data Quality	Evaluate & Forecast
<ul style="list-style-type: none"> Onboarding Interfaces Data exchange 	<ul style="list-style-type: none"> Patient matching & deduplication Vaccination event matching & deduplication 	<ul style="list-style-type: none"> Clinical decision support Reminder/recall Coverage reports
Manage Patient & Immunization Records	Manage Vaccine Inventory	Provide Data Access
<ul style="list-style-type: none"> Patient search Add, edit patient demographics Patient status Patient consent Add, edit patient immunization Print/export record Mass vaccination 	<ul style="list-style-type: none"> Vaccine inventory search Add, edit vaccine inventory Vaccine ordering Review/approve order Vaccine decrementing Vaccine inventory reconciliation Vaccine transfer Vaccine wastage Vaccine expiration 	<ul style="list-style-type: none"> Standard reports Print/export reports Ad hoc queries & reports Consumer access

IIS Attributes

These attributes represent the technical characteristics of an IIS necessary to support immunization programs and stakeholders. Refer to the **IIS Baseline RTM** for descriptions and non-functional requirements associated with each.

Performance Efficiency	Usability	Reliability	Security	Maintainability	Portability
<ul style="list-style-type: none"> Time behavior Resource utilization Capacity 	<ul style="list-style-type: none"> Operability User error protection Accessibility 	<ul style="list-style-type: none"> Availability Fault tolerance Recoverability 	<ul style="list-style-type: none"> Confidentiality Non-repudiation Accountability Authenticity 	<ul style="list-style-type: none"> Analyzability 	<ul style="list-style-type: none"> Adaptability Installability

RTM WEBINAR: USING THE REQUIREMENTS TRACEABILITY MATRIX (RTM) EFFECTIVELY

A WEBINAR FROM PHII IN OCTOBER 2022 WALKED ATTENDEES THROUGH HOW TO USE THE RTM TO DEVELOP IIS REQUIREMENTS.

TA: IIS toolkits

A roadmap to guide users through an IIS platform migration or other large-scale IT project

