# INDUCTIVEHEALTH | ENVISION – PRODUCT INNOVATION

DEPLOYED OR ACTIVE DEVELOPMENT

**INTEROPERABILITY & STANDARDS ADOPTION**

## Central Integration Engine

Observability & Insights across all integrations

SMART-Authorized FHIR Bulk Data Export - Patient Evaluations

Unified API Layer

FHIR ready integration connectors for real time bi-directional data exchange

**DATA QUALITY & ANALYTICS**

Centralized AI-powered SaaS Data Platform

SQL & API based timely data access

Self-service and AI summary-based Data Quality tools & scorecards

Power BI Dashboards with natural language prompts

**MODERNIZATION & USER EXPERIENCE**

## Scalable Admin & Self Configuration Portal

Accessibility & Performance first approach

OpenSearch based performant & timely HL7 logs and data search

Centralize Provider Enrollment & Clinic User Management

**AI & INTELLIGENT AUTOMATION**

Automated Provider Onboarding Validation & Workflow Management

ML based patient matching & AI driven deduplication workflows

AI powered curated data pipelines and test data generation

Predictive insights for Admins across IIS Program

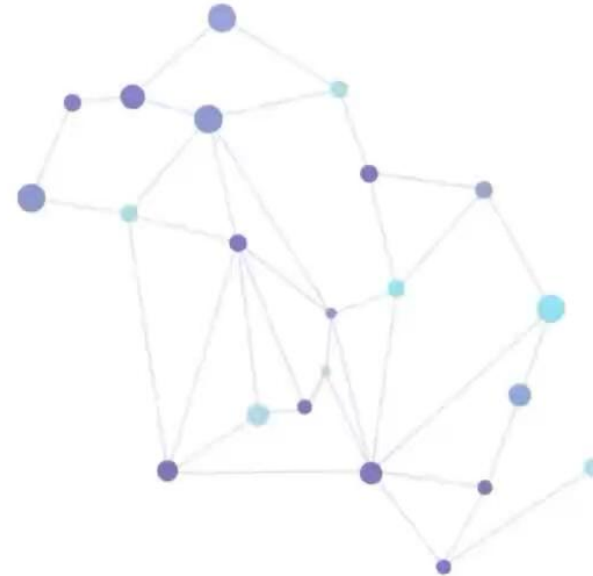

Onboarding Validation

## Validate public health data feeds in seconds – not days

Onboarding validation across 5 domains with 321 rules and 604K+ terminology codes.

5 domains · 321 validation rules · 604K+ terminology codes

Get Started

IMPLEMENTS SPECIFICATIONS FROM

**3M** Syndromic messages daily

**40%** of all ED data

**20M** Labs weekly

**20k** Active facilities

**85M** Active patients

**1B** Immunizations

*Stop Disease Through Technology*
