AMERICAN IMMUNIZATION REGISTRY ASSOCIATION

AGENDA

AIRA Members & Partners Meeting **Monday, July 21, 2025** **2–3 p.m. ET**	**To join the meeting:** • REGISTER FOR THE MEETING

Each presenter will have five minutes to give an update.

Welcome		*Melissa Mickle-Hope*
American Immunization Registry Association (AIRA) Update		*Rebecca Coyle*
CDC/NCIRD/ISD		*Tara Jatlaoui*
Association of Immunization Managers (AIM)		*Katy Gore*
Public Health Informatics Institute (PHII)		*Tony Winters*
Association of State and Territorial Health Officials (ASTHO)		*Kim Martin*
Immunize.org		*Laurel Wood*
American Academy of Pediatrics (AAP)		*Katie Milewski*
Office of the National Coordinator for Health Information Technology (ONC)		*Rachel Abbey*
National Association of County and City Health Officials (NACCHO)		*Matthew Bobo*

American Immunization Registry Association (AIRA) Update

Rebecca Coyle

Discovery Sessions

Attendance

- 2025 Average Attendance: **90 participants**

Recently Covered

- AIRA 2025 National Meeting Highlights (May)
- Connect, Learn, Grow: AIRA Opportunities at a Glance (June)

Up Next

- **July:** Unlocking the Future: Emerging Standards in Focus
- **August:** No Discovery Session

IIS Managers Collaborative

Attendance

- 2025 Average Attendance: **52 participants**

Recently Covered

- COVID-19 Funding Directive (March)
- IIS Staff Training (May)

Up Next

- **July:** Let's Talk Talent: IIS Staffing & Training, Part II
- **September:** To Be Determined

Resource Development Recommendations Workgroup (RDRW)

- Recently concluded the second cycle of RDRW
- Executive Brief shared priorities for future resource development
- Our thanks to RDRW co-chairs and members for generously sharing your knowledge and expertise

Regional Workshops

- Regional Workshops will be held the week of July 28, 2025, in Salt Lake City, Utah
- We’re currently finalizing session content
- Topics will include discussion of:
  - IIS activities
  - Measurement and improvement
  - Data quality
  - Jurisdictional use of IIS data
  - Artificial intelligence
  - Data modernization

National Immunization Awareness Month

- August is NIAM
- Campaign with a social media toolkit coming soon!