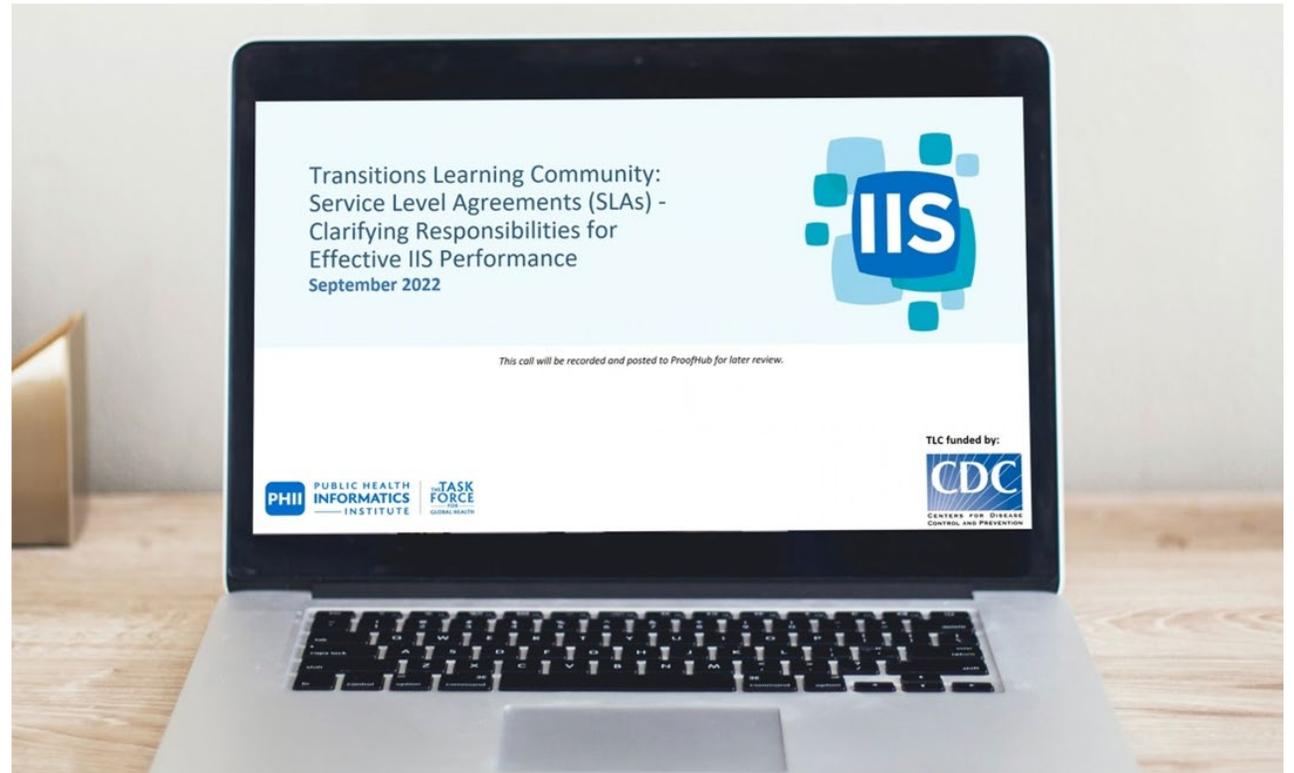

A deep-dive into the three phases of a procurement process

Tools and templates to support day-to-day operational tasks related to managing and supporting an IIS

TA: Transitions Learning Community (TLC)

Community to provide support and guidance to programs that are transitioning to a new IIS platform or implementing other complex IT transitions

Workforce development (WFD) offerings and resources

Aim to **strengthen** IIS performance by providing **foundational** and **specialized** competency-based **training** to equip workforce with **knowledge, skills** and abilities through:

- **Staffing**
- **Capacity building**

IIS Core Competency Model

IMMUNIZATION INFORMATION SYSTEM (IIS) CORE COMPETENCY MODEL

IIS Workforce Classifications

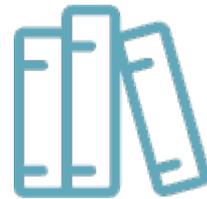

Sample role descriptions:

- 1) IIS Manager
- 2) Interoperability Analyst
- 3) Project Manager
- 4) Data Quality Analyst
- 5) Epidemiologist
- 6) Help Desk Specialist I & II
- 7) Training and Outreach Analyst
- 8) Data Analyst
- 9) Business Analyst
- 10) Testing Analyst
- 11) Deduplication Analyst

IIS e-learning courses

Informed decisions. Healthier populations.

**Fundamental
IIS courses**

**Advanced IIS
courses**

**Other public
health courses**

The Informatics Academy offers online courses to help IIS professionals expand their skills and knowledge.

