

## International Patient Summary And International Travel Use Case

AIRA 2025 National Meeting

# AIRA 2025 National Meeting Presenter

---

**Chris Baumgartner**

*Deputy Chief Informatics Officer*

Washington State Department of Health

---

WHERE WE HAVE BEEN

# Background

- Digital vaccine verification in Washington State using SMART Health Cards
- Successful Public-Private-Academic partnership
- Leveraged the shareable components and reusable code
- Rapid 8-week development, deployment, and testing
- Currently available in 52 languages
- Nearly 2 million verification requests since launch (October 2021)
- Demoed printed cards at HIMSS23 Interoperability Showcase

# Multi-Language Accessibility

- Language is selected or auto-translates to the language pre-selected within system or browser settings.
- **WA Verify's 52 supported languages represents the most of any Verifiable Clinical Information (VCI) issuer.**

# Smart Health Links Demo

---

- Utilizing the International Patient Summary (IPS) Standard
- Patient directed key verifiable clinical data for travel
- Embedded URL in a QR code that links to data and/or FHIR endpoints
- [Patient Summary Demo Link](#)

# Tabletop Discussion Questions

---

- How can use of USCDI and SMART Health Links benefit lifelong immunization history and other data types?
- What are the opportunities and challenges of this tool with regards to interoperability and optimal patient care during international travel?
- What ideas do you have on how immunization data could be leveraged for other use cases by engaging professionals in the Immunization Information Systems community?

Questions?