*2024 graphic for reference only

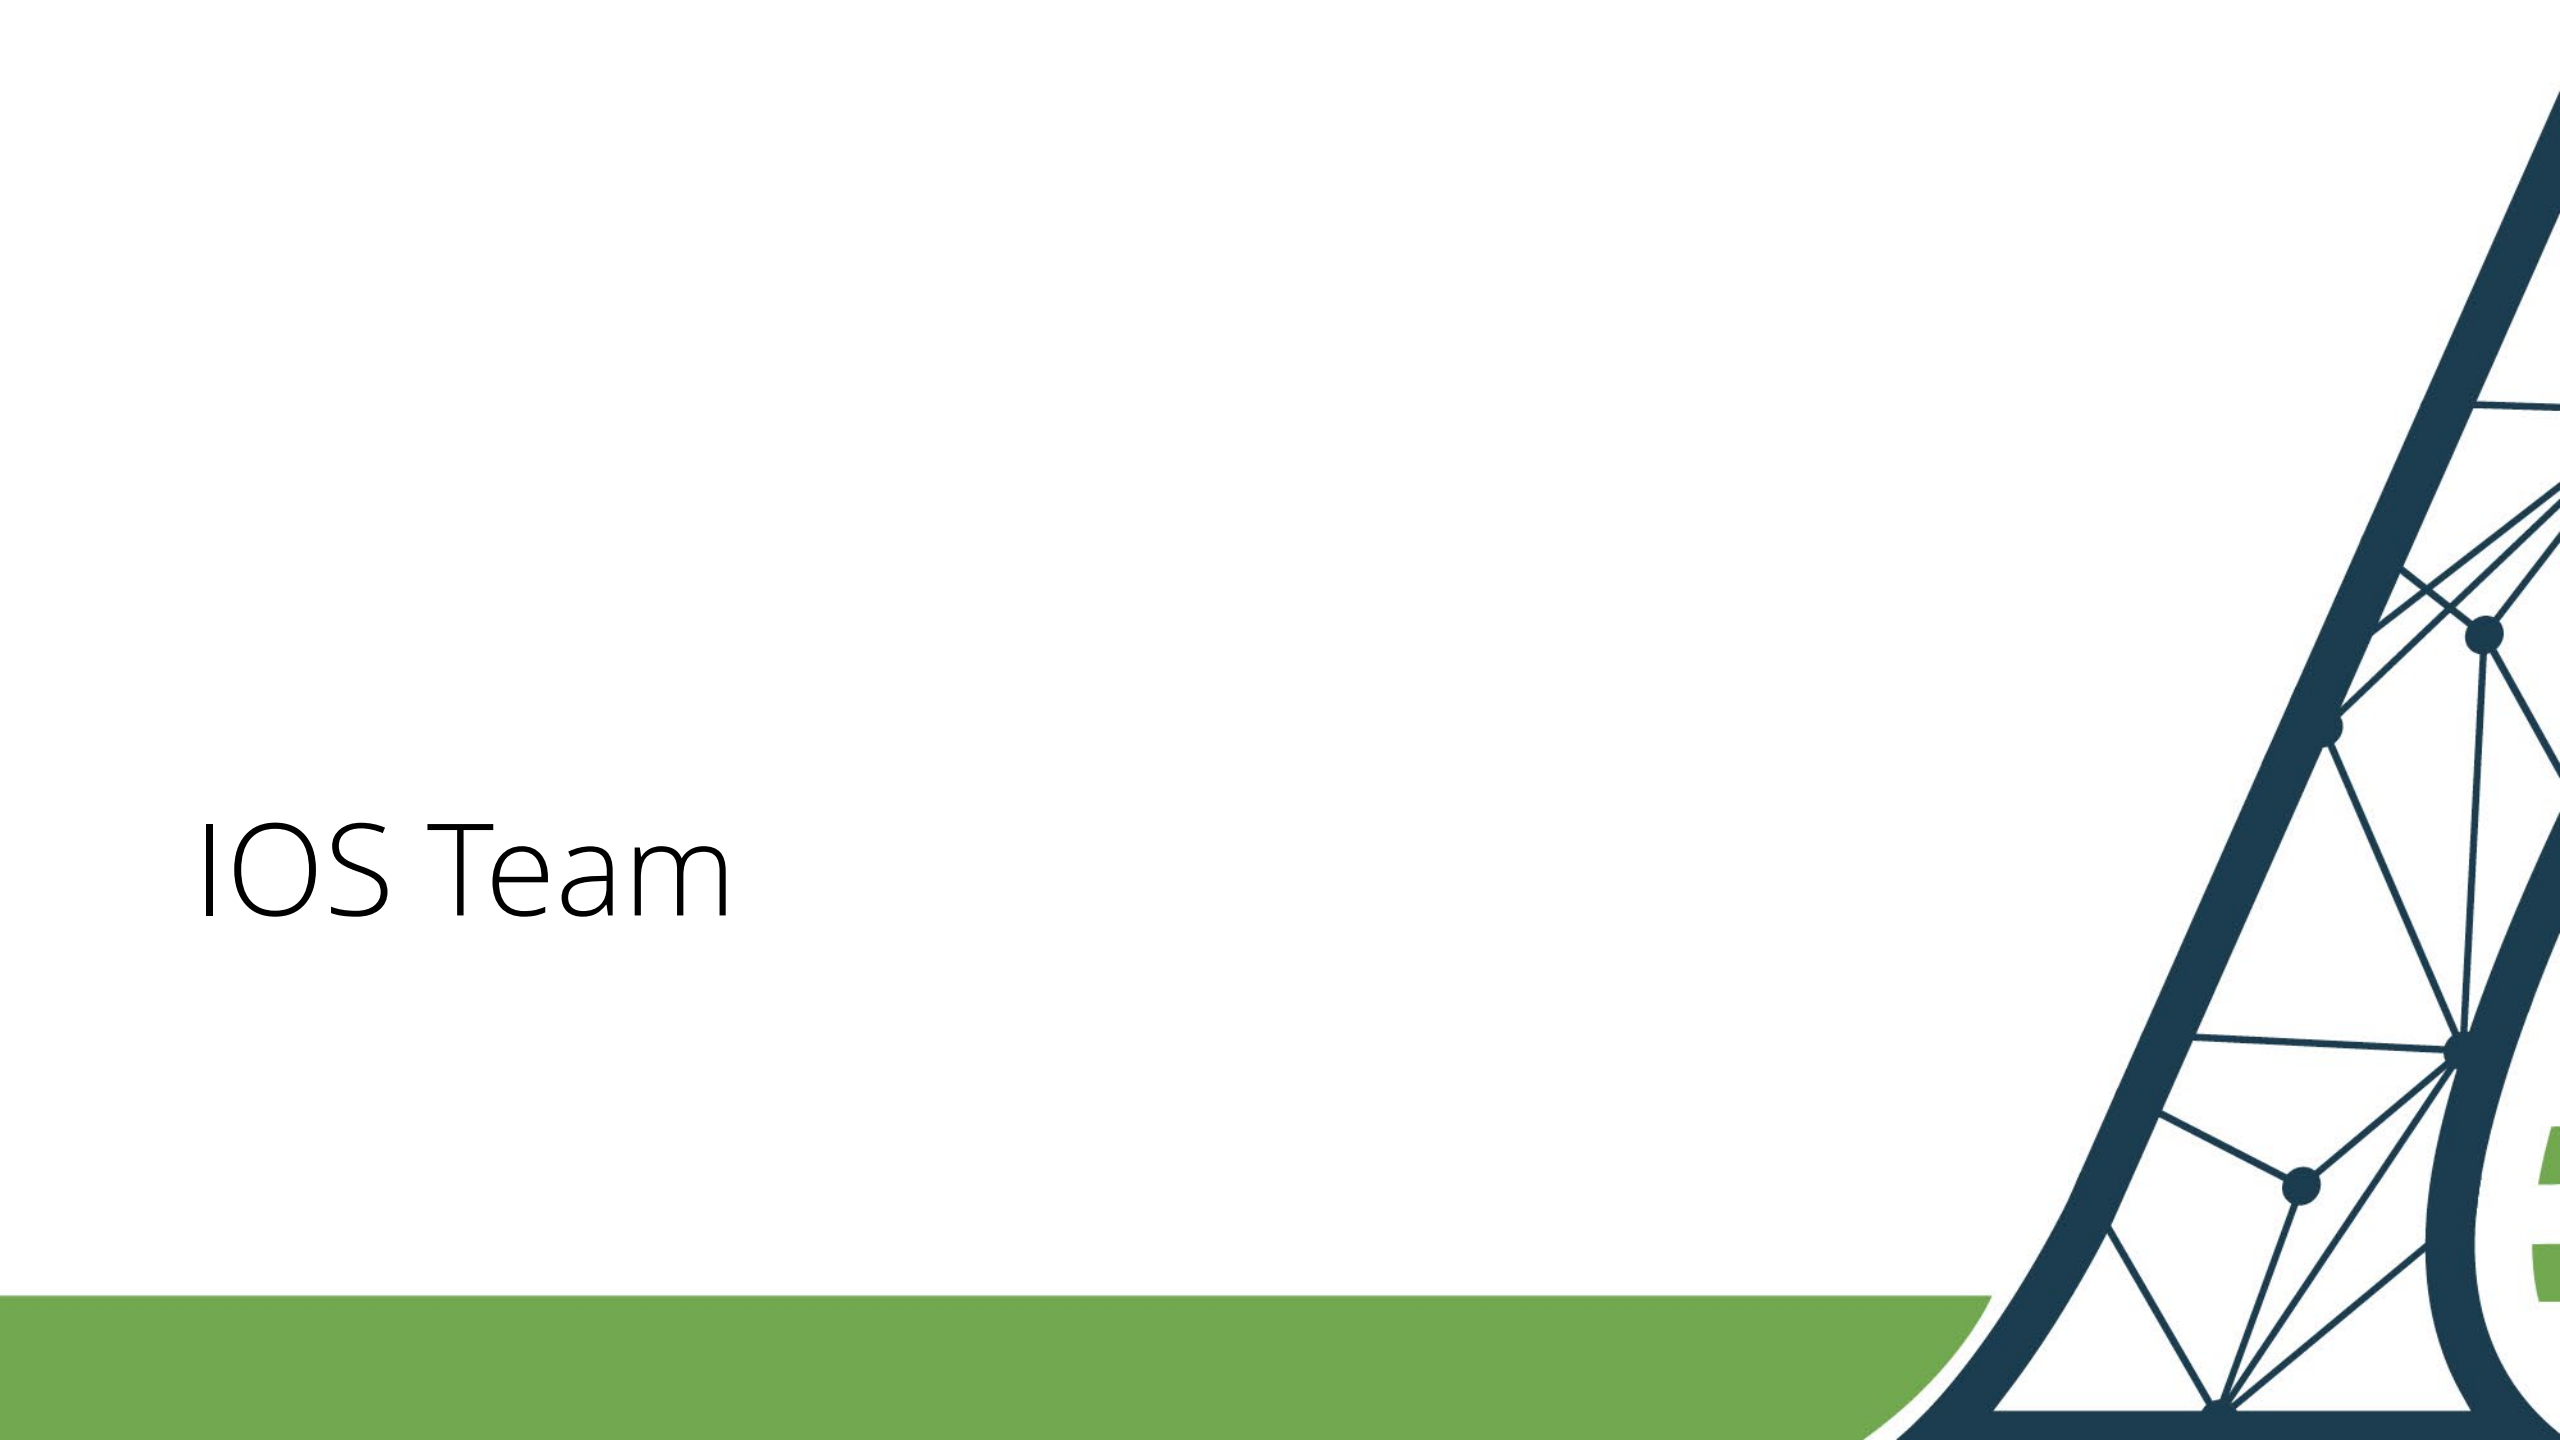
Coming Soon: IIS 101 Video

- **What:** 2-minute animated video
- **Purpose:** To educate viewers about the purpose and value of IIS
- **When:** Final version expected July 31

And stay tuned for info about AIRA **2026**!

We’re working on it!

IOS Team



On-Demand Training Now Available:
Provider Organization Onboarding for IIS

Now available as an on-demand course!

- Sessions 1 and 2 are available in the on-demand format
- Sessions 3 through 6 live recordings are available upon request

Course registration information is located on the AIRA website under Ongoing Efforts > Onboarding Shared Services

New AIRA e-Learning Course

HL7 Immunization Update (ACK) Messages

Launching late July 2025

- On-Demand
- Explore an in-depth review of HL7 v2.5.1 Acknowledgment (ACK) messages and their critical role in supporting immunization data interoperability
- Content focuses on ACK message structure, key segments (MSH, MSA, ERR), and how ACKs communicate VXU processing outcomes to support data quality and troubleshooting efforts
- **Ideal for** individuals with prior experience in HL7 immunization messaging and interoperability, especially those supporting HL7 v2 interfaces

AIRA Officers Election

- President: Marie Hartel
- President-Elect: Miriam Muscoplat
- Governance Committee Chair: David Crowell
- Treasurer: Steve Murchie*
- Secretary: Kim Gulliver