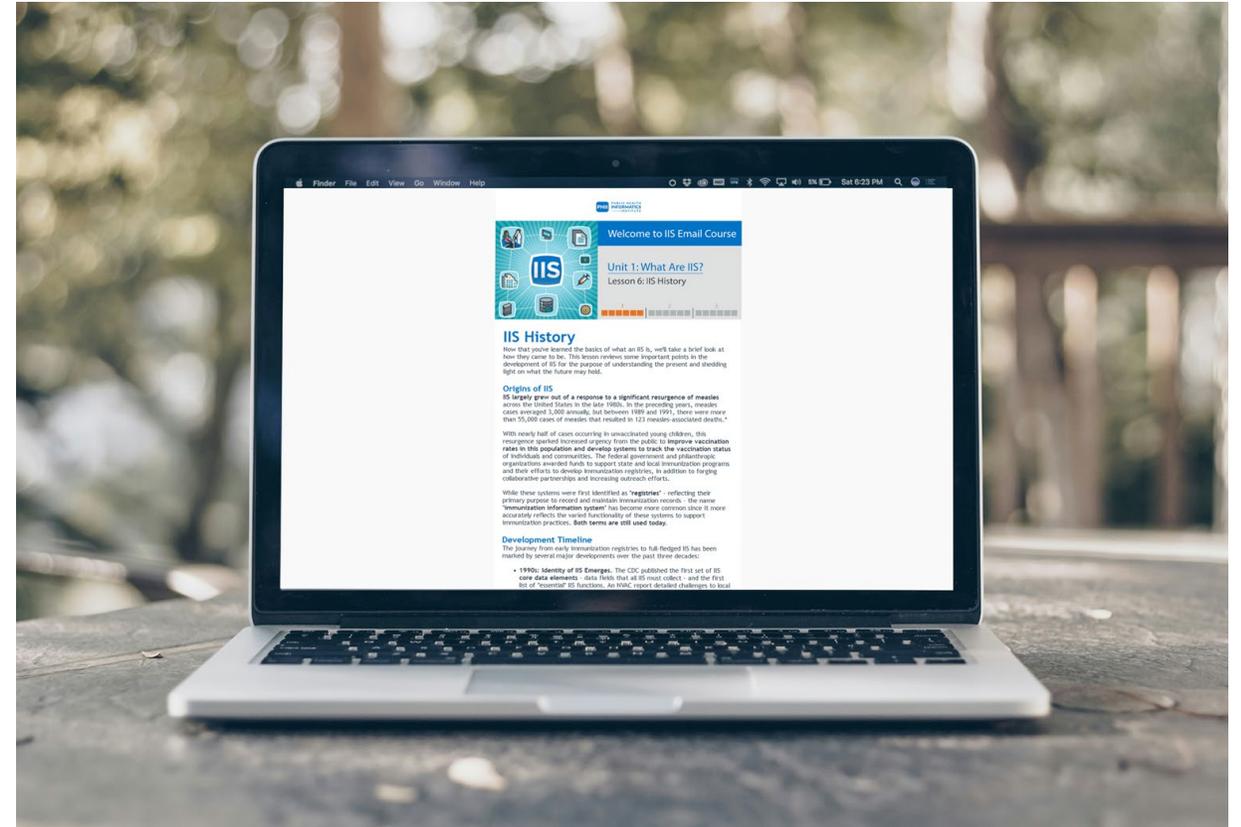

WFD: Capacity building courses

Email course

- Welcome to IIS

Updated eLearning courses

- Fundamentals of IIS: Interoperability
- Fundamentals of IIS: Data Quality
- Fundamentals of IIS: HL7 Basics
- Advanced HL7 for IIS
- Immunization Evaluation and Forecasting

WFD: New capacity building resources

New eLearning courses

- Communication and Change Management
- IIS Data Use and Evaluation

Coming soon

- Leadership and Management
- Training

Curriculum mapping

- Guidance for designing a training curriculum for each of the PHII-developed role descriptions

PHII Data Modernization Stories from the Field

- PHII tells stories of U.S. jurisdictional DMI journeys
 - Stories include narrative webpages, videos and podcasts
 - Stories are available at phii.org/dmi-stories
- New stories found at
 - Michigan IIS (also available at phii.org/iishub)

