AAP Guidance for the 2025-26 Respiratory Virus Season

Influenza

The AAP has released recommendations for the 2025-26 influenza season. Recommendations remain largely the same as in prior years with experts recommending that everyone 6 months and older without medical contraindications get vaccinated with any vaccine appropriate for age and health status.

Chapter Grants and CIRs

- Chapter grant projects will kick off in February for 6 awardees
  - More to come in future updates about the project plans and impacts!
- The Chapter Immunization Representative meeting series will take place from March – July
  - We are seeking presenters who can speak to a variety of immunization topics, including for practicing pediatricians (how to talk to families, practice-level policies to increase rates, etc) and for those working at the community or state level (partnering with organizations, communications campaigns, etc)

New AAP.org Immunization Content

- New patient care page on hepatitis B: https://www.aap.org/en/patient-care/hepatitis-b/
  - Includes a hepatitis B FAQ page: https://www.aap.org/en/patient-care/hepatitis-b/hepatitis-b-vaccine-frequently-asked-questions/
- Clinician-Family Immunization Communications FAQ page
  - Guidance for providers in talking with families about recent changes to the CDC vaccination schedule