Terms begin October 1, 2025

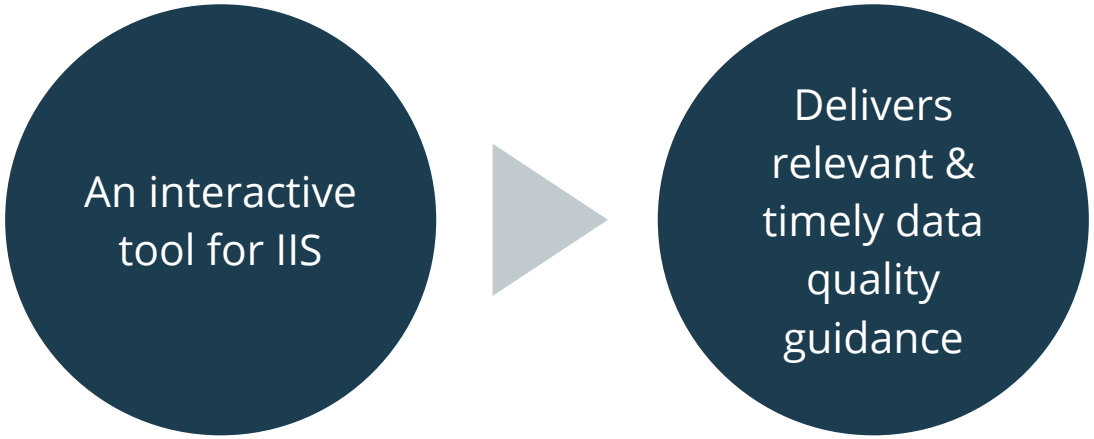
*Non-IIS seat

AIRA Directors Election

There are **four** director vacancies:

- 3 vacancies for **IIS directors**
- 1 vacancy for a **non-IIS director**
- July 23 – August 8: AIRA voting members vote
- Mid-August: Results will be announced
- October 1: Terms begin

Demo: IIS Data Quality Resource Hub



Tuesday, July 22

- 12 – 1pm ET

To participate, email jdial@immregistries.org

IIS Data Analyst Forum (IDAF)

- Online community
- Chat in real-time
- Post & respond to questions
- Be notified of new activity
- Contact others directly
- ~200 users

Join IDAF here!

See what the buzz is about!

CDC/NCIRD/ISD

Tara Jatlaoui

American Immunization Registry Association

Monday, July 21, 2025

Tara Jatlaoui, MD, MPH
Acting Branch Chief, Informatics and Data Analytics Branch

Strategic Priorities for IISs

CDC's data modernization efforts ***accelerate data into action*** supporting the vaccine journey from when vaccines are approved to when vaccine data are leveraged to inform public health decisions.

Technology Infrastructure

- Meet **IIS Functional Standards** to increase standardization of IIS functionality and data elements and support program and provider immunization processes.
- Test functionality to ensure standardization using AIRA's Measurement and Improvement Initiative.

Data Quality

- Improve data quality through use of **IIS Data Quality Blueprint** to prioritize meaningful, quantifiable measures and **IIS Data Quality Reports** to identify actionable improvements.

Data Exchange

- Increase interoperability and data sharing between jurisdictions and providers via **IZ Gateway.**
- Use **PPRL** to allow cross-jurisdiction data matching.

Community Engagement

DUA Addendum

Submission Process

1

Jurisdictions to **review, sign and return the Data Use Agreement (DUA) Addendum** to IISinfo@cdc.gov (cc'ing their IIS SME and IOSB Project Officer) on or before **October 1**.

2

CDC to upload the DUA Addendum to the Vaccines for Children (VFC) Cooperative Agreement Management Platform (CAMP) on the jurisdiction's behalf.

3

Jurisdictions to **submit timely data** beginning with the **next submission deadline** after the DUA Addendum is fully executable.

Reminders

- Jurisdictions with **automatic data submission** may work with their technology partner to **pause submission** until the DUA is signed.
- Per the NOFO requirement, jurisdictions are required to submit monthly aggregate and quarterly record-level data (unless citable state law or statute requires otherwise).

Update: IIS Functional Standards and Indicators

CDC worked with the IIS community to update the IIS Functional Standards, which outline the necessary operations, data quality, and technology for IISs.

Version 5.0 represents a scheduled update to align with the 317/VFC Cooperative Agreement that starts on July 1, 2025.

Updated standards are available at IIS Functional Standards

New functional standards and 317/VFC CoAg emphasize:

- Data Quality
- Emergency Response
- Modernization

Indicators

- Support jurisdictions in **setting incremental goals** and **measuring progress** on the CoAg activities
- Provide CDC with a standard way to **determine how well jurisdictions meet CoAg requirements**
- Help CDC to identify **opportunities for technical assistance** to jurisdictions

IIS Data Quality Indicators

- Measure progress toward meeting IIS Data Quality Blueprint targets
- Rely substantially on **objective measures** (e.g., measurement & improvement, quarterly routine vaccination data, IZ Gateway status reports)
- Form the basis for IIS Data Quality Certification

PHIG and MIIS Performance Measures Due August 25

CDC uses A3 Modernizing IIS (MIIS) performance measures to evaluate IIS modernization efforts funded by the Public Health Infrastructure Grant (PHIG) A3.

PHIG A3 MIIS Performance Measures:

1. Progress on execution of PHIG A3 MIIS Supplemental Grant.
2. Improvement in IIS data quality resulting from the PHIG A3 MIIS Supplemental Grant.
3. Number and type of IIS enhancements advancing the IIS toward IIS Technology Certification.

Upcoming Submission: Mid-Year Progress Report

- **What to submit:** The first performance measure, a mid-year update on progress on execution of PHIG A3 MIIS Supplemental Grant.
- **Performance period:** December 1, 2024, through May 31, 2025
- **Due date:** August 25, 2025
- **Where to submit:** Public Health Infrastructure Virtual Engagement (PHIVE) System

Resuming Regular Technical Communications

IIS Information Brief

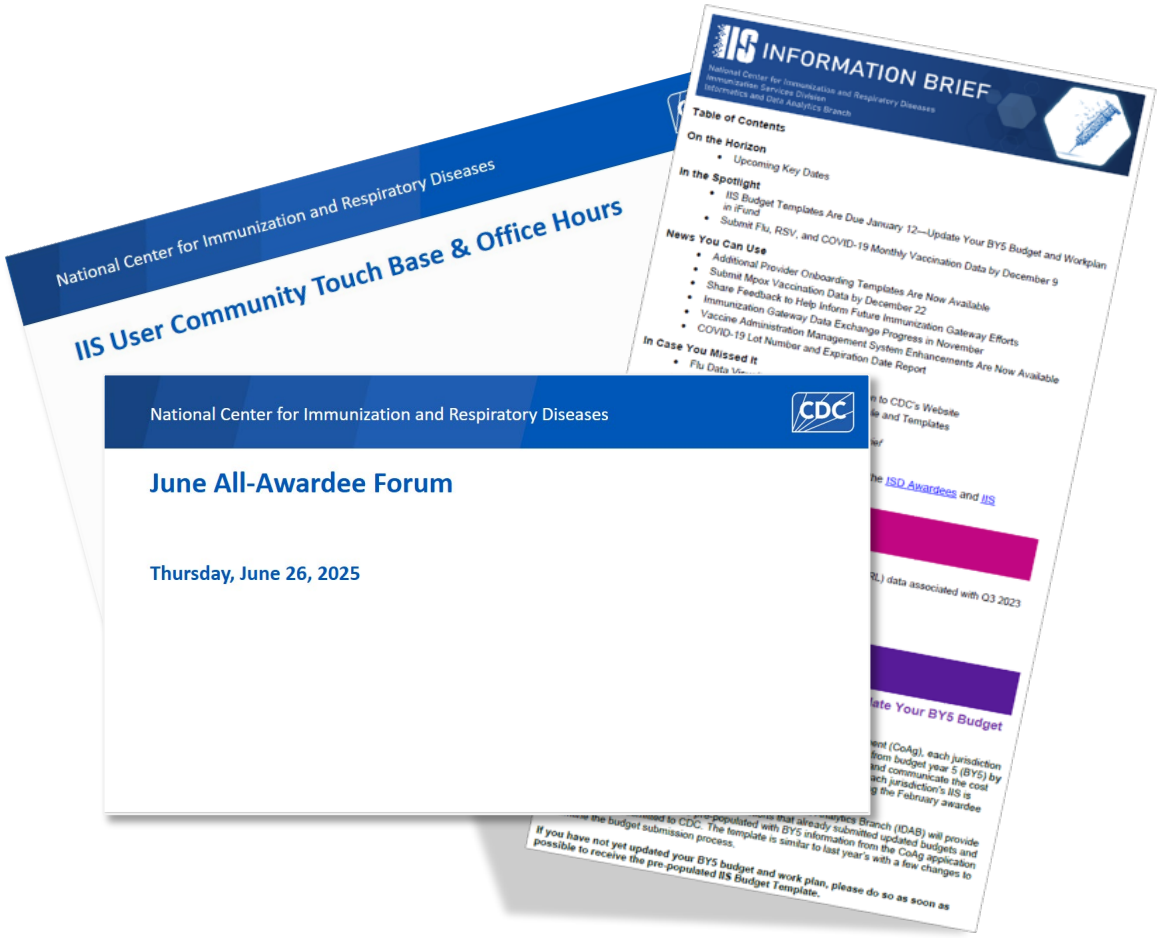
- New cadence: twice a month on Wednesday
- Next target release day: **July 23**