Current State on Childhood Immunization

Decreased
vaccine
confidence

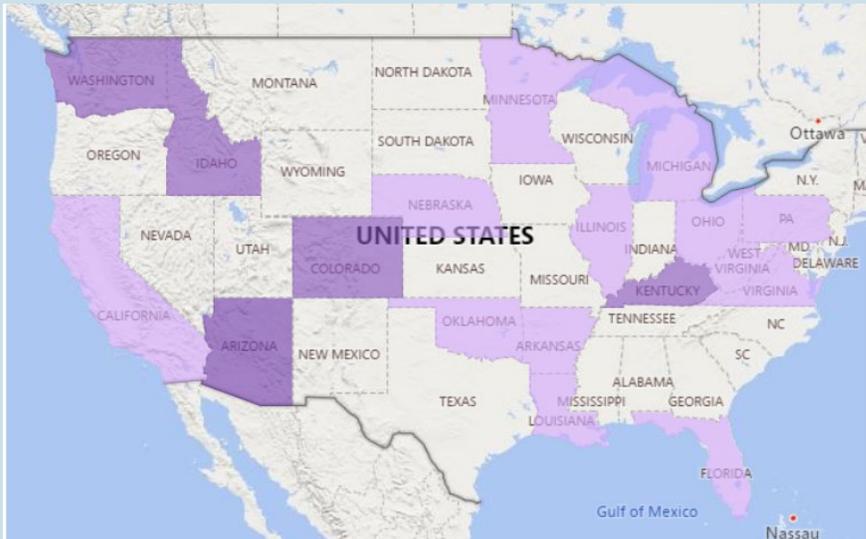

Decreased
pediatric rates

Significant
disparities
between
communities

Immunization Partnership Grants

1. Address social determinants
2. Reduce health disparities
3. Organizations most capable to impact communities

- Grants awarded to 23 organizations to implement community-based vaccine initiatives across 3 grant programs
 - HPV/Flu
 - Routine Immunizations
 - COVID-19/RSV/Flu
- February 2023 – February 2024
- AAP chapter and local organizations prioritizing rural, under-resourced, historically hesitant communities, or children < 5
 - 32% children < 5
 - 61% rural
 - 100% under-resourced

Key Lessons Learned: Using Hyperlocal Strategies

Community
Partnerships

Vaccination
Events*

Social Media
Campaigns

Promotional
Materials

Some grants went to community-based organizations who used hyperlocal strategies which were tailored to their specific communities.

- Partnerships established with family physicians, pharmacies, community-based organizations, schools/childcare centers, etc.
- Key messengers varied by community and included churches, civic leaders, and barbers.
- AAP helped to customize public facing immunization resources based on community's needs.

Data Needs and Recommendations

Key Lessons Learned: Gathering Data for Evaluation

Data Disaggregation and Accessibility

- Evaluating projects focused on reducing disparities requires disaggregated and accessible data including:
 - Demographics (zip code, county, age, geography, race, ethnicity, language)
 - Outcome data (immunizations administered and respective gaps)
- Visualizing data in interactive dashboards increases access to data and ability to dynamically filter data by intersectionality of identities.
- Useful for understanding which communities and demographic intersections have the lowest immunization rates and evaluate if the interventions make a difference.

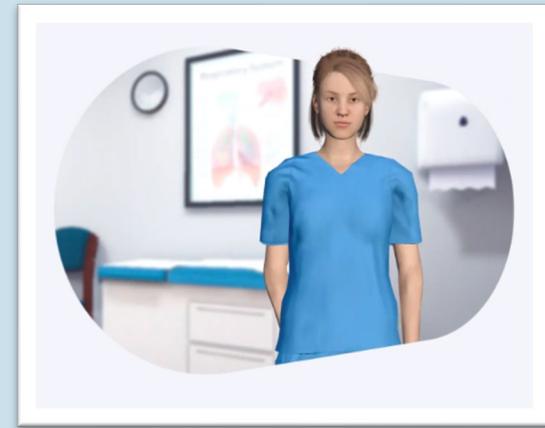

Evaluation Wish List

Immunization Information Systems

- Geographic data to highlight community needs
- Standardized and centralized jurisdictional immunization data
- Quantitative community intervention outcome and impact data
- Disaggregated local and community-specific immunization data
- Communication and integration of data systems between clinics and across state lines

Increasing Immunization Confidence

New Virtual Reality Simulation Module

- New [simulation module](#) to educate pediatricians and other members of the health care team to have effective immunization conversations.
- Module includes various clinical scenarios and guides learners through providing a strong immunization recommendation and motivational interviewing.
- The module is free and accessible through a VR headset, computer, or mobile device.

Learner Objectives:

Across a series of activities in this module, learners will have an increased understanding of how to:

- Establish a culture that promotes immunization confidence
- Provide a strong immunization recommendation
- Respond to hesitant parents and caregivers with empathy using motivational interviewing
- Tailor their communication to different individuals and situations