IIS All-Awardee Forum

- Resuming monthly forum
- New meeting platform: Microsoft Teams
- Next forum: **July 24 at 2pm ET**

IIS User Community Call & Office Hours

- New cadence: monthly
- Meeting platform: Microsoft Teams
- Next call: **August 5 at 1pm ET**



Association of Immunization Managers (AIM) Update

Katy Gore

AIM Update

Katy Gore, Vaccine Access Policy Associate Director

July 21, 2025

Association of Immunization Managers

Utilizing Social Media to Promote Adolescent Immunization

- Tuesday, August 12, from 4-5 pm ET.
- This session will address ongoing challenges in achieving high rates of routine adolescent vaccinations by offering innovative strategies for effectively communicating with and educating teens about immunization through social media.
  - **Taylor Lombard**, researcher and medical student at Michigan State University, will present findings from her study on "The Role TikTok Plays in the Conversation about HPV Vaccination."
  - **Rebekah Fenton**, MD, MPH, FAAP, adolescent medicine specialist and online health communicator, will share insights on how to effectively reach and educate adolescents with health information.
  - **Judy Klein**, president of UNITY Consortium, will share a recap of Adolescent Immunization Action Week 2025 and highlight other adolescent immunization resources from UNITY.
- **Register here for the webinar.** Please contact Rachel Van Gundy at rvangundy@immunizationmanagers.org with any questions.

Building and Sustaining an Immunization Coalition: The Secrets to Success

AIM Webinar on August 13 from 3-4pm ET

Join AIM to learn how immunization programs and vaccine champions can collaborate to build, maintain, and sustain strong immunization coalitions. Attendees will hear from two immunization programs and two coalitions on their partnerships and tips for success.

- Speakers:
  - Dave McCormick, Program Manager, Indiana Department of Health
  - Lisa Robertson, Executive Director, Indiana Immunization Coalition, Inc.
  - Terry Clark, Immunization Outreach Specialist, Virginia Department of Health
  - Andrea Medes, Immunization Outreach Coordinator, Virginia Department of Health
  - Rebecca Epstein, Senior Program Manager, ImmunizeVA
  - Bel Kelly-Russo, Program Associate, ImmunizeVA

Register Here

Questions? Email mmelton@immunizationmanagers.org.

Registration is OPEN!

Pricing:

- $900 early-bird (through Oct. 14)
- $1,200 Nonprofit Exhibitor (includes one registration)

Hotel Information:

- Riviera Resort & Spa Palm Springs
- Group Rate: $186/night + taxes & fees

Featuring:

- Plenary sessions from leaders in public health, leadership development training, programmatic breakouts, AIM awards, collaborative meeting opportunities with colleagues, and networking opportunities with partners in the immunization space.

Register at: www.immunizationmanagers.org > News & Events

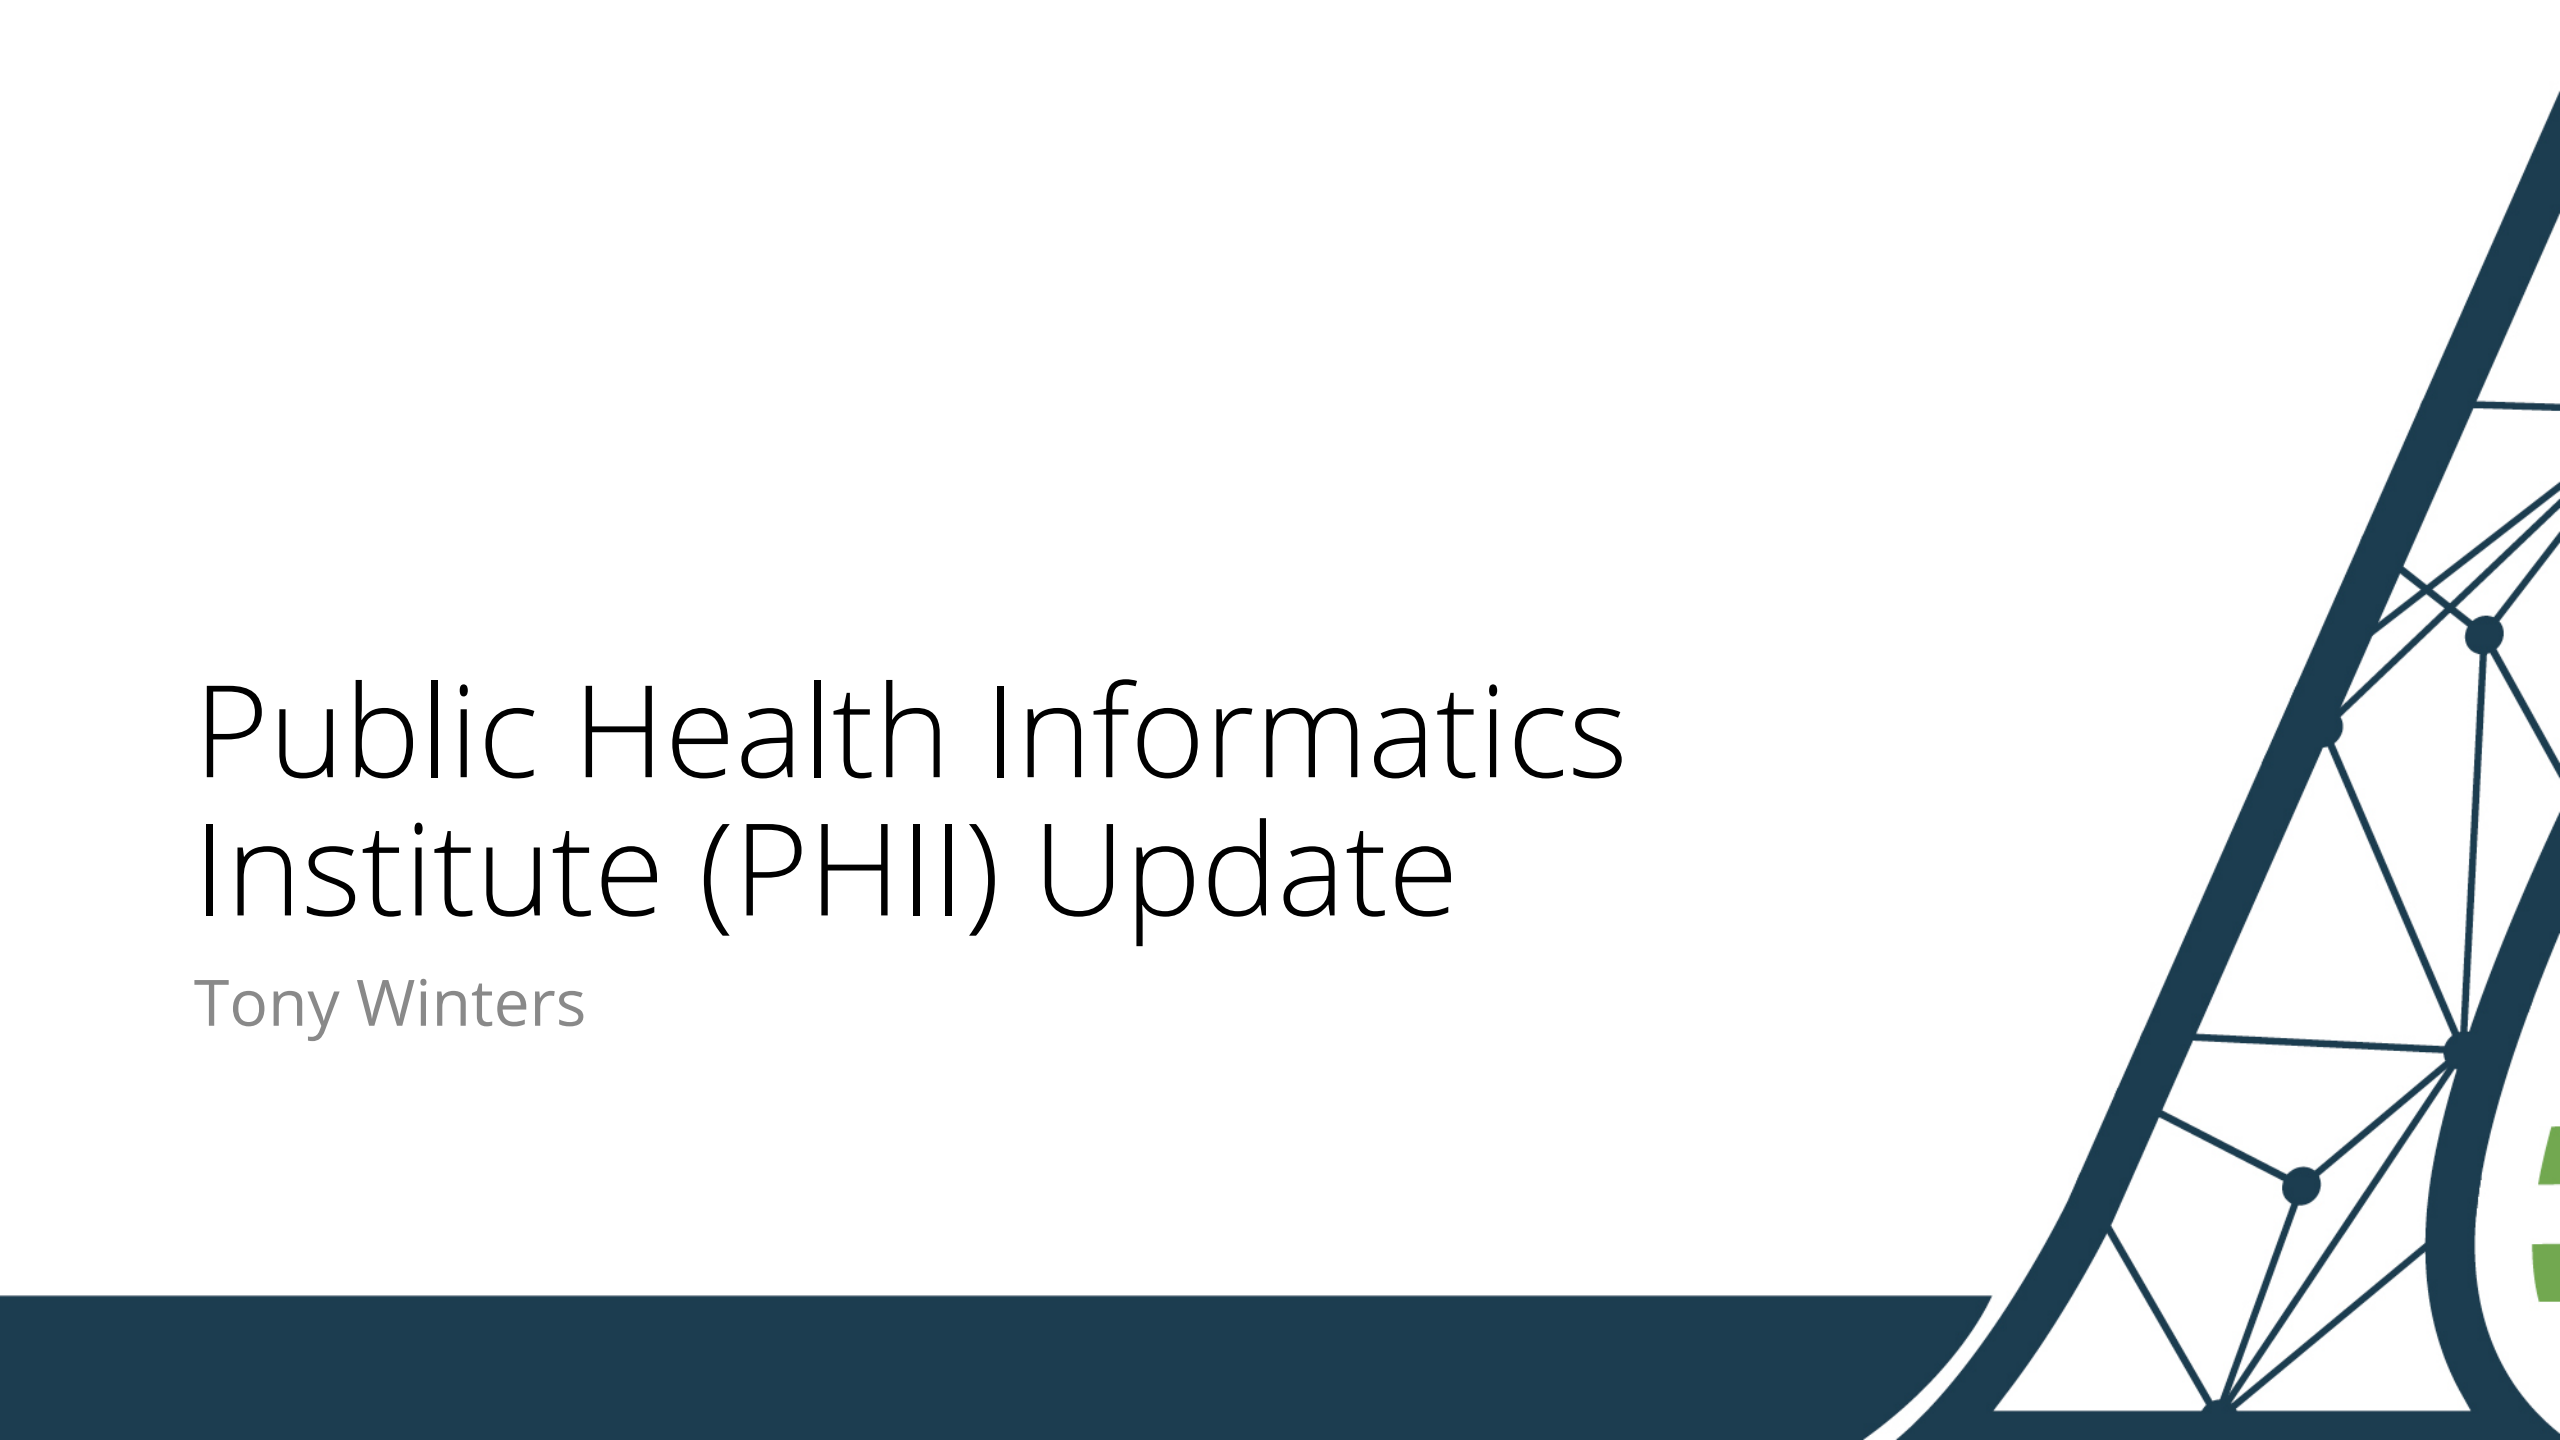
Tony Winters



AIRA Member and Partners Quarterly Update

Public Health Informatics Institute (PHII)

July 21, 2025

IIS

PHII PUBLIC HEALTH INFORMATICS INSTITUTE | THE TASK FORCE FOR GLOBAL HEALTH

2025 Webinar Series

Procurement

Recordings are available on the PHII IIS Hub

- Individual recordings for each phase:
  - Acquisition planning
  - Solicitation
  - Pre-award/award

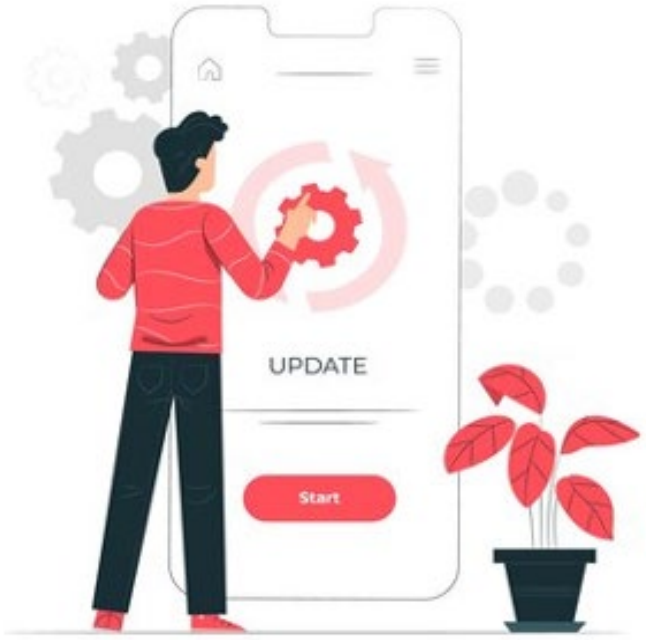
The IIS Procurement Toolkit is an additional resource for all jurisdictions

PPRL

Recordings will be available on the PHII IIS Hub soon

- Two recordings:
  - Overview of PPRL
  - Benefits of PPRL

Requirements Traceability Matrix (RTM) Update



- Clarify requirements to improve understanding
- Ensure consistency of language across RTM and FS
- FS crosswalk modified to map to the FS Guidance Statements to the RTM and Non-Functional tabs
- Updated RTM posted to PHII IIS Hub under Operations Tools

IIS eLearning

The Providers' Role in Supporting Immunization Information Systems Data Quality

- Newly released course for the provider audience
- Enhance providers' understanding of their role in ensuring high-quality IIS data
- Available through the PHII Informatics Academy

Offers training, learning solutions, and resources for public health staff, healthcare providers, and partners supporting and using IIS

States Reassessing Vaccine Policy and Public Health Powers

JUNE 09, 2025 | SHALINI NAIR, ANDY BAKER-WHITE

Immunization is a key pillar of public health, crucial for protecting communities and preventing infectious diseases from spreading. State and territorial health officials and their departments play critical roles in setting and implementing immunization requirements, managing disease surveillance and outbreak response, and ensuring access to vaccines. In recent years, however, the immunization landscape changes alter public vaccines. As these chall officials must be informe programs' continued eff

ASSOCIATION OF STATE AND TERRITORIAL HEALTH OFFICIALS

Home / Our Work / Resource / **Impact of the ACIP Recommendations on State Law**

Impact of the Advisory Committee on Immunization Practices Recommendations on State Law

JUNE 23, 2025

The Advisory Committee on Immunization Practices (ACIP) was formed in 1964 to "provide ongoing expert advice to the [HHS] Secretary on federal immunization policy." Today, ACIP makes recommendations to CDC about vaccines with a focus on the control of vaccine-preventable diseases. ACIP recommendations help inform clinical and public health practice and include: "(1) the age and other population groups (e.g., by sex, occupation) recommended to receive that vaccine; (2) the recommended age or frequency to receive each dose and the interval between doses (for multidose vaccines); and (3) any precautions and contraindications." The CDC director reviews ACIP's recommendations and decides whether they should be formally adopted.

While ACIP recommendations are just that, recommendations and not requirements, they have a far-reaching impact on vaccine policy with nearly 600 statutes and regulations across 49 states, three territories, and Washington, D.C., referencing ACIP. These laws often direct the use or consideration of ACIP recommendations in developing or implementing state or territorial vaccine policy. If the ACIP recommendations change, then any state or territorial policy that depends on them will be altered as well.

References to ACIP recommendations appear in several different areas of vaccine policy including state and territorial laws related to:

Community Engagement Toolkit

Over the last several years, ASTHO, in partnership with the National Community Action Partnership (NCAP), has worked with five community action agencies and a network of partners to use locally-tailored evidence-based strategies to increase vaccine acceptance and uptake.

A new toolkit has been developed to help health agencies seeking to establish and strengthen these partnerships. The toolkit includes:

- Examples of successful collaborations that have improved vaccine distribution and promoted health
- Practical guidance to sustain these partnerships over time by focusing on alignment of shared outcomes and strategic use of resources

ASSOCIATION OF STATE AND TERRITORIAL HEALTH OFFICIALS

Home / Our Work / Toolkit / **Strengthening State Immunization Infrastructure Through Public Health-Community Action Partnerships**

Strengthening State Immunization Infrastructure Through Public Health-Community Action Partnerships

JUNE 30, 2025 | GEETIKA NADKARNI, SHALINI NAIR

Executive Summary

Community Action Agencies (CAAs) embody hope and drive change by connecting individuals and families to vital resources — like job training, affordable housing, and health care — that improve lives and strengthen communities. Partnerships between state public health agencies and the **national Community Action network** present a novel, sustainable approach to enhancing existing public health initiatives — and are particularly effective in reinforcing infrastructure to provide routine recommended immunizations. This toolkit aids health agencies seeking to establish and strengthen these partnerships, organized into the following sections:

- **What Is Community Action?** An overview of the Community Action network, highlighting its role in advancing community engagement and supporting health-related initiatives.
- **Public Health and Community Action**: Examples of successful collaborations between state health agencies and Community Action partners that have improved vaccine distribution infrastructure and promoted broader community health.
- **Partnering with Community Action**: Practical guidance for establishing and sustaining partnerships, including key considerations for joint implementation, such as focusing on strategic use of resources, collective evaluation, and alignment around shared outcomes to support sustainable

S/THO Roadmap

- We have brought together key stakeholders, including State/Territorial Health Officials (S/THO) and national partners to collaboratively identity barriers and solutions to increase vaccine uptake

- We hope the Roadmap will:
  - Provide clear, actionable strategies that state and territorial health officials can use to address barriers
  - Inspire a collective effort across multiple states to implement coordinated strategies to improve access and uptake

ACIP

ASTHO, like many organizations, is working to maintain situational awareness on the changing ACIP landscape and keep our members informed

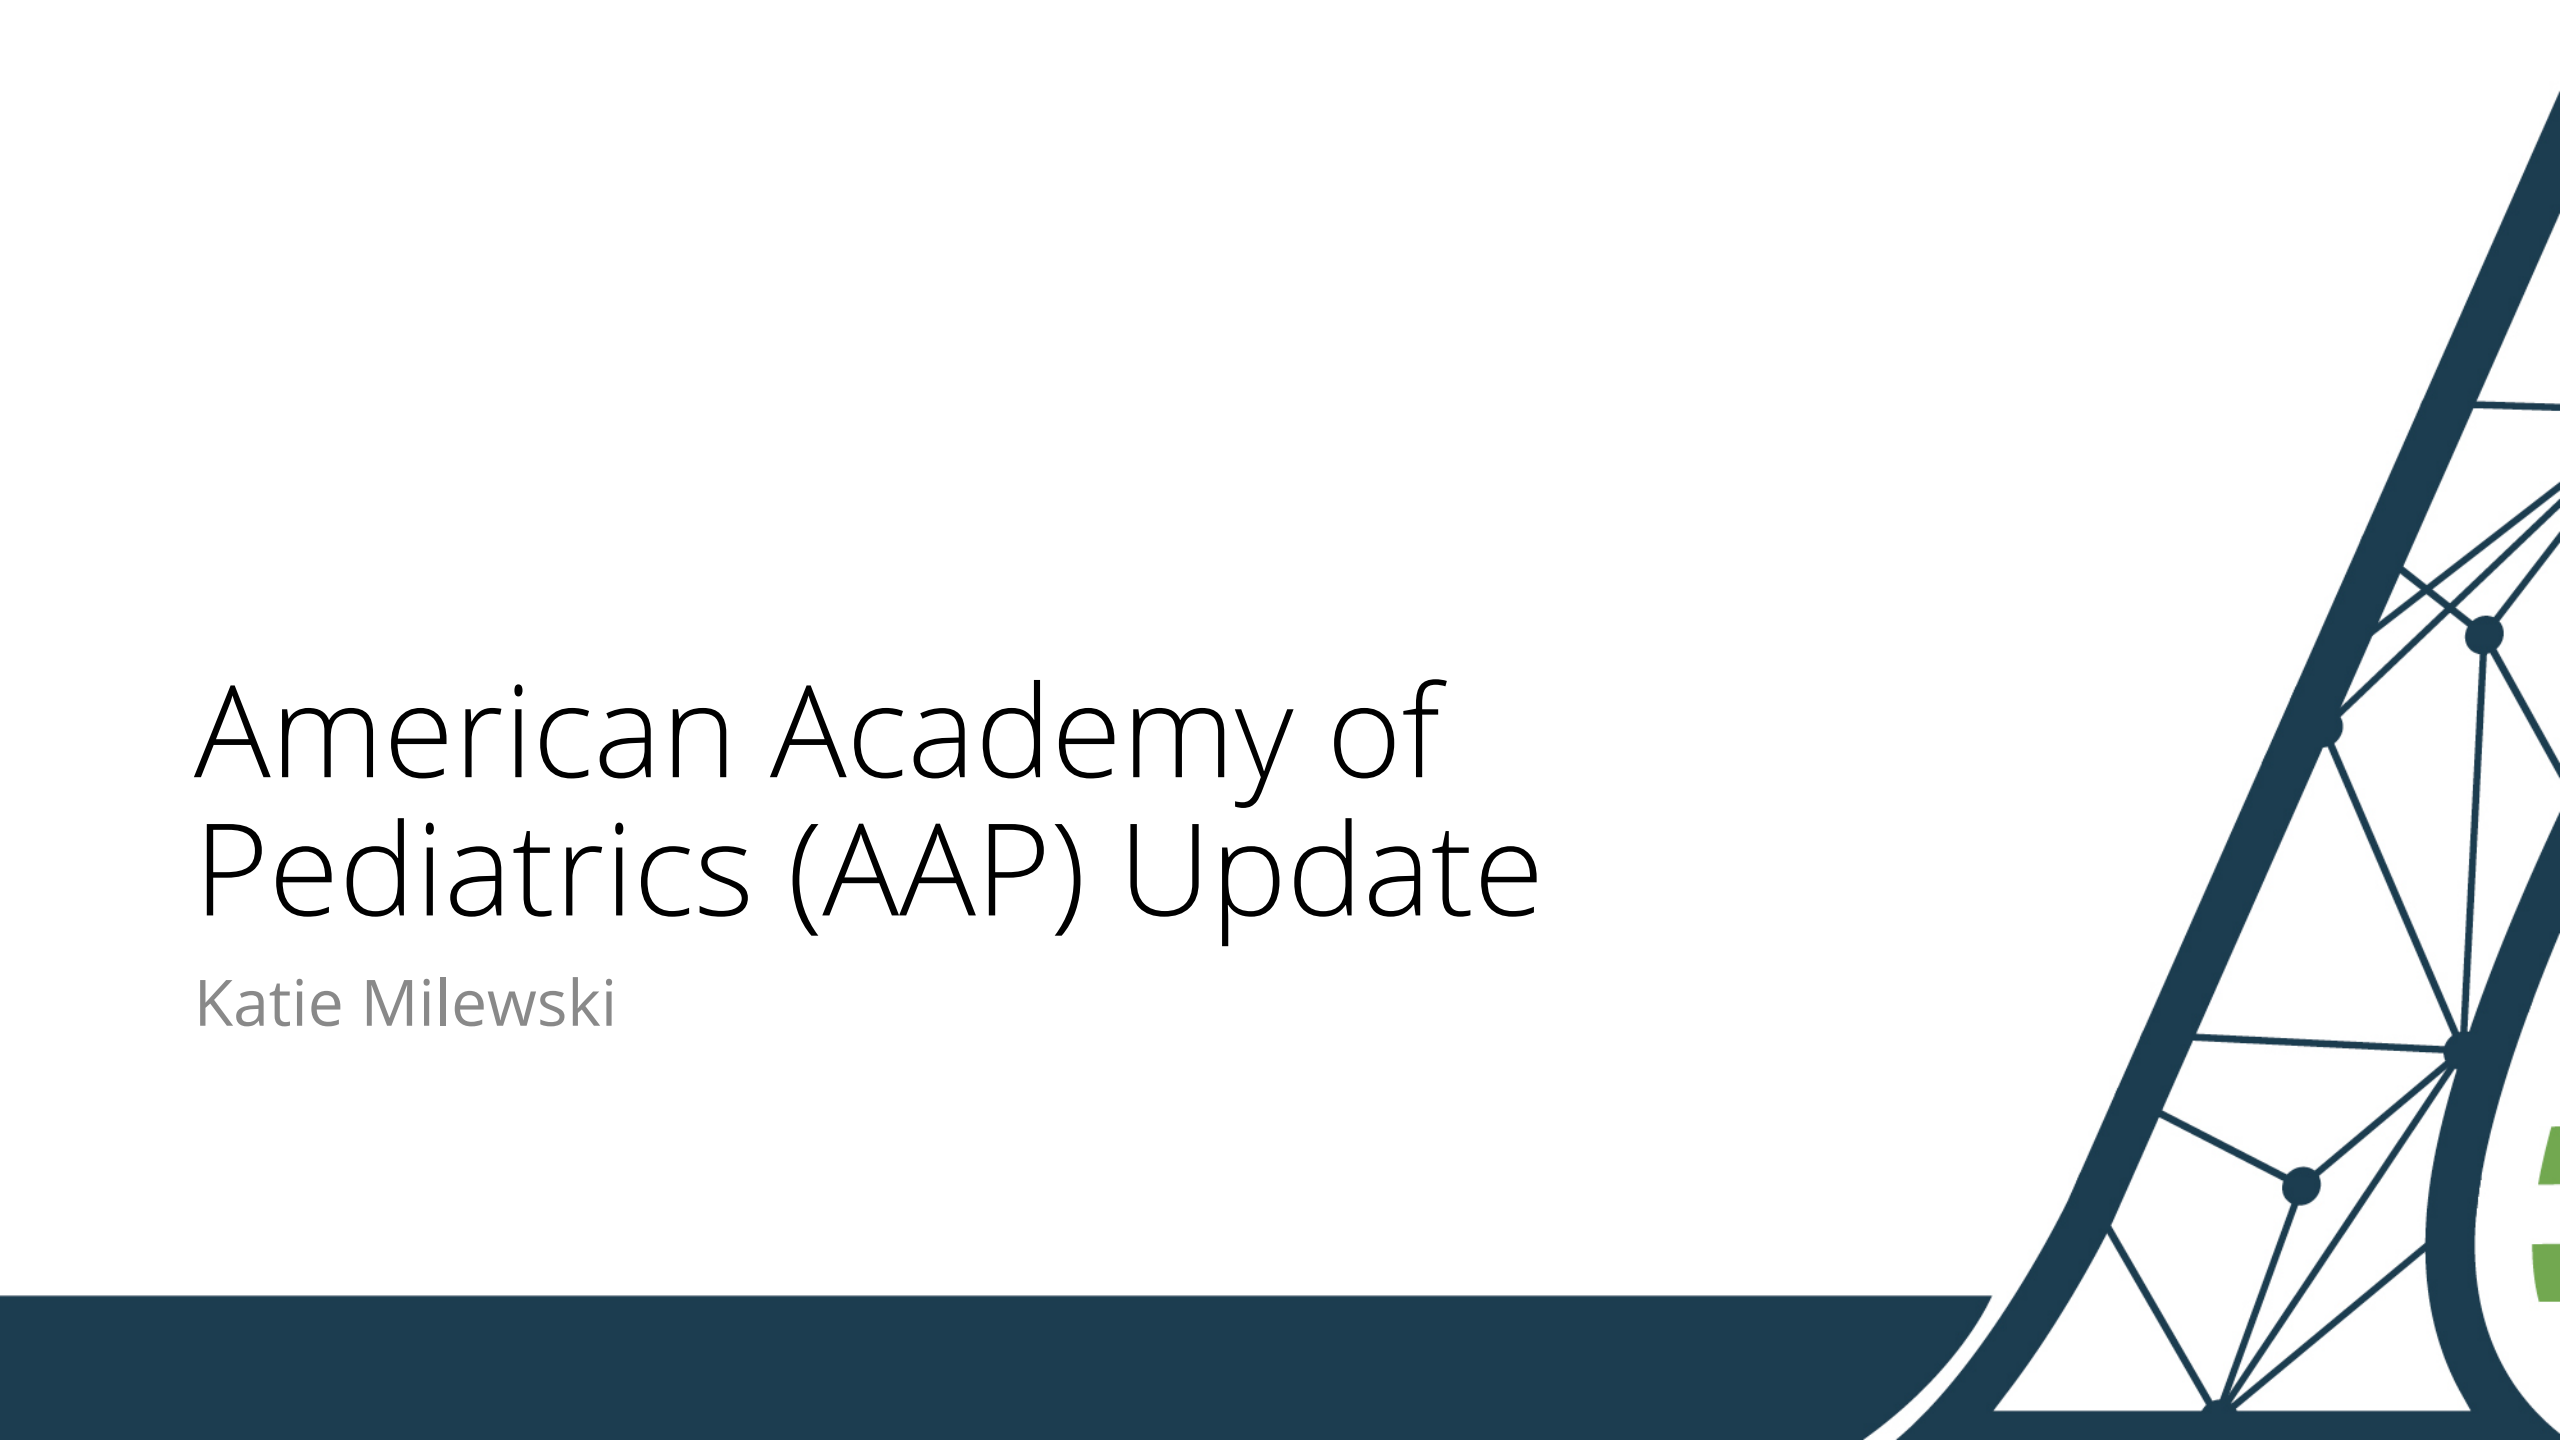
American Academy of Pediatrics (AAP) Update

Katie Milewski



AIRA Members & Partners Meeting

July 21, 2025

American Academy of Pediatrics

DEDICATED TO THE HEALTH OF ALL CHILDREN®

NIAM

National Immunization Awareness month

- August is National Immunization Awareness Month (NIAM), and the AAP will be promoting many new and updated resources and pressing the importance of vaccines. The AAP is launching a new vaccine confidence campaign that will continue over the next two years.
- The Academy is offering its members and other providers strong messages to share, including:
  - Why Pediatricians Recommend Vaccines: An Open Letter to Parents
  - Social media content on the following platforms
    - Instagram
    - LinkedIn
    - Blusky

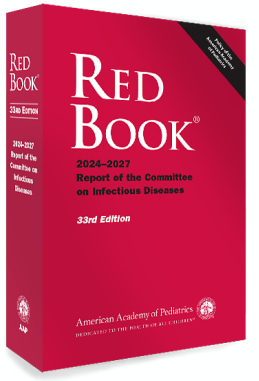
NIAM

National Immunization Awareness month

- The AAP will also be promoting:
  - its YouTube course on immunization: For New Parents, The Complete Guide to Childhood Vaccinations.
  - updated content on the AAP's Immunizations Campaign Toolkit.
- Other resources include:
  - Childhood Immunizations: Common Questions
  - All About the Recommended Immunization Schedules
  - Vaccines for 'Tweens, Teens & Young Adults
  - Vaccines Your Child Needs by Age 6

AAP Webinars

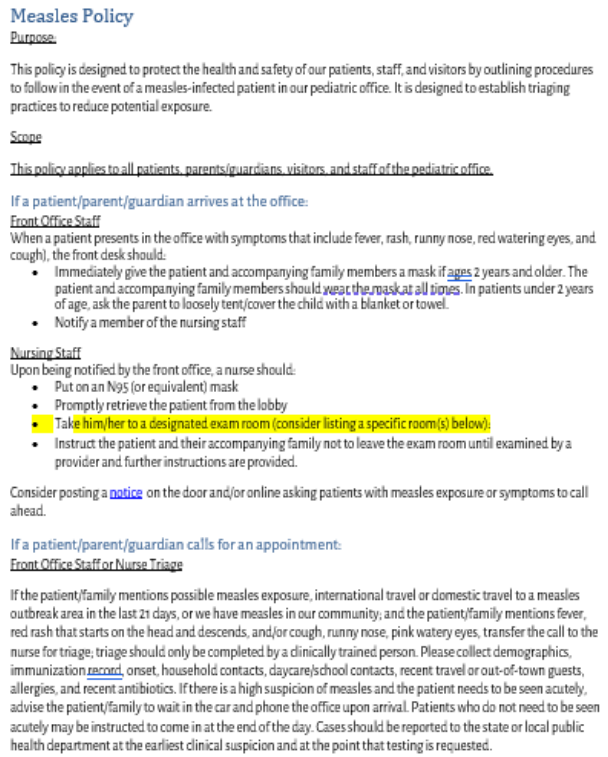
- **Vaccine Hesitancy, Misinformation and Disinformation**
  - Held on Monday June 23rd by the AAP Section on Administration and Practice Management (SOAPM).
  - Recording available here.
- **AAP Red Book Online: Spotting a Threat: Measles in Immunocompromised Children (24:40)**
  - Held on May 21st by the AAP Committee on Infectious Diseases.
  - Recording available here.
  - Slides available here



Measles Prevention and Control Implementation

New webpage!

- **New!** Measles Prevention and Control Implementation
  Use this page to implement practices in your office to prevent and control measles spread. You'll find details about measles vaccination recommendations, a sample, customizable measles policy, and tips to help implement it in your office.



Measles Policy

Purpose:

This policy is designed to protect the health and safety of our patients, staff, and visitors by outlining procedures to follow in the event of a measles-infected patient in our pediatric office. It is designed to establish triaging practices to reduce potential exposure.

Scope

This policy applies to all patients, parents/guardians, visitors, and staff of the pediatric office.

If a patient/parent/guardian arrives at the office:

Front Office Staff

When a patient presents in the office with symptoms that include fever, rash, runny nose, red watering eyes, and cough), the front desk should:

- Immediately give the patient and accompanying family members a mask if ages 2 years and older. The patient and accompanying family members should wear the mask at all times. In patients under 2 years of age, ask the parent to loosely tent/cover the child with a blanket or towel.
- Notify a member of the nursing staff

Nursing Staff

Upon being notified by the front office, a nurse should:

- Put on an N95 (or equivalent) mask
- Promptly retrieve the patient from the lobby
- Take him/her to a designated exam room (consider listing a specific room(s) below).
- Instruct the patient and their accompanying family not to leave the exam room until examined by a provider and further instructions are provided.

Consider posting a notice on the door and/or online asking patients with measles exposure or symptoms to call ahead.

If a patient/parent/guardian calls for an appointment:

Front Office Staff or Nurse Triage

If the patient/family mentions possible measles exposure, international travel or domestic travel to a measles outbreak area in the last 21 days, or we have measles in our community; and the patient/family mentions fever, red rash that starts on the head and descends, and/or cough, runny nose, pink watery eyes, transfer the call to the nurse for triage; triage should only be completed by a clinically trained person. Please collect demographics, immunization record, onset, household contacts, daycare/school contacts, recent travel or out-of-town guests, allergies, and recent antibiotics. If there is a high suspicion of measles and the patient needs to be seen acutely, advise the patient/family to wait in the car and phone the office upon arrival. Patients who do not need to be seen acutely may be instructed to come in at the end of the day. Cases should be reported to the state or local public health department at the earliest clinical suspicion and at the point that testing is requested.

Immunization Discussion Guide

Learning Collaborative

- For 8 weeks in May – July the AAP held a learning collaborative of 14 pediatric practices.
- Participants were asked to use the AAP Immunization Discussion Guides in most conversations about vaccines with families.
- Participants met virtually bi-weekly, and shared successes, challenges, and strategies via email or online during the other weeks.

- Immunization Discussion Guides

Immunization Discussion Guide

Learning Collaborative

- Participant Quotes
  - *[A] newborn parent [took the] guide during the visit, [went] over them with me…this was time-consuming but ultimately was helpful for the family as they were feeling overwhelmed. This has helped make the vaccine discussion more calm, clinical, less emotional.*
  - *I think the guides have helped me in presenting information in a more concise and confident manner.*

- Immunization Discussion Guides
